From the reviews of the hardcover edition This conference to celebrate the centennial of the birth of Escher resulted in an immensely interesting collection of articles Although Escher himself is no longer among us M C Escher s Legacy like a garden of continually blooming flowers allows us to appreciate his heritage anew Notices of the AMS April 2003 It is a handsome volume and contains articles from 41 people which cover a wide range of artistic and analytical endeavour A quick dip into each section produces small gems there is enough here to provide rich pickings for any interested party no matter what their particular discipline is Embedded in the various articles are even snippets which illuminate Escher s intentions and his relationships with his mathematician friends Even though short these are rewarding to read the CD ROM is an excellent addition to the book and contains much more material including video excerpts from some of the lectures Australian Math Soc GAZETTE May 2003

There is perhaps no better way to prepare for the scientific breakthroughs of tomorrow than to learn the language of geometry Brian Greene author of The Elegant Universe The word geometry brings to mind an array of mathematical images circles triangles the Pythagorean Theorem Yet geometry is so much more than shapes and numbers indeed it governs much of our lives from architecture and microchips to car design animated movies the molecules of food even our own body chemistry And as Siobhan Roberts elegantly conveys in The King of Infinite Space there can be no better guide to the majesty of geometry than Donald Coxeter perhaps the greatest geometer of the twentieth century Many of the greatest names in intellectual history Pythagoras Plato Archimedes Euclid were geometers and their creativity and achievements illuminate those of Coxeter revealing geometry to be a living ever evolving endeavor an intellectual adventure that has always been a building block of civilization Coxeter s special contributions his famed Coxeter groups and Coxeter diagrams have been called by other mathematicians tools as essential as numbers themselves but his greatest achievement was to almost single handedly preserve the tradition of classical geometry when it was under attack in a mathematical era that valued all things austere and rational Coxeter also inspired many outside the field of mathematics Artist M C Escher credited Coxeter with triggering his legendary Circle Limit patterns while futurist inventor Buckminster Fuller acknowledged that his famed geodesic dome owed much to Coxeter s vision The King of Infinite Space is an elegant portal into the fascinating arcane world of geometry M.C. Escher's Legacy

Doris Schattschneider, 2003 The CD ROM is an extension of the book It contains color versions of many of the art works that are shown in the book in black and white as well as additional work by the artists It gives vignettes of the conference animations short videos and interactive puzzles Page vii

To Infinity and Beyond Eli Maor, 2017-11-21 Eli Maor examines the role of infinity in mathematics and geometry and its cultural impact on the arts and sciences He evokes the profound intellectual impact the infinite has exercised on the human mind from the horror infiniti of the Greeks to the works of M C Escher from the ornamental designs of the Moslems to the sage Giordano Bruno whose belief in an infinite universe led to his death at the hands of the Inquisition But above all the book describes the mathematician's fascination with infinity a fascination mingled with puzzlement Maor explores the idea of infinity in mathematics and in art and argues that this is the point of contact between the two best exemplified by the work of the Dutch artist M C Escher six of whose works are shown here in beautiful color plates Los Angeles Times Eli Maor's enthusiasm for the topic carries the reader through a rich panorama Choice Fascinating and enjoyable places the ideas of infinity in a cultural context and shows how they have been espoused and molded by mathematics Science
