Radikale Marktwirtschaft:

The New St. Gallen Management Model Johannes Rüegg-Stürm, 2004-12-07 First published in German this book starts from the premise that managers' understanding and theories of organizations determine how they decide to act. It therefore scrutinises management's basic tasks and examines the most important concepts of management science, prompting questions for a company's health check. The management tasks and scientific concepts are presented on the basis of an integrated framework which allows the reader to easily recognize their interdependencies and interlinkages.

Sociology of the Business Family Heiko Kleve, Tobias Koellner, 2023-09-19 The entrepreneurial family has hardly been a topic of family sociology so far. Precisely because more than two thirds of all companies are family run, it is surprising that sociology has not yet discovered the entrepreneurial family as a field of research. With this book, it is made the content of systematic family sociological reflections. A central point of departure for theorizing and research on entrepreneurial families is that this form of family has to deal with special social challenges because it structurally combines mixes and couples two social spheres that are generally pulled apart in the course of the modernization of society: namely families as part of the private life world and companies as the formal organization of the economic system. This book is a translation of an original German edition. The translation was done with the help of artificial intelligence machine translation by the service DeepL.com. A subsequent human revision was also carried out by the authors and a native speaker.

Facilitation Skills Stefan Gross, 2023-02-27 This book provides a compact and well founded set of facilitation skills for all who want to successfully lead meetings, workshops or project rounds. In this way, it is possible to guide the respective communication process to results in a focused, effective and efficient manner, whether online or face to face. Stefan Gross shows how guiding questions, methodical impulses, differentiated perception, a clear attitude and specific formats of participation help to achieve sustainable and smart results in groups. This practical book provides a contemporary handout for the many challenges facing dynamic facilitation.

Kai Beiderwellen, Mannheim University of Applied Sciences. The book is an invitation to deepen and reflexively develop one's own role.

Wolfgang Widulle, Socialnet.de. *De Gruyter Handbook of Business Families* Michael Carney, Marleen Dieleman, 2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non-family firms on which most of our current management theories are based. The De Gruyter Handbook of Business Families brings together work from leading academics who explore emerging research themes relevant to business families, particularly drawing in new insights from adjacent disciplines that can advance the family business field. The handbook challenges the traditional notion of the single firm/single family that has characterized most early research on family business. Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non-financial assets, this handbook focuses on business families rather than the narrower construct of family business. The contributions in this handbook explore the

relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate level students in the area of business families

Organizational Design in a Complex and Unstable World Jens O. Meissner, Michael Heike, Daniel Sigris, 2024-09-02 Organizations of all kinds create a sense of purpose and sometimes incomparable performance that individuals cannot achieve alone This textbook examines the developments and changes that organizations should make in order to be successful in today's complex organizational environment The authors explain various models and concepts of organizational design highlight the important role played by agile management and self organization and reflect on the consequences these concepts have for practical organizational work The necessary organizational development can only be meaningfully and successfully implemented with consideration of the existing corporate culture and knowledge of the fundamentals of knowledge management so these are also taught in the textbook The overarching goal of organizational design is to promote the organization's resilience to crises After laying the foundations for this the penultimate chapter is dedicated to the aspect of resilience followed by an outlook for the future The didactic structure of the textbook includes learning objectives practical examples and case studies as well as learning comprehension questions and the opportunity to test your own knowledge with the Springer Nature Flashcards This textbook has been recommended and developed for university courses in Germany Austria and Switzerland

System-Theoretical Urban Development Manfred Rolfes, Jan Lorenz Wilhelm, 2024-02-26 In their book the authors introduce the topic of urban development from a systems theoretical perspective and provide explanatory approaches tips and methodological instructions for dealing with urban complexity Knowing full well that this sometimes amounts to squaring the circle the authors draw on applied systemic approaches and systematically couple these with epistemological currents that can be assigned to Luhmann's systems theory The social understanding of this theory of social systems represents a very good starting point for understanding urban development and urban complexity From this perspective urban development can be seen as a process in which organisations and individuals with their own expectations and perspectives are involved in which contradictions and conflicts seem inevitable and the future cannot be clearly predicted Decisions in cities and municipalities are therefore always associated with risks irritations and unexpected consequences With the Potsdam lodestar approach Rolfes and Wilhelm present a multidimensional approach to managing urban development processes The approach distinguishes five process dimensions which are presented chapter by chapter and linked with recommendations The individual chapters are structured along guiding questions and feature appealing visualizations and numerous bonus materials

Die Steuervergünstigung Georg Jochum, 2006 *Managing Business Family Dynasties* Tom A. Rüsen, Heiko

Kleve, Arist von Schlippe, 2021-10-15 This book deals with dynastic business families. Such families are characterized by a circle of owners comprising more than 50 family members which typically face specific issues and challenges for which there has been little research knowledge and practical approaches until now. The book presents results and findings from a special research project on big family management where 7 representatives of dynastic families from Germany were studied over a 3 year period. The result was the identification of six topic areas that management in these business families has to deal with. At the same time the study observes that dynastic business families hardly follow the logic of classic families anymore but can rather be understood as networks with common family backgrounds. The study also reveals that a large number of business families are heading for large shareholder groups due to changed inheritance practices. The contents outlined here provide an orientation framework for the growing business family.

Nach seiner Systemischen Organisationsanalyse liefert der Autor nun die Ergänzung. Auf dem Weg zur sozialen und kologischen Weltgesellschaft ist die Wirtschaft ein Schlüsselfaktor. Hier wird diese Perspektive anhand von zehn dynamischen Mustern zur Wirtschaftsanalyse beschrieben. Karriereverläufe von Frauen und Männern in der Altenpflege Manfred Borutta, Christiane Giesler, 2007-11-06
Altenpflege ist ein klassisches Berufsfeld für Frauen Daher sollte es im Gegensatz zu männerdominierten Bereichen selbstverständlich sein dass in geschäftsführenden und leitenden Positionen vorwiegend Frauen tätig sind Aber weit gefehlt Die Führungspositionen sind in der Altenpflege weitgehend von Männern besetzt deren Qualifikation noch dazu oft fragwürdig ist Anders als für Frauen besteht für Männer in der Pflege die Möglichkeit ohne formelle Qualifikation in berufliche Positionen aufzusteigen die im Hinblick auf Routinen Menschenführung und Zukunftssicherung der lokalen Organisationen hohe Anforderungen stellen Warum gelingt es Männern offenbar in der Pflege schneller Karriere zu machen als Frauen Streben Frauen Leitungspositionen nicht an oder gibt es andere Hinderungsgründe Auf der Basis empirischer Daten untersuchen Manfred Borutta und Christiane Giesler diese Fragen aus sozialpsychologischer und systemtheoretischer Perspektive
