Browning .30-caliber Machine Guns Gordon L. Rottman, 2014-02-20 First adopted in 1917 the rugged and reliable Browning 30 caliber machine gun remained in US service into the Vietnam era and is still occasionally found in use elsewhere even today Produced in both water cooled and air cooled versions it has been employed in every imaginable role for a machine gun antipersonnel antiaircraft mounted on aircraft as both defensive and offensive armament defensive armament aboard vehicles armored and soft skin mounted on watercraft and others Employing gripping first hand testimony and featuring specially commissioned illustrations and detailed photographs many in color this lively study of the Browning 30 caliber machine gun reveals the origins combat history and legacy of this versatile and dependable weapon

Hotchkiss Machine Guns John Walter, 2019-11-28 Created by a long forgotten Austrian nobleman Adolf Odkolek von Augezd the air cooled Hotchkiss machine gun was the first to function effectively by tapping propellant gas from the bore as the gun fired Although the Hotchkiss would be overshadowed by the water cooled Maxim and Vickers Guns it proved its effectiveness during the Russo Japanese War The gun quirky though it was was successful enough to persuade Laurence Ben t and Henri Merci to develop the Mod le Portative a man portable version which it was hoped could move with infantrymen as they advanced Later mounted on tanks and aircraft it became the first automatic weapon to obtain a kill in aerial combat Though it served the French and US armies during World War I and also the British in areas where French and British units

fought alongside each other the Odkolek Hotchkiss system was to have its longest term effect in Japan Here a succession of derivatives found favour in theatres of operations in which water cooling could be more of a liability than an asset When US forces landed on Saipan Guam and Iwo Jima battling their way from island to island across the Pacific it was the Woodpecker the Type 92 Hotchkiss with its characteristically slow rate of fire which cut swathes through their ranks Supported by contemporary photographs and full colour illustrations this title explores the exciting and eventful history of the first successful gas operated machine gun **The World's Great Machine Guns** Roger Ford,2005 With the old of full color artworks detailed cutaways black white and color photographs and an authoritative text these gun books provide fascinating features of innumerable weapons Soviet Machine Guns of World War II Chris McNab,2022-02-17 This study looks at how the Soviet armed forces developed and deployed a range of machine guns that fitted with their offensive and defensive infantry tactics across six years of total war In 1939 three machine guns dominated the Red Army's front line infantry firepower the DShK 1938 heavy machine gun the PM M1910 medium heavy machine gun and the Degtyaryov DP 27 a lighter bipod mounted support weapon Confronted by cutting edge German technology during the Great Patriotic War 1941-45 the Soviets responded with the development of new weaponry including the RPD light machine gun the 7.62 54mmR SG43 medium machine gun and the improved version of the DP 27 the DPM Taken together all these weapons gave the Red Army a more practical range of support weapons better able to challenge the Germans for fire superiority on the battlefield Fully illustrated this study explains the technology and the tactics of these machine guns Noted authority Chris McNab sets out how these machine guns were distributed and tactically applied and provides numerous examples of the weapons in action from assault teams on the streets of Stalingrad to tank crews struggling for survival at Kursk The book also reflects upon the weapons post war service many of the machine guns remain in front line use today Illustrated with high quality photographs and specially commissioned artwork this is a deep analysis of these essential tools of warfare within the Soviet forces MG 34 and MG 42 Machine Guns Chris McNab,2012-10-20 With the MG 34 the German Wehrmacht introduced an entirely new concept in automatic firepower the general purpose machine gun GPMG In itself the MG 34 was an excellent weapon an air cooled recoil operated machine gun that could deliver killing firepower at ranges of more than 1 000m Yet simply by changing its mount and feed mechanism the operator could radically transform its function On its standard bipod it was a light machine gun ideal for infantry assaults on a tripod it could serve as a sustained fire medium machine gun During World War II the MG 34 was superseded by a new GPMG the MG 42 More efficient to manufacture and more robust it had a blistering 1 200rpm rate of fire Nicknamed Hitler's buzzsaw by Allied troops it was arguably the finest all round GPMG ever produced and alongside the MG 34 it inflicted heavy casualties Featuring specially commissioned full colour artwork and drawing upon numerous technical manuals and first hand accounts this study explores the technological development varied roles and lasting influence of the revolutionary MG 34 and MG 42 machine guns and their postwar successors **US Small**

Rottman, 2011-01-01 The Browning 50 cal has become the longest serving weapon in the US inventory The fifty has been employed in every imaginable role for a machine gun It is considered such an effective and reliable weapon that few countries ever attempted to develop an equivalent weapon Even the Japanese created a copy of it during World War II when the US was producing literally thousands every month to use in every theater This is a history of the development of this famous weapon its most critical operational use and the variants that have been produced to keep it at the forefront of the action

The M60 Machine Gun Kevin Dockery, 2012-11-20 The US M60 General Purpose Machine Gun known as the Pig was developed in the years after World War II from two revolutionary German designs Adopted in 1957 the M60 came into its own in the jungles hamlets and city streets of Southeast Asia during the Vietnam War Humping the Pig became common in US military squads with at least one soldier equipped with an M60 and every squad member carrying ammunition for it The M60 design transformed infantry tactics as squads took advantage of the immediate volume of fire offered by the design Although it has now been replaced by the M240 series of weapons in US infantry and mechanized units the M60 is still in common use with the US armed forces Meanwhile its iconic status has been assured by its frequent appearance in many popular films and television shows from Full Metal Jacket to The A Team Featuring specially commissioned full color artwork this is the full story of the M60 the innovative squad base of fire weapon that has equipped the US military from the jungles

of Vietnam to the deserts of Iraq **Machine Gun** Anthony Smith,2004-11-02 The machine gun is a uniquely American invention that revolutionized the way in which war was waged This first look in more than 30 years at its social and historical impact also profiles the inventors responsible for the creation of the weapon Martin s Press **The Browning Automatic Rifle** Robert R. Hodges Jr.,2012-04-20 For nearly fifty years the hard hitting mobile Browning Automatic Rifle or BAR served in US infantry units as a light squad automatic base of fire weapon providing quick bursts of concentrated fire Designed in World War One it didn t reach the front until September 1918 In the interwar years US forces used the BAR across the world from China to Nicaragua It also became a favorite of notorious gangsters like Clyde Barrow and Bonnie Parker who prized its ability to punch through police armored cars At the outset of World War II the US armed forces decided to adapt the BAR for a light machine gun role The BAR was not without its flaws it was heavy and difficult to dismantle and reassemble and it didn t cope well with sustained fire Nevertheless the BAR saw action in every major theater of World War II and went on to be used in Korea and in the opening stages of the Vietnam War Featuring arresting first hand accounts specially drawn full color artwork and close up photographs many in color this lively study offers a vivid portrait of this powerful long lived and innovative weapon that saw service with US and other forces across the world for much of the 20th century **MP 38 and MP 40 Submachine Guns** Alejandro de Quesada,2014-07-20 Nazi Germany s MP 38 and MP 40 submachine guns are among World War II s most recognizable weapons Portable and with folding stocks both were widely issued to airborne troops and became the hallmark of Germany s infantry section and platoon leaders A million were produced during the conflict and many found their ways into the hands of paramilitary and irregular forces from Israel to Vietnam after the war Featuring specially commissioned full color artwork and period and close up photographs this is the story of the origins combat use and lasting influence of two of World War II s most famous firearms **Machine Guns** Peter Chamberlain,Terry Gander,1974 [The Book of the Machine Gun 1917](#) Major F. V. Longstaff,A. Hilliard Atteridge,2012-03-28 This book is a very important text for any student of the development of the machine gun and contains details of the history of this weapon from its inception to the mid ppoint of the First World War The evolution of the machine gun is detailed followed by examples of the use of the wepon in war and particularly in the Russo Japanese War Tactics are examined in detail both from the historical point of view and tactics of the First World War an important part of the book Training is covered particularly from the British Army side and the relevant chapter has much of great value in it Perhaps the most important part of the book however is the examination of the machine guns of the armies then at war There is in addition a complete chapter on machine guns in the German Army which is of specific importance to any study of the tactics on the western front The book is illustrated with a series of good photographs and a number of line drawings of both early and current machine guns and there is also a large scale drawing of the Vickers gun *Machine Guns and the Great War* Paul Cornish,2009 The machine gun is one of the iconic weapons of the Great War indeed of the twentieth century Yet it is also one of the most

misunderstood During a four year war that generated an unprecedented number of casualties the machine gun stood out as a key weapon in the process taking on an almost legendary status that persists to the present day Paul Cornish in this authoritative and carefully considered study reconsiders the history of this extraordinary weapon and he describes in vivid detail the role it played throughout the war He also explores the symbolism of the machine gun and dispels the myths and misconceptions that have grown up around it He traces the early history of the weapon from Hiram Maxim s invention of the first true machine gun through pre war experiments with lighter automatic weapons culminating in the widespread use of light machine guns and even the first assault rifle during the war itself He argues that the Great War set the technological and tactical agenda for infantry firepower for the remainder of the twentieth century Jacket
