Air Power Supremo William Pyke, 2022-04-13 Sir John Slessor was one of the twentieth century's most distinguished wartime commanders and incisive military thinkers and William Pyke's comprehensive new biography reveals how he earned this remarkable reputation Slessor a polio victim who always walked with a stick became a First World War pilot in the Sudan and on the Western Front and a squadron and wing commander in India between the wars When aerial warfare was still a new concept he was one of the first to develop practical tactics and strategies in its application In the Second World War as the Commander in Chief of Coastal Command during the Battle of the Atlantic and the RAF in the Mediterranean during the Italian and Balkan campaigns he made a remarkable contribution to the success of Allied air power Then after the war as a senior commander he established himself as one of the foremost experts on strategic bombing and nuclear deterrence That is why this insightful biography of a great British airman and his achievements is so timely and important as we enter a new era of strategic doubts and deterrence at the beginning of the twenty first century William Pyke follows each stage of Slessor's brilliant career as a pilot and commander in vivid detail In particular he concentrates on Slessor's writings from his treatise on the application of air power in support of land armies to his thinking on nuclear deterrence and Western strategy

Heroic Flights John Frayn Turner, 2003-12-19 A century after the Wright Brothers first took to the air the author records those moments of aviation history that stand out from all the others for their pioneering bravery or gallantry in the face of the enemy A fascinating potpourri embracing the whole story of aviation from those first faltering flights through the conquest of the world by flight the drama of war in the air right up to the present day and the four ill fated flights of September 11th 2001 Each story is a superb description of the great moments in the history of aviation A superb read for both the layman and aviation specialist alike

A Yankee Ace in the RAF Bogart Rogers, 1996 Bogart Rogers's lively style is ideal for relating the adventures of a young man caught up in the world's first air war This is a deft and vivid portrait of life in the cockpit Lee Kennett author of *The First Air War 1914-1918* Rogers's letters chronicle his maturation in the terrible crucible of the air war David F Trask author of *The AEF and Coalition Warmaking 1917-1918*

The Birth of the Royal Air Force Ian M. Philpott, 2013-12-09 Ian Philpott presents us here with a compendium of facts operational histories and photo illustrations combined to create a comprehensive account of the early years of the Royal Air Force Illustrated throughout it features details of all military operations from 1914 to 1918 which impacted upon the organisation Also included are operational details of the Independent Bomber Force throughout 1918 a supplementary historical strand that is sure to appeal to Aviation enthusiasts with a taste for features of niche focus Details

of the airfields landing grounds seaplane bases and various other landmarks of this era are given and readers are encouraged to use the work as a reference book being as it is a weighty tome of encyclopedic scope Sure to make a welcome addition to any aviation enthusiasts library this well researched piece of work has been a long time in the making Philpott brings his typical flare to the project leaving no stone unturned when it comes to this dynamic defining period of Royal Air Force history As featured in the East Kent Mercury and Essence Magazine Australian-built Aircraft and the Industry Keith Raymond Meggs,2009 An encyclopaedic four volume work on every aircraft type proposed designed or manufactured in Australia from Lawrence Hargrave s experiments in the 1880 s through to the authors self imposed cutoff point in the mid 1980 s The four volume work lists over 540 aircraft types as well as detailed histories of the companies involved in their construction Coverage is multi faceted being technical operational historical industrial and political Along with the text is the most comprehensive collection of photographs technical drawings and diagrams yet assembled into the one reference work many of which have never before been seen outside the original source Exhaustively researched over the past 40 years by the well known aviation personality Keith Meggs a man uniquely placed to write on all aspects of Australian aviation from construction through to operational flight All volumes are superbly indexed and cross referenced with the main text reinforced by extensive and detailed endnotes Aircraft enthusiasts pilots aeronautical engineers manufacturers industrialists universities and other technical institutions Australian built aircraft and the industry is a must have for your reference library In Volume One the fourteen chapters cover the following activities Hargrave Taylor the Commonwealth Prize Early Experimenters Duigan WWI Activity AA ECo 1924 Lightplane Competition LASCo QANTAS WAA RAAF Randwick Individual Builders 1918 1939 AMSCo MSB Matthews Aviation General Aircraft Co Cockatoo Dockyard Tugan Aircraft Harkness Hillier De Havilland Aust part 1 Industry proposals and other snippets Provided by publisher **The Royal Air Force: The Trenchard Years, 1918-1929** Ian M. Philpott,2005-07-19 The inter war years between 1918 and 1939 saw the newly created Royal Air Force fighting for its very existence politically being dispatched to the remotest corners of the British Empire and its Protectorates in various policing roles and then finally engaged in a headlong rush to modernize in the face of the new German Fascist regime that was threatening British and European freedom Yet this important period in RAF history and its effect on political and military rationale during the period has never been completely documented This exhaustive and comprehensive reference is the most detailed work to be published on the subject The author gives full information on the changing structure of the Force during the period squadron operations political machinations and their effects the airplanes and their equipment the personnel technical advances in navigation and breakthroughs achieved in engine performance The book is cross referenced throughout extremely well illustrated and contains an abundance of location maps and other diagrams This book will become a Bible for anyone interested in the history of the RAF This work has been reviewed by personnel at the RAF Historical Branch who praise it **Aircraft** ,1971 **Fall of the Red Baron** Leon

Bennett, 2012-02-19 Fighter pilot Manfred von Richthofen the Red Baron lacked innate aerobatic ability As a tyro he attempted to solve this problem through denial going so far as to sneer at stunting as pointless Great War air combat experience proved quite the reverse and so we would anticipate a short and sad fighting life for the fellow Yet the Red Baron became the Great War's single greatest scorer as measured by total victories How did he do it This book is concerned with tactics especially those tactics used by the Red Baron and his opponents It offers the how and why of Great War aerial combat The author leans heavily on his expertise in engineering and aerodynamic techniques to explain this with his reasoning presented in a readable non mathematical style Absent are both the usual propaganda laced Air Service reports and psychobabble Offered instead is the logic behind Great War aerial combat i e those elements determining success or failure in the Red Baron's air war Gunnery experience led to the machine gun as the weapon best suited for aerial combat Joined with a suitable aircraft the extremely successful Fokker diving attack resulted In reaction effective defensive techniques arose using forms of shrewd tactical cooperation by two seater crews pilot and gunner These are detailed Numbers mattered establishing the level of assault firepower Tactics of machines flying together in formation are given as well as those of formation busters intent upon reversing the odds and turning large numbers into a disadvantage A pilot's nature and emotions had much to do with choosing between the options defining tactics What were the aces like How were tactics tailored to suit personality What traits made for the ability to grapple with a jammed machine gun A dozen high achievers are examined in terms of tactics and background In a fascinating study Leon Bennett covers all of these aspects of WWI aerial combat and more Similarly the author turns his attention to examining the cause of von Richthofen's death employing the tools of logic rather than merely accepting one of the many conflicting eyewitness reports as truth In doing so much testimony is exposed as unlikely The bullet scatter to be expected from ground anti aircraft fire matters greatly and is developed along with the odds against lone riflemen hoping to hit a fast moving low altitude target The most dangerous altitude for front line crossing is established The author concludes by rating the possibility of a rifleman downing the Red Baron as quite realistic certainly as likely as any of the more celebrated possibilities This is an important book offering a groundbreaking account of WWI aerial tactics and a thorough examination of the final combat and death of the Red Baron

Airco Mick Davis, 2001 In the years prior to World War I George Holt Thomas was an active supporter of aviation development and a promoter of its military potential The pace of development saw him employing a young and talented aircraft designer by the name of Geoffrey de Havilland and the aircraft they produced went on to make history **Aviation and Aeronautical Engineering**, 1919 *Aeronautics*, 1949 **The Sky With Diamonds** Malcolm Macdonald, 2013-10-10 It is the 1920s an age of innovation and daring in transportation both on the road and in the air At the forefront of motor car development is Somerville's to own a Somerville bodied Rolls Royce is every man's dream But when George Somerville has an accident that leaves him paralysed the future of the firm looks uncertain George has no sons old enough to manage the firm

He does however have a wife Defying general skepticism and her own doubts Julia gradually takes control warding off takeover attempts with breathtaking skill and cunning In Eliot Baring an American employee and a brilliant airplane engineer she sees a new future for Somerville s and perhaps for herself Together they take Somerville s into the skies where competition is fierce and enemies common But the skies darken as fascism spreads across Europe and Julia s conscience becomes ever more important in Somerville s future Beset on all sides deserted by her colleagues and lovers her future looks bleak until help comes from the most unexpected quarter *Bomber Command 1939-1940* Gordon Thorburn,2013-09-16

For Bomber Command the term Phoney War never really meant much Five Blenheims of 107 Squadron were among the blood and bullets the day after war was declared and only one came back On 14 December 1939 in a disastrous raid on shipping 99 Squadron lost six Wellingtons with only three survivors out of thirty six crew Even worse in the biggest air battle so far 18 December Wilhelmshaven five Wellingtons of 9 Squadron went down four of 37 Squadron and two of 149 Squadron Bomber Command lost sixty eight aircraft and crews in action in the four war months of 1939 and a further seventy eight in accidents In the months up to the French surrender losses rose spectacularly as the Germans triumphed wherever they went In a few hours on 14 May resisting the Blitzkrieg forty seven Fairey Battles and Bristol Blenheims were shot from the sky Through the Scandinavian defence in France and Belgium at Dunkirk and at last over Germany for Bomber Command there was no Phoney War It was real war from the start *Lost Voices of The Royal Air Force* Max Arthur,2012-02-16 Max Arthur bestselling author of FORGOTTEN VOICES THE GREAT WAR presents this moving collection of first hand accounts of life in the Royal Air Force from 1918 to the present day LOST VOICES OF THE ROYAL AIR FORCE records the role of the RAF in World War II and particularly the Battle of Britain and the desert battles of North Africa as well as in the Falklands and in the Gulf War Through original interviews with air and ground crew the spirit and comradeship the stress courage isolation vulnerability and the wonder of the wartime flying experience is vividly explored *1940* Mitch Peeke,2015-05-31

The story of one momentous year in World War II The epic story of 1940 is not confined to the great air battle over England that summer the Battle of Britain While that battle was indeed a major turning point in the course of the Second World War it was only fought because of the ultimate outcome of the battle that preceded it When Hitler s forces swiftly overran the Low Countries and then France the remnants of the French and British armies were trapped in a pocketed position around the channel port of Dunquerque Militarily that should have been the end of it Trapped with their backs to the sea the tired soldiers surely faced annihilation or capture Hitler s generals certainly thought so But then Hitler made his first and biggest mistake He listened to his old friend and commander of the German Air Force Herman Goering Instead of allowing his armies to finish the job he ordered them to halt Goering had persuaded his Fuhrer to allow his Air Force to finish it instead Goering failed giving the British time to evacuate the stranded armies from Dunquerque The Battle of France was over but there would have to be a Battle of Britain as Britain would now have to be eliminated as well either by diplomacy which wasn t likely or by

invasion This was the prospect facing those in England at that time and this is the story of that momentous year Reckless Fellows Edward Bujak, 2015-09-25 The Royal Flying Corps later the Royal Air Force was formed in 1912 and went to war in 1914 where it played a vital role in reconnaissance supporting the British Expeditionary Force as air cavalry and also in combat establishing air superiority over the Imperial German Air Force Edward Bujak here combines the history of the air war including details of strategy tactics technical issues and combat with a social and cultural history The RFC was originally dominated by the landed elite in Lloyd George's phrase from the stateliest houses in England and its pilots were regarded as knights of the air Harlaxton Manor in Lincolnshire seat of landed gentry became their major training base Bujak shows how within the circle of the RFC the class divide and unconscious superiority of Edwardian Britain disappeared absorbed by common purpose technical expertise and by an influx of pilots from Canada Australia New Zealand and South Africa He thus provides an original and unusual take on the air war in World War I combining military social and cultural history

Elephant Island and Beyond John Thomson, 2003 The aristocracy of Antarctic exploration does not include the name of Thomas Orde Lees He came away from Shackleton's 1914 expedition with the reputation of being the least popular and most criticised of the men involved in the Endurance adventure in the Weddell Sea Not only was he disliked simply for being himself but he was also expected to become the first victim of cannibalism if the 22 men of Elephant Island had run out of food Previous accounts of Shackleton's adventure have unfailingly mentioned that Orde Lees was unpopular Though they have plundered his excellent journal for much of the detail of life on board the Endurance on the pack ice and finally on Elephant Island the part he played in keeping the men alive has not been recognised His journal has surprisingly never been published and this book is a long overdue testament to a much misunderstood and probably unfairly maligned man After his rescue from Elephant Island Orde Lees campaigned vigorously for the use of parachutes in the newly formed Royal Air Force and he was publicly credited with being the primary advocate Many pilots owe their lives to his faith in this new invention He went on to perform more service for his country in Japan and spent the final period of his life in New Zealand
