Changing Senses of Place Christopher M. Raymond, Lynne C. Manzo, Daniel R. Williams, Andrés Di Masso, Timo von Wirth, 2021-08-05 Global challenges ranging from climate change and ecological regime shifts to refugee crises and post national territorial claims are rapidly moving ecosystem thresholds and altering the social fabric of societies worldwide This book addresses the vital question of how to navigate the contested forces of stability and change in a world shaped by multiple interconnected global challenges It proposes that senses of place is a vital concept for supporting individual and social processes for navigating these contested forces and encourages scholars to rethink how to theorise and conceptualise changes in senses of place in the face of global challenges It also makes the case that our concepts of sense of place need to be revisited given that our experiences of place are changing This book is essential reading for those seeking a new understanding of the multiple and shifting experiences of place **Senses of Place** Steven Feld, Keith H. Basso, 1996 The complex relationship of people to places has come under increasing scholarly scrutiny in recent years as acute global conditions of exile displacement and inflamed borders to say nothing of struggles by indigenous peoples and cultural minorities for ancestral homelands land rights and retention of sacred places have brought the political question of place into sharp focus But to date little attention has been paid to the ethnography of place to how people actually live in perceive and invest with meaning the places they call home In this compelling new volume eight respected ethnographers explore and lyrically evoke the ways in which people experience express imagine and know the places in which they live Case studies range from the Apaches of Arizona s White Mountains to the residents of backwoods hollers in Appalachia and the Kaluli people of Papua New Guinea s rainforests As these writers confront the dilemmas and possibilities of an anthropological consideration of place they make an important and moving contribution to our understanding of ourselves **Sense of Place, Health and Quality of Life** Allison Williams, 2016-12-05 A significant body of theoretical and empirical studies describes sense of place as an outcome of interconnected psychological social and environmental processes in relation to physical place s Sense of place has been examined particularly in human geography in terms of both the character intrinsic to a place as a localized bounded and material entity and the sentiments of attachment detachment that humans experience and express in relation to specific places Scholars in a wide range of disciplines are increasingly exploring the relationship between place and health and recently the field of public health has been encouraged to recognize sense of place as a potential contributing factor to well being It is evident that over the last few decades sense of place has developed into a versatile construct This important book brings together work related to sense of place and health broadly defined from the perspective of a variety of fields and disciplines It will give the reader an understanding of both the range of applications of

this construct within approaches to human health as well as the breadth of research methodologies employed in its investigation

**Senses of Place: Senses of Time** G. J. Ashworth, 2016-09 Bringing together case studies from Ireland the Netherlands Canada Germany and Mexico this book examines the link between senses of place and senses of time It suggests that not only do place identities change through time but imagined pasts also provide resources which the present selects and packages for its own contemporary purposes and for forwarding to imagined futures The reasons behind the creation of place image are also explored setting them within political and social contexts In its three main sections Heritage in the Creation of Senses of Place Heritage and Conflicting Identities and Heritage and the Creation of Senses of Place the book examines the creation of place identities at the urban rural regional and international scales It questions how senses of place interact with senses of ethnic cultural identity what the roles of government media residents and tourists are in creating senses of place and how and why all these variables change through time

**Senses of Place** Gregory John Ashworth, Brian J. **Mobilities of Self and Place** Mahni Dugan, 2019-11-16 When it comes to migration there is no level playing field Some people are privileged advantaged and supported and others are marginalised persecuted and traumatised The extension of the rights and equalities for which many people advocate and provision of other extrinsic conditions are insufficient for wellbeing This work asks what is sufficient What is it that people do and can do to change their experience from suffering to wellbeing when handling challenges of migration and other mobilities What helps people when they are migrating What have migrants experienced and learned that could be useful to others facing challenges of mobility and change How can this learning be applied to promote greater social wellbeing and care of environments in an increasingly mobile world Mobilities of Self and Place documents rich conversations with regular migrants and refugees to critically consider migration history human rights place self and mobilities studies The work explores ontological and epistemological questions of sense of self sense of place identity and agency Mahni Dugan helps us understand how the relationship between sense of place and sense of self affects the ability of migrants to relocate with wellbeing The movement from global to local social to personal intellectual to experiential offers a broad societal understanding of the phenomena and challenges of contemporary mobilities

Holloway, Phil Hubbard, 2014-01-14 An innovative introduction to Human Geography exploring different ways of studying the relationships between people and place and putting people at the centre of human geography The book covers behavioural humanistic and cultural traditions showing how these can lead to a nuanced understanding of how we relate to our surroundings on a day to day basis The authors also explore how human geography is currently influenced by postmodern ideas stressing difference and diversity While taking the importance of these different approaches seriously as ways of thinking about the role of place in peoples everyday lives the book also tries to encapsulate what has been so vibrant and exciting about human geography over the last couple of decades By using examples to which students can relate such as how they imagine and represent their home the way they avoid certain spaces how they move through retail spaces where they choose to go to university how they use the Internet how they represent other nations and so on the authors show how geography shapes everyday life in a manner that is seemingly mundane yet profoundly important *Feminism and Geography* Gillian Rose, 2013-11-18 Geography is a subject which throughout its history has been dominated by men men have undertaken the heroic explorations which form the mythology of its foundation men have written most of its texts and as many feminist geographers have remarked men s interests have structured what counts as legitimate geographical knowledge This book offers a sustained examination of the masculinism of contemporary geographical discourses Drawing on the work of feminist theories about the intersection of power knowledge and subjectivity different aspects of the discipline s masculinism are discussed in a series of essays which bring influential approaches in recent geography together with feminist accounts of the space of the everyday the notion of a sense of place and views of landscape In the final chapter the spatial imagery of a variety of feminists is examined in order to argue that the geographical imagination implicit in feminist discussions of the politics of location is one example of a geography which does not deny difference in the name of a universal masculinity *Wellbeing and Place* Sara Fuller, 2016-02-24 The last twenty years have witnessed an important movement in the aspirations of public policy beyond meeting merely material goals towards a range of outcomes captured through the use of the term wellbeing Nonetheless the concept of wellbeing is itself ill defined a term used in multiple different contexts with different meanings and policy implications Bringing together a range of perspectives this volume examines the intersections of wellbeing and place including immediate applied policy concerns as well as more critical academic engagements Conceptualisations of place context and settings have come under critical examination and more nuanced and varied understandings are drawn out from both academic and policy related research Whilst quantitative and some policy approaches treat place as a static backdrop or context others explore the interrelationships of emotional social cultural and experiential meanings that are both shape place and are shaped in place Similarly wellbeing may be understood as a relatively stable and measurable entity or as a more situation dependent and relational effect The book is structured into two sections essays that explore the dynamics that determine wellbeing in relation to place and essays that explore contested

understandings of wellbeing both empirically and theoretically
