This account is reproduced here in its entirety along with a detailed appendix containing the official historical record of Bomber Command aircrews and aircraft engaged in clandestine operations. Taken together, this book represents the most comprehensive account of the RAF's support for SOE ever published. *RAF Fighter Command* Ron Mackay, 2019-11-03

Royal Air Force Fighter Command's brief was to provide an effective aerial barrier to any attempt at domination of British skies. The aircraft and technical resources on hand between 1936 and WWII's initiation were thankfully improved to a level that was barely sufficient to withstand the hitherto unchallengeable Luftwaffe's advance across Western Europe. Between 1940 and 1942 the Command generally found itself on the back foot in terms of overall success. The introduction of aircraft designs that would change the situation, however costly in its ultimate favour, featured prominently from the mid-point of WWII. The Luftwaffe found itself being challenged and regularly bested round the clock by the advent of D-Day. The Command's efforts had materially contributed to the Allied on-surge that had placed its adversary on a permanent downward spiral towards total extinction. **RAF Bomber Command at War** Rupert Matthews, 2009

Bomber Command of the RAF fought one of the longest, most grueling and thankless campaigns of World War II. More than 55,000 men and women were killed serving with the Command, and the bombers inflicted severe and ultimately crippling damage to the German war effort. During the war years, few branches of the armed services ranked higher with the public than did Bomber Command. This powerful book takes a new look at the exploits of the RAF's strike force during World War II. By looking at the conflict from the viewpoint of those serving in Bomber Command, this book reveals the why and the how of the Bomber Command campaigns. The abilities of the aircraft and aircrew are outlined, and the limits this put on operations explained. The book will help the reader understand the conditions under which the men of Bomber Command fought, lived, and tragically so often died.

Historically rich in detail with previously unpublished photographs from private archives. Researched and written by an aviation and military historian, renowned author, essential for military historians, modellers, flight sim enthusiasts, War Thunder, IL-2 Sturmovik, Great Battles, and DCS, and those interested in the complexities of aircraft design and production during the Second World War. They sowed the wind and now they are going to reap the whirlwind. Arthur Bomber Harris: The concept of an aerial campaign on a nation's industrial and military might was advocated by Britain before the start of the First World War, however a stringent post-war economy ensured that the creation of Bomber Command in 1936 witnessed a daunting disparity between the aim of striking at an adversary's ability to sustain itself and the means to do so. From 1939 to 1942 Bomber Command was very weak in terms of human and material losses. The navigational means with which to accurately guide bombers to targets was almost completely lacking while the enemy

defensive network inflicted serious casualties. Consequently the punishment handed out was minimal. The resurgence of Bomber Command's fortunes coincided with the appointment of Sir Arthur Harris. The advent of four engine designs such as the Avro Lancaster and Handley Page Halifax ensured that a greatly increased bomb tonnage could be delivered. Also electronic aids such as Gee, Oboe and H2S simplified the task in finding targets. Therefore by 1944-1945 the RAF's bombers pulverised Hitler's Third Reich. Although flak and night fighters took a heavy toll on the bombers, the RAF's nocturnal offensive in conjunction with the USAAF's daylight assaults crippled Germany's ability to fight back.

Bomber Command: Reflections of War, Volume 1 Martin W. Bowman, 2011-12-01. This massive work provides a comprehensive insight to the experiences of Bomber Command's pilots and aircrew throughout WWII. From the early wartime years when the RAF's first attempts to avenge Germany's onslaught were bedeviled by poor navigation and inaccurate bombing to the last winning onslaught that finally tamed Hitler in his Berlin lair, these volumes trace the true experiences of the men who flew the bombers. Hundreds of firsthand accounts are punctuated by the author's background information that puts each narrative into wartime perspective. Every aspect of Bomber Command's operational duties are covered: day and night bombing, precision low level strikes, mass raids and operations throughout all wartime theaters. Contributions are from RAF personnel who flew the Command's different aircraft from the early Blenheims and Stirlings to the later Lancasters and Mosquitoes. Each volume is full of accounts that tell of the camaraderie amongst the crews, moments of sheer terror and the stoic humor that provided the critical bond. The five volumes of this work provide the most vivid and comprehensive work on the outstanding part played by RAF Bomber Command and their vital role in the destruction of the Third Reich.
