## **Semiotext E Architecture:**

**Semiotext(e)/architecture** Hraztan Zeitlian, 1992-01-01 This three foot in your face on your lap monster belongs on every five foot shelf Feisty and defiant designs Complex texts struggling with architectures intended to drag you into a visual and conceptual maelstrom Brian Boigon Atom Egoyan Felix Guattari Arthur Kroker Catherine Ingraham and others in a volume too big to open in most city apartments

**Architecture for a Free Subjectivity** Dr Simone Brott, 2013-06-28 Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze's model of subjectivity for architecture by surveying the prolific effects of architectural encounter and the spaces that figure in them For Deleuze and his Lacanian collaborator Felix Guattari subjectivity does not refer to a person but to the potential for and event of matter becoming subject and the myriad ways for this to take place By extension this book theorizes architecture as a self actuating or creative agency for the liberation of purely impersonal effects Imagine a chemical reaction a riot in the banlieues indeed a walk through a city Simone Brott declares that the architectural object does not merely take part in the production of subjectivity but that it constitutes its own This book is to date the only attempt to develop Deleuze's philosophy of subjectivity in singularly architectural terms Through a screening of modern and postmodern American and European works this provocative volume draws the reader into a close encounter with architectural interiors film scenes and other arrangements while interrogating the discourses of subjectivity surrounding them and the evacuation of the subject in the contemporary discussion The impersonal effects of architecture radically changes the methodology just as it reimagines architectural subjectivity for the twenty first century

Architecture After Deleuze and Guattari Chris L. Smith, 2023-05-04 This study illuminates the complex interplay between Deleuze and Guattari's philosophy and architecture Presenting their wide ranging impact on late 20th and 21st century architecture each chapter focuses on a core Deleuzian Guattarian philosophical concept and one key work of architecture which evokes contorts or extends it Challenging the idea that a concept or theory defines and then produces the physical work and not vice versa Chris L Smith positions the relationship between Deleuze and Guattari's philosophy and the field of architecture as one that is mutually substantiating and constitutive In this framework modes of architectural production and experimentation become inextricable from the conceptual territories defined by these two key thinkers producing a rigorous discussion of theoretical practical and experimental engagements with their ideas

Felix Guattari's Schizoanalytic Ecology Hanjo Berressem, 2020-05-28 Hanjo Berressem establishes the notion of a schizoanalytic ecology as the most consistent conceptual spine of Felix Guattari's work He covers the whole range of Guattari's solo work and the books co authored with Gilles Deleuze primarily a rigorous explication and analysis of Schizoanalytic Cartographies

**Harley Parker** Gary Genosko, 2025-08-25 This is the first book about the life and work of Harley Parker 1915 1992 Canadian museum exhibition designer typographer and painter As friend and collaborator of media luminary Marshall McLuhan Parker's influence extended far beyond the realm of art In this groundbreaking intellectual biography

Genosko shows that Parker's unique perspective on museums is based on his application of McLuhan's medium theory to exhibition design. His emphasis on the role of the senses anticipated much of contemporary sensory studies which will bring his work into focus for a new generation of scholars. A highlight of Parker's career as Head of General Display at Toronto's Royal Ontario Museum 1957-1968 was his Hall of Invertebrate Fossils which opened to considerable acclaim in early 1967. That same year he mounted a multimedia gallery at the Museum of the City of New York. These milestones underscore Parker's profound impact on museum studies and communication theory. Central to this comprehensive study is the rediscovery of Parker's lost manuscript *The Culture Box* which would have confirmed his role as a central figure in the Toronto School of Communication had it not been lost for some fifty years. Scholars in communication, cultural and museum studies will benefit from this exploration of Parker's thought as will those interested in sensory studies and the enduring value of McLuhan's ideas.

**Car Crash Culture** M. Brottman, 2016-04-30 A morbidly fascinating and articulate collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site of murder, studies of car crash cinema and psychological interpretations of the notion of the accident. The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

**Travel, Space, Architecture** Miodrag Mitrasinovic, 2016-02-17 Travel Space Architecture defines a new theoretical territory in architectural and urban scholarship that frames the processes of spatial production through the notion of travel. By aligning architectural thinking with current critical theory debates, this book explores whether dissociating culture from place and identity and detaching the idea of architecture from both can reframe our understanding of spatial and architectural practices. The book presents seventeen key case studies from a diverse range of perspectives including historical, theoretical and praxis-based and range from interrogations of architectural travel and notions of belonging and nationhood to challenging established geopolitical hierarchies.

Architecture and the Sciences Antoine Picon, Alessandra Ponte, 2003-05 Since antiquity the sciences have served as a source of images and metaphors for architecture and have had a direct influence on the shaping of built space. In recent years architects have been looking again at science as a source of inspiration in the production of their designs and constructions. This volume evaluates the interconnections between the sciences and architecture from both historical and contemporary perspectives. *Architecture and the Sciences* shows how scientific paradigms have migrated to architecture through the appropriation of organic and mechanical models. Conversely, architecture has provided images for scientific and technological discourse. Accordingly, this volume investigates the status of the exchanges between the two domains. Contents include Alessandra Ponte, Desert Testing; Martin Bressani, Violet le Duc's
