## **Louis Herman De Koninck Architect Of Modern Times:**

*Louis Herman de Koninck, architect of modern times* Jean-Louis Cohen, 1998 In 1919 architect Louis Herman De Koninck 1896 1984 a former student of Victor Horta was asked to help with the reconstruction of those parts of Belgium that had been destroyed in the First World War The achievements of Louis Herman De Koninck were studied and published in all the most important architectural reviews of the period *Louis Herman de Koninck: architecte des années modernes, architect of modern times* Louis Herman Koninck, 1989 The Modern Period Room Penny Sparke, Brenda Martin, Trevor

Keeble, 2006-08-21 With contributors drawn from a broad range of disciplines The Modern Period Room brings together a carefully selected collection of essays to consider the interiors of the modern era and their more recent reconstructions from a variety of different viewpoints Contributions from leading design historians architects and curators of the history of the domestic interior in the UK engage with the issues and conventions surrounding the modern period room to expose the conflicting tensions that lie beneath the conceptual and physical strategy of the modern period room's representational technique Exploring themes and examples by prestigious architects such as Ern Goldfinger Truus Schroeder and Gerrit Rietveld the authors reveal the specific coding of presented interior spaces This illustrated new take on the historiography of twentieth century show interiors enables historians and theorists of architecture design and social history to investigate the contexts in which this representational device has been used **Building Histories: the Proceedings of the Fourth**

**Annual Construction History Society Conference** James Campbell, Yiting Pan, Nina Baker, Michael Driver, Michael Heaton, Michael Tutton, David Yeomans, Treve Rosoman, 2017 This volume is the fourth in the series Each contains the papers presented at the annual conferences of the Construction History Society This volume contains papers on the history and development of concrete construction on the education of architects on the development of scaffolding and roof construction and much more **Valences of Historiography** Gevork Hartoonian, 2024-12-30 The compiled essays offer various themes

and ways of approaching historiography Each chapter probes the state of contemporary theorization of architecture histories working toward the theme of critically re writing history Essential to each author's contribution are specific traditions created by the mole of history burrowing through the past This book concerns the historian's conjectures towards capturing the past and present zeitgeist Temporality is the theme running through the narrative of this volume It raises the question of whether the ever growing body of work on architectural history should be considered as history More specifically what is the intersection between history and architectural history Furthermore can every text focused on architecture's past be considered categorically historiographic In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian's interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism

Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents Valences of Historiography offers a fresh take on architectural history that is useful for academics researchers and architecture students *The Politics of Furniture* Fredie Floré, Cammie McAtee, 2017-02-10 In many different parts of the world modern furniture elements have served as material expressions of power in the post war era They were often meant to express an international and in some respects apolitical modern language but when placed in a sensitive setting or a meaningful architectural context they were highly capable of negotiating or manipulating ideological messages The agency of modern furniture was often less overt than that of political slogans or statements but as the chapters in this book reveal it had the potential of becoming a persuasive and malleable ally in very diverse politically charged arenas including embassies governmental ministries showrooms exhibitions design schools libraries museums and even prisons This collection of chapters examines the consolidating as well as the disrupting force of modern furniture in the global context between 1945 and the mid 1970s The volume shows that key to understanding this phenomenon is the study of the national as well as transnational systems through which it was launched promoted and received While some chapters squarely focus on individual furniture elements as vehicles communicating political and social meaning others consider the role of furniture within potent sites that demand careful negotiation whether between governments cultures or buyer and seller In doing so the book explicitly engages different scholarly fields design history history of interior architecture architectural history cultural history diplomatic and political history postcolonial studies tourism studies material culture studies furniture history and heritage and preservation studies Taken together the narratives and case studies compiled in this volume offer a better understanding of the political agency of post war modern furniture in its original historical context At the same time they will enrich current debates on reuse relocation or reproduction of some of these elements

**The Other Modern Movement** Kenneth Frampton, 2022-01-25 A revealing new look at modernist architecture emphasizing its diversity complexity and broad inventiveness Usually associated with Mies and Le Corbusier the Modern Movement was instrumental in advancing new technologies of construction in architecture including the use of glass steel and reinforced concrete Renowned historian Kenneth Frampton offers a bold look at this crucial period focusing on architects less commonly associated with the movement in order to reveal the breadth and complexity of architectural modernism The Other Modern Movement profiles nineteen architects each of whom consciously contributed to the evolution of a new architectural typology through a key work realized between 1922 and 1962 Frampton's account offers new insights into iconic buildings like Eileen Gray's E 1027 House in France and Richard Neutra's Kaufmann House in Palm Springs California as well as lesser known works such as Antonin Raymond's Tokyo Golf Club and Alejandro de la Sota's Maravillas School Gymnasium in Madrid Foregrounding the ways that these diverse projects employed progressive models advanced new methods in construction techniques and displayed a new sociocultural awareness

Frampton shines a light on the rich legacy of the Modern Movement and the enduring potential of the unfinished modernist project

**Modern Architecture: A Critical History (Fifth) (World of Art)** Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of *Modern Architecture* Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever

*Architectures of Bureaucracy* Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance While Belgium was strongly influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts Such experts and scientists constituted a rising elite of *homines novi* with strong though often veiled political ambitions As such this book contributes to our understanding of political culture in the age of extremes
