Louis I. Kahn

Louis I Kahn Works And Projects:

Louis I. Kahn Klaus-Peter Gast, Louis I. Kahn, 1999 1999 is the twenty fifth anniversary of Louis Kahn's death. In the second half of the twentieth century Louis Kahn's designs took on enormous significance for international architecture. Kahn belonged to that generation of architects which perfected and simultaneously surpassed Modernism. Most of Kahn's projects were realised in the USA and several large projects were built in Asia. From Kahn's early work to larger projects such as the National Capital of Bangladesh in Dhaka and the Kimbell Art Museum in Fort Worth the documented works all illustrate the human aspect in Kahn's work. *Louis I. Kahn* Romaldo Giurgola, 1991. Las mas de 200 paginas de este libro permiten repasar la obra completa y las ideas de Louis I Kahn 1901 1974 en un formato compacto. Extensamente ilustrado y documentado el libro presenta la produccion de Kahn en varios capitulos dedicados a obras y proyectos de vivienda, lugares para el culto, lugares para el trabajo, instituciones junto a sus propuestas de ciudad en una edicion que incluye ensayos sobre temas basicos en torno a los cuales se mueve su obra, tales como la luz, el hombre, el bienestar, el sentido del lugar, la arquitectura o la ciudad. Louis Kahn Mateo Kries, Jochen Eisenbrand, Stanislaus von Moos, 2012. The American architect Louis Kahn 1901 1974 is regarded as one of the great master builders of the twentieth century. With complex spatial compositions, an elemental formal vocabulary and a choreographic mastery of light, Kahn created buildings of archaic beauty. As the first comprehensive publication on this architect in 20 years, the book *Louis Kahn: The Power of Architecture* presents all of his important projects. It includes essays by prominent Kahn experts and an expansive illustrated biography with many new facts and insights about Kahn's life and work. In a number of interviews, leading architects such as Frank Gehry, Renzo Piano, Peter Zumthor and Sou Fujimoto underline Kahn's significance in today's architectural discourse. An extensive catalogue of works features original drawings and architectural models from the Kahn archive. The compendium is further augmented by a portfolio of Kahn's travel drawings as well as photographs by Thomas Florschuetz which offer completely new views of the Salk Institute and the Indian Institute of Management. Louis I. Kahn's Jewish Architecture Susan G. Solomon, 2015-05-01. In 1961, famed architect Louis I Kahn 1901 1974 received a commission to design a new synagogue. His client was one of the oldest Sephardic Orthodox congregations in the United States, Philadelphia's Mikveh Israel. Due to the loss of financial backing, Kahn's plans were never realized. Nevertheless, the haunting and imaginative schemes for Mikveh Israel remain among Kahn's most revered designs. Susan G Solomon uses Kahn's designs for Mikveh Israel as a lens through which to examine the transformation of the American synagogue from 1955 to 1970. She shows how Kahn wrestled with issues that challenged postwar Jewish institutions and evaluates his creative attempts to bridge modernism and Judaism. She argues that Kahn provided a fresh paradigm for synagogues, one that offered innovations in planning, decoration and the incorporation of light and nature into building design. **Louis I. Kahn's Trenton Jewish Community Center** Susan G. Solomon, 2000. The Building Studies series examines important buildings through original documents, detailed text.

using the historian's concept of a project of crisis as a lens through which to examine his historical construction of contemporary architecture. Mindful of Tafuri's statement that there is no such thing as criticism only history, Biraghi carefully maps the influences on Tafuri's writing: Walter Benjamin, Karl Krauss, Massimo Cacciari and the architect Ludovico Quaroni among others in order to create a portrait of one of the most complex minds in twentieth century architecture and architectural history. Tracing an arc from Tafuri's first articles in the magazine *Contropiano* to the idea of contradiction at the center of the project of crisis, Biraghi cites Tafuri's writing on some of his contemporaries including Louis Kahn, Le Corbusier, Robert Venturi, Aldo Rossi and the Five Architects: Peter Eisenman, Michael Graves, Charles Gwathmey, John Hejduk and Richard Meier. Tafuri's historical construction of the contemporary, Biraghi explains, is based on the idea that the past is open, providing the present with ever-changing and indeterminate form. There is no contradiction between Tafuri the historian and Tafuri the contemporary critic; only the greatest possible integration. The importance of Tafuri's interpretation of architecture goes beyond mere academic or historiographic interest. Biraghi argues Tafuri's notion of the project of crisis is fundamentally important in understanding our present-day architectural condition.

Faces of Geometry. From Agnesi to Mirzakhani

Paola Magnaghi-Delfino, Giampiero Mele, Tullia Norando, 2019-10-08. The volume reports on interdisciplinary discussions and interactions between theoretical research and practical studies on geometric structures and their applications in architecture, the arts, design, education, engineering and mathematics. These related fields of research can enrich each other and renew their mutual interest in these topics through networks of shared inspiration and can ultimately enhance the quality of geometry and graphics education. Particular attention is dedicated to the contributions that women have made to the scientific community and especially mathematics. The book introduces engineers, architects and designers interested in computer applications, graphics and geometry to the latest advances in the field with a particular focus on science, the arts and mathematics education.

Louis I Khan Beyond Time and Style Carter Wiseman, 2007-02-27. The first in-depth biographical study of the brilliant but elusive architect who fundamentally redefined twentieth-century architecture. Now ranked with Frank Lloyd Wright, Le Corbusier and Mies van der Rohe, Louis I. Kahn brought a reverence for history back into modern architecture while translating it into a uniquely contemporary idiom. Drawing on more than one hundred interviews with colleagues, coworkers, clients and family members and illustrated with many previously unpublished photographs, this book documents the uniquely American rise of a poor immigrant to the pinnacle of the international architectural world. It illuminates the richly diverse personal relationships Kahn had with such clients as Jonas Salk and Paul Mellon and the romantic entanglements that mystified even those closest to him. While celebrating the genius of Kahn's art, the book provides an invaluable portrait of the man who created it.

Architecture From the Outside In Robert Gutman, Dana Cuff, Bryan Bell, 2010-03-03. This work is organized into five sections: practices, buildings and projects, architecture and sociology, housing and architectural education, with 14 essays/articles by Gutman, each preceded by a brief introduction setting the context in

which it was written **The wall as living place** Francesco Cacciatore,2014-03-19 There is ample evidence as to how the modern masters in their shared pursuit of formal inventions and constructional inventions variously referred to past examples they had freely chosen as guides that could inspire and support them in their strenuous pursuit of new things The buildings shaped like soft clouds and gelatinous bowels or the spiked bravura pieces designed by today's fashionable architects have no relation with either construction or history Louis Kahn instead kept form structure and history paradigmatically together The book systematically reviews the intense structural experimentation that in terms not just of building engineering but of spatial and representational potential marked Kahn's work since the beginning and would eventually lead him after a long apprenticeship to an almost constant adoption of hollow structural forms By reviewing this long and intense journey of research the book underlines how Louis Kahn in each work and based on a constant dialogue between structural innovation building tradition and figural evocation succeeded in awakening our interest in a new fascinating structure and at the same time our emotion for a deeply meaningful universal and timeless form *The Role of Place Identity in the Perception, Understanding, and Design of Built Environments* Hernan Casakin,Fátima Bernardo,2012 In an era of globalization where the progressive deterioration of local values is a dominating characteristic identity is seen as a fundamental need that encompasses all aspects of human life One of these identities relates to place and the physical en

Conserving 20th-Century Architecture Maria Paola Borgarino,Davide Del Curto,2023-03-30 This book offers an international overview of how to apply the Conservation Management Plan CMP to the 20th century architectural heritage Although the CMP is universally considered a fundamental tool for sustainable management of the built heritage the application to 20th century buildings is still limited The book illustrates selected case studies from different countries to discuss how best to preserve the authenticity of the original materials manage changes in use engage users and stakeholders in this process and make conservation and sustainability work together Conserving 20th century architecture will provide insights for scholars and students and assist architects in drafting an effective conservation management plan

Reinventing Jerusalem Simone Ricca,2007-05-25 The Jewish quarter of Jerusalem today seems like an organic fusion of a modern Israeli city with an ancient Jewish heritage However as Simone Ricca details in this fascinating book the aesthetics of the Jewish Quarter were deliberately planned and executed by Israel after it was occupied during the 1967 war Secular nationalist as well as religious politicians agreed that it should be turned in to the capital of the Jewish nation and that it should be excavated and developed in such a way as to create a sense of continuity with the Jewish people's historical claims to the land Zionist ideology was thus translated in to bricks and mortar as modern civic amenities were constructed around historic sites such as the Wailing Wall and the Hurva Synagogue Ricca examines the politics of heritage conservation and shows that the Old City's reconstruction did not so much preserve the past as inscribe an identity on to the future

Non-Design Anthony Fontenot,2021-07-09 Anthony Fontenot's staggeringly ambitious book uncovers the surprisingly

libertarian heart of the most influential British and American architectural and urbanist discourses of the postwar period expressed as a critique of central design and a support of spontaneous order Non Design illuminates the unexpected philosophical common ground between enemies of state support most prominently the economist Friedrich Hayek and numerous notable postwar architects and urbanists like Robert Venturi Denise Scott Brown Reyner Banham and Jane Jacobs These thinkers espoused a distinctive concept of non design characterized by a rejection of conscious design and an embrace of various phenomenon that emerge without intention or deliberate human guidance This diffuse and complex body of theories discarded many of the cultural presuppositions of the time shunning the traditions of modern design in favor of the wisdom freedom and self organizing capacity of the market Fontenot reveals the little known commonalities between the aesthetic deregulation sought by ostensibly liberal thinkers and Hayek s more controversial conception of state power detailing what this unexplored affinity means for our conceptions of political liberalism Non Design thoroughly recasts conventional views of postwar architecture and urbanism as well as liberal and libertarian philosophies *Encyclopedia of Twentieth Century Architecture* R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedic of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries
