

Radical Surgery

- The theoretical basis for radical surgery is that if you remove both the primary tumor and the seeds of metastasis in the adjacent lymph nodes, there should be a better chance of curing the disease.
- The most frequently used radical operation is radical mastectomy: the removal of the breast and a large amount of adjacent tissue including the largest chest muscle and the lymph nodes in the arm pit (axillary lymph nodes).
- This eighty-year old operation is the treatment of choice for "curable" breast cancer, regardless of the type, location or stage of invasion.

Radical Surgery:

The History of the Brain and Mind Sciences Stephen T. Casper, Delia Gavrus, 2017 This history explores the exceptionally complex scientific and medical techniques and practices that have allowed practitioners to claim expertise in the brain and mind sciences over the past two centuries Based on meticulous historical research essays in this volume reveal the richness of the history of the brain and mind sciences and show that this history cannot be reduced to an uncomplicated narrative of progressive discovery Rather the volume contributors collectively contend that it is in the seemingly obscure peripheral and marginal stories of the past that the medicine and science of the brain and the mind took shape

Dealing with Doctors, Denial, and Death Aroop Mangalik, 2017-01-13 Often when death is the inevitable and

impending outcome of a health diagnosis doctors are reluctant to discuss alternatives to treatment feeding into a culture of denial that can result in expensive ineffective and unnecessary over treatment that may or may not extend life but almost always damages the quality of life Here a seasoned doctor and researcher looks at the ways in which we are accustomed to treating illness at all costs even at the expense of the quality of a patient s life He considers our culture of denial the medical profession s role in over treating patients and end of life care and the patient s options and role in these decisions The goal is to help patients and families make informed decisions that may help the seriously ill live better with their illnesses This profoundly empowering book will help people make informed decisions about their lives and medical care especially those who have a life threatening or life changing illness themselves or have a family member living with one Incorporating specific questions for patients to ask their doctors and discuss with their families the book provides an analysis of various forces that influence our decision making The book also examines the professional psychological economic and social pressures that influence physicians treating seriously ill patients including those that lead doctors to recommend treatments that may be futile The book concludes with resources that seriously ill patients and their families can call upon to give them support and assist with the logistical emotional and spiritual challenges of end of life care
