The Race to Zero Paul H. Tice, 2024-02-20 Paul Tice delivers a body blow to the predations of the ESG industrial complex. Mark P. Mills, Senior Fellow, Manhattan Institute. Over the past few years, sustainable investing, which is based on the theory that subjective environmental, social and governance or ESG factors should drive corporate policy and investment decisions, has swept across Wall Street, spurred on by the United Nations, sovereign governments and financial regulators and

cheered on by academics environmental activists social justice warriors and the media To date there has been little public resistance or analytical pushback as the ESG orthodoxy has integrated itself into almost every corner of the financial markets By 2030 the iron curtain of sustainability will have fully descended across Wall Street Race to Zero is meant to provide a detailed rebuttal to the case for sustainable investing from the perspective of a long time Wall Street analyst and investor and latter day finance professor Sustainable investing is a scam because it is not about generating excess returns for investors or furthering ethical goals such as improving society or saving the planet rather it is about controlling the world s financial system and determining the allocation of capital and investment flows across the markets It is liberal progressive politics masquerading as finance whose objective is to create a compliant corporate sector that serves as both Greek chorus and funding source for the environmental and social causes championed by government and the elite class This book is designed to expose this truth in plain spoken language free of financial jargon to reach the widest possible audience including the silent majority on Wall Street now afraid to speak up about ESG
