Raft Fisherman Tradition Change In Th:

The Raft Fishermen Shepard Forman, 1970 An American anthropologist's report on extensive fieldwork in the village of Coqueiral in northeastern Brazil where he conducted an economic and sociological investigation of the traditional raft fishing economy. By examining the social structural and ecological aspects of the local fishing industry, Shepard Forman sought to uncover the reasons for the fishermen's resistance to new technology and their persistent use of traditional fishing methods. His study of social behavior in the fishing community bears on certain widespread hypotheses about so-called peasant conservatism and assumptions about resistance to change in traditional societies. Through his study of the structure of village life, Forman discovered that power is concentrated in the hands of a few local entrepreneurs who alone have sufficient capital gained through enterprises other than fishing to introduce new equipment into the fishing industry. This elite group is unwilling to spend money on technological innovations that do not directly improve their standing in the village. The fishermen, on the other hand, are prevented from introducing such improvements by complex political and economic factors. Forman draws a sympathetic portrait of the fishermen, describing decision making in peasant households, the system of credit and savings, and the complex organization of economic life at the local level. Foremost among the conclusions he draws is that it is the fisherman's search for security rather than a distaste for cooperation or a lack of initiative that leads him to reject innovation. On the basis of his study, Forman maintains that the obstacles to change in traditional peasant societies are ecological and socioeconomic rather than psychological. He suggests that it is time we ceased to justify the immobilizing effects of poverty in such societies by attributing them to certain misconceptions about peasant behavior. His conclusions concerning barriers to change are wide-ranging and their implications for all social scientists are significant indeed.

Management Systems for Riverine Fisheries Thayer Scudder, Thomas Connelly, 1985-01-01 This paper is concerned specifically with the problems of river fisheries and associated management issues. It deals in particular with the scope for building on traditional practices through the participation of traditional fishing communities as a means of improving the quality of river fishery management. The paper reviews the most frequently encountered problems of riverine fisheries such as over fishing due to population pressure or migration and artificially induced environmental factors such as dams, pollution, and deforestation. It lays stress on the importance of studying fishing communities as well as strictly biological factors and presents a four-stage analysis of the evolution of traditional riverine fisheries. Several undesirable consequences of this typical evolution, both on the resource itself and on traditional fishing communities, are identified and illustrated by case studies from the Amazon and the Zambesi. Certain types of traditional

management strategies are examined and assessed for their future utility The current ineffectiveness of many existing government river fisheries management policies is noted either as a result of lack of resources or because they are inappropriate often rooted in outdated colonial legislation The lack of both limited access measures and of participation by local fishing communities are highlighted as major deficiencies The paper concludes by linking these two features as crucial components of durable river management strategies for the future although other possibilities for management are also reviewed and assessed The paper contains a comprehensive bibliography for further reading

Caye Caulker Anne Sutherland, 2019-09-10 First published in 1986 In the last decade the island of Caye Caulker was transformed from a subsistence fishing village into an affluent enclave within a poor Caribbean country This ethnographic study of the island recounts the economic success story of Caye Caulker attributing the island's relative prosperity to several key features the reorganization of the lobster fishing industry into producer cooperatives the limiting and controlling of tourism and the maintenance of sociocultural institutions that historically have created strong family networks and encouraged autonomy and self sufficiency Dr Sutherland's unusual case study of positive development without external assistance makes a valuable contribution to our understanding of Third World development in general and local development in particular

Prophetic Sons and Daughters Deborah M. Valenze, 1985-12-01 In a study important to the fields of women's studies and English literature as well as to the religious and social history of Britain Deborah Valenze argues the significance of a cottage based evangelicalism that responded to the transformation of England in the nineteenth century She goes beyond previous treatments of popular religion by offering a glimpse into the lives of humble people for whom a domestic form of religion became the focal point of daily activity In addition she opens up a hitherto unknown aspect of the history of nineteenth century women by demonstrating the importance of working class female preachers vigorous ministers who risked their physical well being and reputations by traveling widely on their own and speaking publicly to audiences of both sexes Using local histories memoirs and the history of Methodist sectarianism to explore conditions confronted by evangelicals Dr Valenze concludes that cottage religion provided the basis for domestic and spiritual ideals of laboring families during a period of tremendous upheaval She shows how this ideology enabled women to challenge the institutions and values of industrial society and to exercise their power in both private and public spheres Originally published in 1985 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Logic of Poverty Simon Mitchell, 2024-05-01 First published in 1981 *The Logic of Poverty* consists of eight essays that share at least one assumption that Northeast Brazil provides a startling example of inhumane economic development The contributors have all worked in the area and know it at first hand They look at rural structure and the role of the unemployed reserve army the state of the sugar industry the ineffectiveness of the irrigation schemes the stagnation in the fishing sector the lack of credit available to peasants and the role of SUDENE the first development agency in the region Together they paint a picture of poverty and of the factors that allow it to continue and they place that poverty in the context of the wider economy of Brazil relating it to the extraordinary transformation that has been called the Brazilian miracle This book will be of interest to students of geography anthropology economics and sociology

Crisis in the World's Fisheries James R. McGoodwin, 1995-02-01 For over twenty years an alarming trend has emerged in the world s fisheries there are too many

fishers chasing too few fish This book provides a broad overview and fundamental reassessment of fisheries management policies around the world *The Amazon Rubber Boom, 1850-1920* Barbara Weinstein,1983-06-01 The first complete account of the rise and fall of the rubber economy in Brazil provides a dramatic example of one of the boom and bust cycles traditionally associated with Brazilian economic history The Amazon rubber trade was one of the most important export booms in the history of Latin America dominating the economic life of the Amazon for 70 years until the successful cultivation of rubber trees by the British in Southeast Asia Yet this long period of vigorous economic activity left the basic structure of Amazonian society relatively unchanged One of the author s main concerns is to explore why rubber exports did not generate substantial growth in either the industrial or the agricultural sector and she finds the answers primarily in the relations of production and exchange that characterized the Amazon s extractive economy The study also considers the impact of political decentralization and regionalism on the Amazonian economy draws comparisons with the coffee boom in Sao Paulo that induced sustained industrial growth in that area and traces the consequences of the rubber economy s collapse on the social political and economic life in the Amazon **The Fishing Culture of the World** Béla Gunda,1984 **External Research List** ,1967 *Research on the American Republics* ,1963 **Perspectives in Cultural Anthropology** Herbert A. Applebaum,1987-01-01 Designed as a reader for courses this anthology presents an array of theories and interpretations in the field of modern cultural anthropology It provides a deeper understanding of the major theoretical orientations which have historically guided and currently guide anthropological research
