Friedrich August Hayek

Prices And Production:

Prices and Production Friedrich August Hayek, 1935

Cost of Production and Price Over Long and Short Periods

Frank H. Knight, 2020-08-30 Great difficulties are met with in stating a clear and straightforward exposition of price theory because of the fact that the given conditions or data of the problem are so different according to the length of the time period which the explanation takes into account. The forces which immediately regulate prices are different from those which ultimately control and there are degrees or stages in both immediateness and ultimateness. The average student of economics is likely to be quite baffled by these distinctions and to get no clear ideas at all but he is still more baffled by differences in degree where distinctions are not sharply drawn and statements are left in the form of 'it depends'. This paper looks to the problem of exposition from the standpoint of the student rather than to the correction of errors in accepted doctrine but the course of the argument will have to note cases in which current phraseology is misleading to unwary readers if it does not represent fundamental misconceptions on the part of economists themselves.

Prices and Production Albrecht

Ritschl, 2012-12-06 My original intention in writing this book was to consider evolving market systems and Hayekian criteria of efficiency see von Hayek 1931 1945 and to discover those formal structures which might possibly lie at the base of economic systems capable of evolution. Much work in this field had already been done by others see for example Kirzner 1975 and Nelson Winter 1982 and a consensus seems to have been reached that something like system theory must be the logical point of departure for evolutionary theory in economics. But most of the previous work in this area is purely intuitive and though there is much talk in it of systems and system theory a precise definition of the concept of a system in this context is nowhere to be found. I had hoped to be able to sketch a working definition of pricing and production systems in a few pages and then to go on to investigate their performance within the framework of modern stability analysis. It soon became clear however that difficult and complex problems arise from the very outset of such an endeavor. If for example one speaks of dynamic systems of pricing and production it should be made clear just how these systems differ from those portrayed in standard price theory and why that theory is inadequate for such analysis.

Cost of Production and Price Over Long and Short Periods (Dodo Press) Frank H. Knight, 2008-12-01

Frank Hyneman Knight 1885 1972 was an important economist of the twentieth century. He obtained a B.S. and an M.A. the latter in German in 1913 at the University of Tennessee. He then moved to Cornell University for doctoral studies. His initial main subject was philosophy but he soon switched to economics. He studied with Alvin Johnson and Allyn Young who both supervised the work on his dissertation that was completed in 1916 under the title *Cost Value and Profit*. He would subsequently revise it for publication under its more familiar name *Risk Uncertainty and Profit* 1921. The famously opinionated Knight used his numerous book reviews in Chicago's *Journal of Political Economy* as a vehicle for his thoughts on many subjects. As a result he was embroiled in many debates with the most prominent economists of his day ranging over capital theory welfare theory Keynesian theory and positivist methodology. His

other works include *Cost of Production and Price Over Long and Short Periods* 1921 and *The Ethics of Competition* 1923
