Sam Francis Debra Burchett-Lere, Aneta Zebala, 2019 The next title in the respected *Artist's Materials* series offers groundbreaking analysis of

Sam Francis's working methods and materials American artist Sam Francis 1923-1994 brought vivid color and emotional intensity to Abstract Expressionism. He was described as the most sensuous and sensitive painter of his generation by former Guggenheim Museum director James Johnson Sweeney and curator Howard Fox called him one of the acknowledged masters of late modern art. Francis's works, whether intimate or monumental in scale, make indelible impressions; the intention of the artist was to make them felt as much as seen. At the age of twenty, Francis was hospitalized for spinal tuberculosis and spent three years virtually immobilized in a body cast. For physical therapy, he was given a set of watercolors, and as he described it, he painted his way back to life. The exuberant color and expression in his paintings celebrated his survival. His five-decade career was an energetic visual and theoretical exploration that took him around the world. Francis's idiosyncratic painting practices have long been the subject of speculation and debate among conservators and art historians. Presented here for the first time in this volume are the results of an in-depth scientific study of more than forty paintings from the late 1940s to early 1990s, which reveal new discoveries about his creative process, inventive techniques, and specially formulated paints and binders. The data provides a key to the complicated evolution of the artist's work and informs original art historical interpretations.

The World Book Encyclopedia, 1994. An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. See for Yourself! Vicki Cobb, 2010-10-06. With See For Yourself, budding scientists can wow their teachers and classmates and maybe win a ribbon or two by learning how to extract DNA from an onion, how pigments from vegetables make dye, how to make paper out of lint from a clothes dryer, how to make a friend feel like he or she has a third hand, what happens when you grow yeast in dandruff shampoo, that tea and iron pills make excellent inks, and much more. See for Yourself includes experiments in the areas of chemistry, earth science, physical science, the human body, and technology, but the experiments all take their inspiration from very familiar places. The materials needed to execute the experiments can all be inexpensively purchased at the supermarket, the toy store, the hardware store, the stationery store, and the drugstore. Some of the experiments are quick and easy, while others are more challenging. Most include additional suggestions so that curious young scientists can keep on investigating.

Consummate painter, draftsman, sculptor, and architect Michelangelo Buonarroti (1475-1564) was celebrated for his *disegno*, a term that embraces both drawing and conceptual design, which was considered in the Renaissance to be the foundation of all artistic disciplines. Bambach presents a comprehensive and engaging narrative of the artist's long career in Florence and Rome, beginning with his training under the painter Domenico Ghirlandaio and the sculptor Bertoldo and ending with his seventeen
