Habermas, Foucault and the Political-Legal Discussions in China Fan Yang, 2022-03-10 This book revisits the discourse theories of Habermas and Foucault in a Chinese context. After arguing that Habermas's Discourse Theory of Law and Democracy is too normative and idealistic it presents Foucault's Discourse Theory of Power Relations to illustrate the tensions between different Western discourse theories. The book then draws on the normative concept of Confucian Rationality from traditional Chinese cultural sources in order to investigate how adaptable these two discourse theories are to the Chinese society and to balance the tension between them. Presenting these three dimensions of discourse theory as well as the relations between them it also uses empirical descriptions of certain facts of political legal discussion both in traditional China and in the country's new media age to explain supplement and question this theoretic framework. The book asserts that because of the diverse modes of thinking in specific cultures there might be different normative paradigms of discourse and different political legal discussion modes across corresponding cultural contexts. Normative discourse theories provide guidance for the practices of deliberative democracy and legal discussions which can in turn verify supplement improve and challenge the normative discourse theories. In addition to demonstrating the multiple dimensions of discourse theories this research also promotes an approach to the Discourse Theory of Law and Democracy that combines elements of both Chinese and modern society.
