Love Is a Story Robert J. Sternberg, 1999-06-03 In this groundbreaking work Robert Sternberg opens the book of love and shows you how to discover your own story and how to read your relationships in a whole new light What draws us so strongly to some people and repels us from others What makes some relationships work so smoothly and others burst into flames Sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love stories we carry inside us Drawing on extensive research and fascinating examples of real couples Sternberg identifies 26 types of love story including the fantasy story the business story the collector story the horror story and many others each with its distinctive advantages and pitfalls and many of which are clashingly incompatible These are the largely unconscious preconceptions that guide our romantic choices and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships As long as we remain oblivious to the role our stories play we are likely to repeat the same mistakes again and again But the enlivening good news this book brings us is that though our stories drive us we can revise them and learn to choose partners whose stories are more compatible with our own Quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner Are you a traveler a gardener a teacher or something else entirely Love is a Story shows you how to find out

Common Ties serves to provide an explanation of the complex workings of inner family life. The text primarily focuses on family processes and dynamics the inside of families as opposed to sociological trends, political topics or the individual psychological approach. The text further presents the research underlying these processes and effectively presents ways to increase the positive aspects of family life. This edition has been updated to include current research and contemporary topics. The text has been divided into four parts: Foundations, Building and Establishing Families, Maintaining Families, and Change. Turbulence, Gains, Losses. While the research methods chapter still provides an introductory examination of family science research, it now includes an expanded discussion on research design methods and advances in the area. A new chapter titled Forgiveness, Kindness, Hope, and Gratitude has been incorporated to amplify positive family processes and highlight emerging research. This edition provides added emphasis on diverse families, e.g., race, ethnicity, family structure, LGBTQIA, ability, culture, and family formation, and each chapter includes a new Discussions in Diversity section related to that chapter. The authors have consciously included an epilogue as a way of reflecting on what they have learned along with what they hope to learn in the future. Aimed at courses related to family studies and family dynamics, this text provides a comprehensive review of family processes. Whether it is used for undergraduate or graduate classes, professional growth, or personal enrichment, the text assists readers in enhancing the positive aspects of family life, avoiding undesirable aspects, and more effectively managing the challenges and obstacles families face that cannot be avoided. Thus, the text holds an appeal for people who live or will live in families as well as those who want to work with families.
