Longman Twentieth Century History Series China Since 19:

Twentieth-Century China Jeffrey N. Wasserstrom, 2013-10-14 Twentieth Century China New Approaches is an important revisionist study of China's recent past. The chapters throw light on a variety of subjects within the field which has recently undergone considerable change. The three major parts of this reader take into account the historical shape of the century, local perspectives on national history and reflections on cultural history. The chapters in this volume reflect a move away from a Western-centred analysis of Chinese history as well as the new wealth of archival material made accessible over the last decade. They highlight in challenging ways important topics that have generated considerable excitement among historians. Subjects discussed include the watershed date of 1949, feminism, the revolutions, the discourse of the communist party and political theatre in modern China.

The Twentieth Century World Fiona Reynoldson, 1995 Focusing on 20th century history, this is one of a series which provides simplified versions of topics covered in the Heinemann History Study Units series. The text, written sources and questions have been reduced and simplified to meet the needs of less able pupils at Key Stage 3, but the material is pitched at a level of maturity designed to sustain pupils' interest. For each book in the series, there is a corresponding teacher's resource pack.

The Traditional Chinese Iron Industry and Its Modern Fate Donald B. Wagner, 2013-11-05 This book explores the economic history of the traditional Chinese iron industry in the nineteenth and twentieth centuries with particular emphasis on the interactions among technological, economic and geographic factors. The traditional technology of iron production is described together with the ways in which it changed and developed in response to upheavals wrought by foreign competition, war and revolution, and by the growth in China of a modern iron industry. Many of the book's findings are counter-intuitive and will provide food for thought in the study of Third World industrial development. The author has written widely on the history of science and technology in China and is currently engaged in writing the volume on ferrous metallurgy for Joseph Needham's *Science and Civilisation in China*.

Women and War in the Twentieth Century Nicole A. Dombrowski, 2004-11-23 First published in 2005. This volume documents women's 20th century wartime experiences from World War I through the recent conflicts in Bosnia. The articles cross national boundaries including France, China, Peru, Guatemala, Germany, Bosnia, the U.S. and Great Britain. The contributors of these original essays trace the evolution of women's roles as victims of war while also showing how they have been increasingly incorporated into battle as actors and perpetrators. These comparative studies analyze war's disruptions of daily life, its effects on children, rape as a war crime, access to equal opportunity and women's resistance to
