Seoul Train:

Seoul Ross King, 2018-02-28 Seoul is a colossus both in its physical presence and the demand it places on any intellectual effort to understand it How did it come to be How can a city this immense work Underlying its spectacle and incongruities is a city that might be described as ill at ease with its own past The bitter rifts of Japanese colonization persist as does the troubled aftermath of the Korean War and its divisions the economic Miracle on the Han that followed is crosscut by memories of the violent dictatorship that drove it In Seoul author Ross King interrogates this contested history and its physical remnants tacking between the city's historiography and architecture with attention to monuments streets and other urban spaces The book's structuring device is the dichotomy of erasure and memory as necessary preconditions for reinvention King traces this phenomenon from the old dynasties to the Japanese regime and wartime destruction he then follows the equally destructive reinvention of Korea under dictatorship to the brilliant city of the present with its extraordinary explosion of creativity and ideas the post 1991 Hallyu the Korean Wave The final chapter returns to questions of forgetting and memory but now as conditions of possibility for what would seem to underlie the present trajectory of this extraordinary city and culture Seoul can be read King suggests in the context of the hybrid ideas that have characterized Korean cultural history It may be their present eruption that accounts for the city of contradictions that confronts the contemporary observer and that most extraordinary of Korean phenomena the rise of an alternative virtual world eclipsing both city and nation Has the very idea of Korea been reinvented even as the weakly defined nation state slips away

Inside a High-Speed Train Collin MacArthur, 2014-08-01 A look at the trains that use modern technology to reach incredible speeds [Train Service Japan](#). Tetsudōin, 1913

[The Economics and Politics of High-Speed Rail](#) Daniel Albalade, Germ Bel i Queralt, 2012-06-14 The technological revolution linked to high speed rail HSR has been accompanied by myths and claims about its contribution to society and the economy Although HSR is unquestionably a technological advance that has become a symbol of modernity this review and analysis of the international experiences shows that the conditions necessary to have a positive impact economically socially and environmentally are enormously restrictive The Economics and Politics of High Speed Rail Lessons from Experiences Abroad by Daniel Albalade and Germ Bel introduces the main questions policy makers and scholars should examine when considering and studying HSR implementation with particular emphasis on the US's recent interest in this technology and possible application in California Albalade and Bel then review the experiences of the most significant implementations of HSR around the globe This in depth international perspective includes chapters on the pioneers of HSR Japan and France the European followers Germany Spain and Italy as well as Asian experiences in China Taiwan and Korea Albalade and Bel's study provides a clear distinction between the myths and realities associated with this transportation innovation Among the most relevant findings this study highlights how HSR projects that do not satisfy highly restrictive conditions on mobility patterns measured costs and economically rational designs that make it desirable have been the source of huge financial debacles and the economic failure of HSR in most cases which result in unfortunate consequences for taxpayers The Economics and Politics of High Speed Rail is a rigorous investigation of the economic and political challenges and ramifications of implementing new public transportation technology

Korea's Occupied Cinemas, 1893-1948
Brian Yecies, Ae-Gyung Shim, 2012-05-23 Korea's Occupied Cinemas 1893-1948 compares and contrasts the development of cinema in Korea during the Japanese occupation 1910-1945 and US Army Military 1945-1948 periods within the larger context of cinemas in occupied territories It differs from previous studies by drawing links between the arrival in Korea of modern technology and ideas and the cultural political and social environment as it follows the development of exhibition film policy and filmmaking from 1893 to 1948 During this time Korean filmmakers seized every opportunity to learn production techniques and practice their skills contributing to the growth of a national cinema despite the conditions produced by their occupation by colonial and military powers At the same time Korea served as an important territory for the global expansion of the American and Japanese film industries and after the late 1930s Koreans functioned as key figures in the co-production of propaganda films that were designed to glorify loyalty to the Japanese Empire For

these reasons and as a result of the tensions created by divided loyalties the history of cinema in Korea is a far more dynamic story than simply that of a national cinema struggling to develop its own narrative content and aesthetics under colonial conditions
