Semiotic Sphere:

The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the adventure of the search itself

Semiotic Theory of Learning Andrew Stables, Winfried Nöth, Alin Olteanu, Sébastien Pesce, Eetu Pikkarainen, 2018-05-15 Semiotic Theory of Learning asks what learning is and what brings it about challenging the hegemony of psychological and sociological constructions of learning in order to develop a burgeoning literature in semiotics as an educational foundation Drawing on theoretical research and its application in empirical studies the book attempts to avoid the problematization of the distinction between theory and practice in semiotics It covers topics such as signs significance and semiosis the ontology of learning the limits of learning ecosemiotics ecology and sexuality The book is written by five of the key figures in the semiotics field each committed to the belief that living is a process of interaction through acts of signification with a signifying environment While the authors are agreed on the value of semiotic frameworks the book aims not to present an entirely coherent line in every respect but rather to reflect ongoing scholarship and debates in the area In light of this the book offers a range of possible interpretations of major semiotic theorists unsettling assumptions while offering a fresh and still developing series of perspectives on learning from academics grounded in semiotics Semiotic Theory of Learning is a timely and valuable text that will be of great interest to academics researchers and postgraduates working in the fields of educational studies semiotics psychology philosophy applied linguistics and media studies

Semiotics around the World: Synthesis in Diversity Irmengard Rauch, Gerald F. Carr, 2020-10-12 No detailed description available for Semiotics around the World Synthesis in Diversity Semiotics Continues to Astonish Paul Cobley, John Deely, Kalevi Kull, Susan Petrilli, 2011-07-27 Peirce's 1906 proposal that the universe as a whole even if it does not consist exclusively of signs is yet everywhere perfused with signs is a thesis that better than any other sums up the life and work of Thomas A Sebeok inventor of semiotics as we know it today Semiotics the doctrine of signs has a long and intriguing history that extends back well beyond the last century two and a half millennia to Hippocrates of Cos It ranges through the teachings of Augustine Scholastic philosophy the work of Peirce and Saussure Yet a fully fledged doctrine of signs with many horizons for the future was the result of Sebeok's work in the twentieth century The massive influence of this work as well as Sebeok's convening of semiotic projects and encouragement of a huge number of researchers globally which in turn set in train countless research projects is difficult to document and has not been assessed until now This volume using the testimonies of key witnesses and participants in the semiotic project offers a picture of how Sebeok through his development of knowledge of endosemiotics phytosemiotics biosemiotics and sociosemiotics enabled semiotics in general to redraw the boundaries of science and the humanities as well as nature and culture **Linguistic Semiotics** Mingyu Wang, 2020-02-25 This is the first book of its kind that explains the basic concepts theoretical foundations and systematic research of linguistic semiotics so as to establish a well founded framework for linguistic semiotics as an independent discipline While examining the major claims of different schools of semiotics it also addresses 12 central issues concerning linguistic semiotics and outlines semiotic studies in China focusing on the multiple research areas and accomplishments In addition to illustrations and tables the book offers an Index of References in Linguistic Semiotics consisting of 1 063 entries including monographs journal papers conference proceedings etc in Chinese English and Russian *Theories of Metaphor Revised* Stephan Kessler, 2013 Interest in literary and linguistic research on metaphor and imagery has increased over the past thirty years However theoretical studies dealing with the functioning of metaphor are still rare Scholars often develop their theoretical approach to metaphor suiting their special goals of analysis only In addition a few explanatory models are ubiquitous such as substitution analogy theory elliptical simile transferred meaning the theory of interaction and conceptualism In his theoretical sketch

Stephan Kessler gives a discursive criticism of the existing models of metaphor and offers a review of conceptualism What has once been denoted rhetorical metaphor has been changed completely by conceptualism Metaphor itself has become a metaphor Here the well known models of metaphor have led Kessler to dedicate deeper pragma linguistic thoughts to the functioning of tropes In Kessler s study conceptualism is perceived through the eyes of its most prominent supporters Lakoff and Johnson

Fact and Fiction Albrecht Koschorke, 2018-04-23 How can we develop a cultural theory starting with the basic insight that human beings are storytelling animals Within literary studies narratology is a highly developed field However literary historians have not paid much attention to the large and small stories abounding in everyday discourse guiding all kinds of social activity and providing common ground for whole societies but also fueling controversies and hostilities Moreover narrative is not only a scholarly category but has come into use in many fields of social activity as a tool for cultural self-fashioning This book is based on the assumption that to a large extent social dynamics is modeled in an aesthetic manner via narratives It explores the narrative organization of cultural spaces and time frames the mythological shaping of communities and adversaries and the co-production of narratives and institutions aimed at stabilizing social life In this framework the epistemological problem looms large of how an instrument as unreliable as narrative can participate in the creation of a social consensus regarding truth This problem endows the general topics explored in this book with a particularly contemporary dimension

Theories of Information, Communication and Knowledge Fidelia Ibekwe-SanJuan, Thomas M Dousa, 2013-08-30 This book addresses some of the key questions that scientists have been asking themselves for centuries what is knowledge What is information How do we know that we know something How do we construct meaning from the perceptions of things Although no consensus exists on a common definition of the concepts of information and communication few can reject the hypothesis that information whether perceived as object or as process is a pre-condition for knowledge Epistemology is the

study of how we know things anglophone meaning or the study of how scientific knowledge is arrived at and validated francophone conception To adopt an epistemological stance is to commit oneself to render an account of what constitutes knowledge or in procedural terms to render an account of when one can claim to know something An epistemological theory imposes constraints on the interpretation of human cognitive interaction with the world It goes without saying that different epistemological theories will have more or less restrictive criteria to distinguish what constitutes knowledge from what is not If information is a pre condition for knowledge acquisition giving an account of how knowledge is acquired should impact our comprehension of information and communication as concepts While a lot has been written on the definition of these concepts less research has attempted to establish explicit links between differing theoretical conceptions of these concepts and the underlying epistemological stances This is what this volume attempts to do It offers a multidisciplinary exploration of information and communication as perceived in different disciplines and how those perceptions affect theories of knowledge
