SEPTEMBER, 1956

I.—CHEMICAL ENGINEERING AND ELECTROCHEMICAL.

General.

Development of cermets as structural materials. J. T. Norton (*Amer. Soc. Mech. Engrs.*, 1955, *Propr.*, No. 85-A-196, 9 pp.).—The properties of cermets at 1800–2200° F. and their application in a wide variety of engineering designs are discussed. Competition to cermets will come from Mo alloys, whose properties, except their oxidation resistance, are superior at high temp.; if this can be overcome, possibly by a cermet coating, the direct use of cermets may be unnecessary. (R.C.U.K.A. (R.I.C.).)

Lubrication. XI. Slider bearing with transverse curvature: exact solution. A. S. C. Ying, A. Charnes and E. Saibel (*Trans. Amer. Soc. Mech. Engrs.*, 1956, 78, 465–467).—An exact mathematical solution is developed for the Reynolds equation in the hydrodynamical theory of slider-bearing lubrication, with side leakage for film thickness varying exponentially both in the direction of motion and symmetrically perpendicular to this direction. The solution is in the form of a rapidly converging series from which calculations for pressure distribution, total bearing load, frictional force, etc., can be conveniently made. (J. S. C.)

Radiographic inspection of loaded rocket motors. J. Buchanan and H. D. Herbert (*Industr. Engng. Chem.*, 1956, 48, 730–731).—Investigations showed that solid-propellant rocket motors using a propellant grain formed directly in the rocket case were successfully inspected for critical voids and irregularities by modern radiographic equipment. Standard industrial techniques have been improved to obtain a 2% sensitivity in the radiographs of a plastic material where the radiation must necessarily pass through a metal case. Al-cased rocket motors up to 3 in. in diameter were successfully inspected with fluoroscopic equipment. γ -Ray sources, e.g., ^{60}Co , produced film with adequate sharpness and contrast for inspection of large rocket motors. (O. M. WHITTON.)

Free and braked fluidization on beds of solid particles. L. Massimilla and S. Baracale (*Mic. sci.*, 1956, 26, 487–504).—Free and braked fluidization tests have been carried out on beds consisting of almost spherical glass pellets of diam. 0.7 to 3 mm. in a Pyrex glass column of 90 mm. internal diam. With fluidization braked by means of a pile of nets good fluidization was obtained over a wider range of values of Reynolds number than with free fluidization. (L. A. O'NEILL.)

Explosion investigations of industrial dusts. E. Wehner (*Mineir. Fuel Pwr Safety Min. 8th Internat. Conf., Paper 19*, 10 pp.).—The various methods used to determine ignition temp. and "glow points" are compared, and data discussed in relation to the limit of safety in practice. Most "cooking" dusts (of coal, wood, flour, phenol-resin, etc.) are inflammable in the Godbert-Greenwald apparatus and are liable to self-ignition, so that the glow-point is the crit. safety limit above which a protective inert gas must be used. By ignition of dust clouds determinations were also made of max. pressure, max. velocity of pressure-rise and total explosion time, the results being used to estimate violence (brisance) of explosion. Dusts of materials like naphthalene or phthalic anhydride have little tendency to self-ignition (even at high temp. for a long period), so that the ignition temp. as measured according to VDE 0473/V.43 represents the upper limit of safety. Quant. measurements on the formation of static charges in combustible dusts are also reported briefly. (W. J. BAKER.)

Lead toxicity in a storage battery plant. C. P. Giel, M. Kleinfeld and J. Messite (*Arch. industr. Hyg.*, 1956, 13, 321–325).—The effects of Pb intoxication due to low grade cumulative exposure are

shown. Hazard was greatest in the paste room; excessive Pb was also present in casting and assembly rooms. Higher working rate increases incidence of poisoning cases. Suggestions for reducing hazards include better design of processes and plant, removal of Pb by ventilation systems, facilities for washing and regular air analysis. Regular medical examination of the operatives is advocated and discussed. (H. L. WHITEHEAD.)

Chronic toxicity of aniline vapour (5 p.p.m.) by inhalation. F. W. Oberst, E. B. Hackley and C. C. Cornstock (*Arch. industr. Hyg.*, 1956, 13, 379–384).—The max. pollution of air by PhNH_2 (5 p.p.m., the figure proposed by various States) is confirmed in a series of experiments in which dogs, mice, guinea pigs and rats are exposed for ~6 months. No well-defined toxic effects are found in any of the animals excepting rats which showed a mild bluish colour of skin, together with loss of wt., in the last month. An increase was observed in chromogen content of the dogs' urine. (28 references.) (H. L. WHITEHEAD.)

Testing materials by the application of alternating stresses. W. & T. Avery, Ltd. (and Carl Schenk Maschinenfabrik G.m.b.H.) (B.P. 739,522, 20.3.54).—The machine described allows small deformation strokes with great force to substantially rigid materials or large strokes with smaller force to materials elastic in the direction of the force. (J. A. BARNARD.)

Atomic Energy, etc.

Power reactors. Alvin M. Weinberg (*Symposium on Nuclear Metallurgy, Amer. Inst. min. metall. Engrs.*, 1955, 1–7).—The problems of design of nuclear reactors are outlined from the standpoints of fuels, neutron economy, breeding, thermal efficiency, moderation, fuel processing, and the cost of the resulting electricity. The U.S. Atomic Energy Commission is developing five types of reactor in the next five years, and these are fully described: (1) The Pressurized Water Reactor (PWR), using slightly enriched U fuel and water circulating at 20000 lb./sq. in. to heat-exchangers; (2) The Experimental Boiling-Water Reactor (EBWR), using fuel similar to PWR and direct steam transfer from core to turbine; (3) The Homogeneous Reactor Experiment (HIRE-2), in which aq. uranyl sulphate circulates between heat-exchangers and the core, which is surrounded by a heavy-water reactor; (4) The Sodium Reactor Experiment (SRE), with slightly enriched U core, graphite moderator, and Na coolant in the primary and secondary loops carrying heat to the steam generator; (5) The Experimental Breeder Reactor (EBR-2) with small, unmoderated Pu core surrounded by natural or depleted U blanket and a cooling system similar to SRE. (METALL. ABSTR. (R.B.C.).)

Condensation of a vapour to an assembly of droplets or particles (with particular reference to atomic explosion debris). K. Stewart (*Trans. Faraday Soc.*, 1956, 52, 161–173).—Material vaporized by a nuclear explosion will reappear as very small particles which will remain airborne for a considerable time. Fine particulate material from non-vaporized debris will also be carried by winds over great distances and deposit in snow and rain. Results on "fall-out" are completely in agreement with published results. A particle size distribution function is proposed and very approximate values for the numbers of particles during nucleation and after are developed. (19 references.) (R. J. MAGER.)

Materials Handling.

Servo-controlled continuous weigher. J. C. R. Heydensrych and U. Luoto (*Chem. week. Engr.*, 1956, 3, 252–254).—An automatic feeder for a chemical plant, designed to allow the feed rate to be varied from 2 to 6 tons/hr. with an accuracy of 1%, consists of a

Semiconductor Abstracts Volume 4 1956 Ibue Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Semiconductor Abstracts Volume 4 1956 Ibue PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture

of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Semiconductor Abstracts Volume 4 1956 Ibue PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Semiconductor Abstracts Volume 4 1956 Ibue free PDF books and manuals for download has revolutionized the way we access and consume knowledge.
