to see art as a kind of bodily enhancement or mode of sensation enabling living bodies to experience and transform the universe Art can be understood as a way for bodies to augment themselves and their capacity for perception and affection a way to grow and evolve through sensation Through this framework which knits together the theories of Charles Darwin Henri Bergson Gilles Deleuze Félix Guattari and Jakob von Uexküll we are able to grasp art's deep animal lineage Grosz argues that art is not tied to the predictable and known but to new futures not contained in the present Its animal affiliations ensure that art is intensely political and charged with the creation of new worlds and new forms of living According to Grosz art is the way in which life experiments with materiality or nature in order to bring about change
