Echoing Events Tina van der Vlies, 2022-12-12 Echoing Events questions the perpetuation, actualization and canonization of national narratives in English and Dutch history textbooks, wide-reaching media that tendentially inspire a sense of meaning, memory and thus also identity. The longitudinal study begins in the 1920s when the League of Nations launched several initiatives to reduce strong nationalistic visions in textbooks and ends in the new millennium with the revival of national narratives in both countries. The analysis shows how and why textbook authors have narrated different histories which vary in terms of context, epoch and place as echoing events by using recurring plots and the same combinations of historical analogies. This innovative and original study thus investigates from a new angle the resistance of national narratives to change.

The Making of Man-midwifery Adrian Wilson, 1995 In England in the seventeenth century, childbirth was the province of women. The midwife ran the birth, helped by female gossips; men, including the doctors of the day, were excluded both from the delivery and from the subsequent month of lying-in. But in the eighteenth century, there emerged a new practitioner, the man-midwife, who acted in lieu of a midwife and delivered normal births. By the late eighteenth century, men-midwives had achieved a permanent place in the management of childbirth, especially in the most lucrative spheres of practice. Why did women desert the traditional midwife? How was it that a domain of female control and collective solidarity became instead a region of male medical practice? What had broken down the barrier that had formerly excluded the male practitioner from the management of birth? This confident and authoritative work explores and explains a remarkable transformation, a shift not just in medical practices but in gender relations. Exploring the sociocultural dimensions of childbirth, Wilson argues with great skill that it was not the desires of medical men but the choices of mothers that summoned man-midwifery into being.

The Industrial Revolution Pat Hudson, 2014-08-29 This is an introduction to the Industrial Revolution which offers an integrated account of the economic and social aspects of change during the period. Recent revisionist thinking has implied that fundamental change in economic, social and political life at the time of the Industrial Revolution was minimal or non-existent. The author challenges this interpretation, arguing that the process of revision has gone too far, emphasizing continuity at the expense of change and neglecting many historically unique features of the economy and society. Elements given short shrift in many current

interpretations are reassigned their central roles Slang and Its Analogues Past and Present John Stephen Farmer,1903

Bourgeois Life Nicholas Ridout,2020-06-22 *Scenes from Bourgeois Life* proposes that theatre spectatorship has made a significant contribution to the historical development of a distinctive bourgeois sensibility characterized by the cultivation of distance In Nicholas Ridout s formulation this distance is produced and maintained at two different scales First is the distance of the colonial relation not just in miles between Jamaica and London but also the social economic and psychological distances involved in that relation The second is the distance of spectatorship not only of the modern theatregoer as consumer but the larger and pervasive disposition to observe comment and sit in judgment which becomes characteristic of the bourgeois relation to the rest of the world This engagingly written study of history class and spectatorship offers compelling proof of why theater matters and demonstrates the importance of examining the question historically **How**
