Proceedings Of The Fourteenth National Conference:

Proceedings: Fourteenth Annual Convention of Rotary International, Good Parents, Better Homes, and Great Schools Karen Benjamin, 2025-07-15 Good Parents Better Homes and Great Schools examines how white residential developers planning consultants and their allies in government strategically replaced block level segregation with segregation at the neighborhood level in New South cities such as Atlanta Baltimore Birmingham Houston Raleigh and Winston Salem Going beyond the well known Home Owners Loan Corporation maps of the 1930s Karen Benjamin traces segregation tactics back to the late nineteenth century when this public private partnership laid the groundwork for the nationwide segregation strategies codified by the New Deal This book links the tactics of residential and school segregation to prevailing middle class ideas about what constitutes good parenting ensuring the longevity of both practices By focusing on efforts that specifically targeted parents Benjamin not only adds a new dimension to the history of residential segregation but also helps explain why that legacy has been so difficult to undo

Case-Based Reasoning Janet Kolodner, 2014-06-28 Case based reasoning is one of the fastest growing areas in the field of knowledge based systems and this book authored by a leader in the field is the first comprehensive text on the subject Case based reasoning systems are systems that store information about situations in their memory As new problems arise similar situations are searched out to help solve these problems Problems are understood and inferences are made by finding the closest cases in memory comparing and contrasting the problem with those cases making inferences based on those comparisons and asking questions when inferences can't be made This book presents the state of the art in case based reasoning The author synthesizes and analyzes a broad range of approaches with special emphasis on applying case based reasoning to complex real world problem solving tasks such as medical diagnosis design conflict resolution and planning The author's approach combines cognitive science and engineering and is based on analysis of both expert and common sense tasks Guidelines for building case based expert systems are provided such as how to represent knowledge in cases how to index cases for accessibility how to implement retrieval processes for efficiency and how to adapt old solutions to fit new situations This book is an excellent text for courses and tutorials on case based reasoning It is also a useful resource for

computer professionals and cognitive scientists interested in learning more about this fast growing field **Sketches of Thought** Vinod Goel,1995 Much of the cognitive lies beyond articulate discursive thought beyond the reach of current computational notions In Sketches of Thought Vinod Goel argues that the cognitive computational conception of the world requires our thought processes to be precise rigid discrete and unambiguous yet there are dense ambiguous and amorphous symbol systems like sketching painting and poetry found in the arts and much of everyday discourse that have an important non trivial place in cognition Goel maintains that while on occasion our thoughts do conform to the current computational theory of mind they often are indeed must be vague fluid ambiguous and amorphous He argues that if cognitive science takes the classical computational story seriously it must deny or ignore these processes or at least relegate them to the realm of the nonmental Along the way Goel makes a number of significant and controversial interim points He shows that there is a principled distinction between design and nondesign problems that there are standard stages in the solution of design problems that these stages correlate with the use of different types of external symbol systems that these symbol systems are usefully individuated in Nelson Goodman s syntactic and semantic terms and that different cognitive processes are facilitated by different types of symbol systems *Technology for Large Space Systems* ,1983 **Sport Fishery Abstracts** ,1962
