**The Encyclopedia of Moon Mysteries** Constance Victoria Briggs,2019-03-19 Our moon is an enigma The ancients viewed it as a light to guide them in the darkness and a god to be worshipped In modern times it has been taught that the

Moon is simply a dead rock that is caught in Earth's gravity with no activity. As a researcher of metaphysical, paranormal, and cosmic subjects, I have come across stories and information about the Moon that tell us that indeed there is activity there and there has been for generations. Just who or what is causing the commotion is a mystery. There are stories that suggest that the Moon is home to extraterrestrials, theories that it is not a natural satellite, tales of anomalous lights, and tales that NASA astronauts saw extraterrestrial ships and ruins of an ancient civilization there. There is a rumor that Apollo 13 was saved by extraterrestrials. Another story states that there are extraterrestrial bases on the Moon. There is even a tale that states that a part of the kingdom of Atlantis was once located there. Some even believe that there are cities beneath the surface of the Moon. There is an interesting account of a government employee using remote viewing as a means of seeing what is on the Moon. His experience is eye-opening. This is just a sample of the information that will be in *The Encyclopedia of Moon Mysteries, Secrets, Conspiracy Theories, Anomalies, Extraterrestrials, and More*. For example, did you know that Aristotle and Plato wrote about a time when there was no Moon? They even gave a name to an ancient tribe of people that lived during that moonless period. Several of the NASA astronauts reported seeing UFOs while traveling to the Moon. The Moon might be hollow. Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon. Strange and unexplained lights have been seen on the Moon for centuries. There are said to be ruins of structures on the Moon. There is an ancient tale that suggests that the first human was created on the Moon. That radio signals have been detected coming from the Moon. That famed astronomer Sir John Herschel saw unidentified lights above the Moon during an eclipse. That ancient Bolivian symbols tell us that the Moon came into Earth's orbit around 12,000 years ago. That a psychic was used by the government to relay information about the Moon. The book is separated into A to Z sections for easy reference and reading.
