Luke Howard 1772-1864 His Correspondence With Goethe And His Continental Journey Of 1816:

Luke Howard (1772-1864) Luke Howard, 1976 *German History in Global and Transnational Perspective* David Lederer, 2017-08-08 This is a collection of essays from three of the world's pre-eminent historians of Germany which consider German history in global and transnational contexts. It is well known that transnationalism has exploded in the last decade or so as a new academic subfield of international and global history. What the transnationalism literature often ignores or downplays however is the role of the nation state in making the transnational possible in the first place as noted in its very etymological origins. This volume traces this dynamic from a different vantage point namely the relationship between German history and transnationalism. Each essay applies a transnational framework in fresh and original ways in order to illuminate different facets of the connections between Germany and the wider world in the modern period. Together they will encourage the rethinking of assumptions about key moments and developments in the history of modern Germany and foster reflection on the evolving nature of German history as a subject studied in the twenty-first century. **The Invention of Clouds**

Richard Hamblyn, 2002-08-03 Presents the story of Luke Howard an amateur meteorologist and his groundbreaking work that began with naming and classifying clouds. *An Ocean of Literature: John Henry Bohte and the Anglo-German Book Trade in the Early Nineteenth Century* Graham Jefcoate, 2020-01-13 In den Jahren nach den Napoleonischen Kriegen gewann der in Bremen geborene John Henry Bohte 1784-1824 als Buchverleger und Verleger mit einem in London angesiedelten Import-Export-Geschäft und einer Präsenz in Leipzig schnell an Ansehen. Anfang 1813 eröffnete Bohte als noch Zwanzigjähriger seinen Laden in der York Street Covent Garden. Er spezialisierte sich auf den Import deutscher Bücher und deutscher Ausgaben der griechischen und römischen Klassiker, vereinigte sein Einzelhandelsgeschäft aber schnell mit der Deutschen Lesebibliothek. Anfang 1820 wurde er als Ausländischer Buchhändler seiner Majestät dem König mit einem Royal Warrant dem Hoflieferantenstatus ausgezeichnet. Das Portfolio der Produkte und Dienstleistungen von Bohtes Geschäft umfasste nicht nur den Import deutscher Bücher sondern auch ein ambitioniertes Verlagsprogramm für die Bereiche der deutschen und englischen Literatur, der klassischen Philologie und Naturgeschichte. Bohtes regelmäßige und lange Reisen nach Deutschland zur Leipziger Buchmesse reflektierten seine Ambition, zudem einer der Hauptexporteure englischer Bücher für den Kontinent zu werden. In den Worten eines anonymen Rezensenten wurde Bohte als der temperamentvollste und nützlichste Buchverleger betrachtet. Trotz seines frühen Todes im Alter von 40 Jahren in London im Jahr 1824 hinterließ er wichtige Nachlässe sowohl in London als auch in Leipzig. In seiner Biografie von J. H. Bohte *An Ocean of Literature* nutzt Graham Jefcoate eine umfangreiche Auswahl von Materialien aus Sammlungen in Großbritannien, Deutschland und weiteren Ländern, um die Rolle des Buchhandels im Laufe des deutsch-britischen Austauschs des frühen 19. Jahrhunderts zu veranschaulichen. In the years following the Napoleonic Wars the Bremen-born John Henry Bohte 1784-1824 quite rapidly acquired a reputation as a bookseller and publisher with an import-export business based in London and also a presence in Leipzig. Bohte opened his

shop in York Street Covent Garden in early 1813 while still in his twenties He specialised in importing German books and German editions of the Greek and Roman classics but soon combined his retail business with a German circulating library the Deutsche Lesebibliothek In early 1820 he was awarded a Royal Warrant as Foreign Bookseller to His Majesty the King The portfolio of products and services offered by Bohte's business included not just the importation of German books but also an ambitious publishing programme in the fields of German and English literature classical philology and natural history Bohte's regular and prolonged trips to Germany to attend the Leipzig Easter Book Fairs reflected his ambition to become a major exporter of English books to the continent too In the words of one anonymous reviewer Bohte was considered a most spirited and most useful bookseller Although he died suddenly in London in 1824 aged only forty he left an important legacy in both London and Leipzig In his biography of J H Bohte *An Ocean of Literature* Graham Jefcoate has used a wide range of materials from collections in Britain Germany and elsewhere to illuminate the role of the book trade in the process of Anglo German exchange in the early nineteenth century

Quakers, Jews, and Science G. N. Cantor, 2005-09-22 This study examines how two minorities the Quaker and Anglo Jewish communities engaged with the sciences With their roots in the mid seventeenth century both communities maintained their religious and social norms throughout the eighteenth and nineteenth centuries while standing outside the hegemony of the Anglican Church and being subject to various forms of discrimination Yet for both Quakers and Jews science offered educational and career opportunities and participation in the wider society They adopted their own scientific interests with Quakers being attracted principally to the observational sciences Drawing on a wealth of documentary material much of which has not been analysed by previous historians Geoffrey Cantor charts the involvement of Quakers and Jews in many different aspects of science scientific research science education science related careers and scientific institutions ranging from the Royal Society to the Great Exhibition

BOOK JACKET *The Elusive Quest of the Spiritual Malcontent* Timothy C. F. Stunt, 2015-08-31 Timothy C F Stunt has gathered a range of his essays both published and unpublished in a collection of largely biographical studies His subjects range from discontented Quakers hesitating over their identity to respectable Anglicans who were fascinated with the charismatic phenomena of tongue speaking and healing Some of the characters with whom he is concerned can be described as mavericks on account of their strikingly individualist inclinations Occasionally their unpredictability takes on a quasi comic identity which could even qualify them to be described as loose cannons On the other hand some of them like Edward Irving Norris Groves and John Darby played a crucial part in the development of nineteenth century evangelicalism In their quest for the ideal church of their dreams they were often disappointed but one cannot but admire the single mindedness of their quest

Between Rhetoric and Reality Huibert J. Zuidervart, Rob H. van Gent, 2013 Felix Meritis the remarkable Temple of Enlightenment adorns the Amsterdam canals since 1788 The building accommodated the most ambitious attempt in the Netherlands for the integration of activities regarding literature music the visual arts commerce and the sciences What so far went unnoticed is

that from the very start Felix Meritis was also equipped with an astronomical and meteorological observatory In fact it was the first scientific observatory in the Netherlands designed from the drawing board This book describes the history of the observatory which functioned until 1889 with a special focus on the tensions between the objectives formulated by its founding fathers and the ultimate difficult practice of scientific research The Felix Meritis Observatory was crucial for the training and early careers of various eighteenth and nineteenth century astronomers among which Nieuwland Van Beeck Calkoen Moll Keijser Uylenbroek and Kaiser the father of modern Dutch astronomy Cover

British Weather and the Climate of Enlightenment Jan Golinski, 2010-11-15 Enlightenment inquiries into the weather sought to impose order on a force that had the power to alter human life and social conditions British Weather and the Climate of Enlightenment reveals how a new sense of the national climate emerged in the eighteenth century from the systematic recording of the weather and how it was deployed in discussions of the health and welfare of the population Enlightened intellectuals hailed climate's role in the development of civilization but acknowledged that human existence depended on natural forces that would never submit to rational control Reading the Enlightenment through the ideas beliefs and practices concerning the weather Jan Golinski aims to reshape our understanding of the movement and its legacy for modern environmental thinking With its combination of cultural history and the history of science British Weather and the Climate of Enlightenment counters the claim that Enlightenment progress set humans against nature instead revealing that intellectuals of the age drew characteristically modern conclusions about the inextricability of nature and culture

History of Meteorology Mladjen Ćurić, Vlado Spiridonov, 2023-11-27 This book provides a detailed history of meteorology as a natural science from an understanding of the Earth's early atmosphere to present day advancements In three parts the book synthesizes developments in quantitative meteorology starting from its very early stages and progressively covers the invention of basic meteorology instruments while highlighting the various turning points and key figures who played roles along the way The first part addresses the treatment of meteorology during early civilization Part two goes into the early development of meteorology as a science Part three covers the science's rapid progression and present day status while addressing the primary technologies and methodologies used in a variety of areas like weather forecasting remote sensing and radar instrumentation The target audience for the book is students and researchers interested in the history of meteorology as a science and also general enthusiasts of the subject who have some background on the topic
