M. Gorman,C. Blackorby,A. F. Shorrocks,1996 **Separability and Aggregation** W. M. Gorman,1995 This volume brings together for the first time the important work of W M Terence Gorman a major figure in the development of economics during the past 40 years His publications on separability aggregation duality and demand are recongized as fundamental contributions to economic theory *Separability and Aggregation : the Collected Works of William Moore Gorman* W.M. Gorman,1995 *The Palgrave Companion to Oxford Economics* Robert A. Cord,2021-06-16 The University of Oxford has been and continues to be one of the most important global centres for economics With six chapters on themes in Oxford economics and 24 chapters on the lives and work of Oxford economists this volume shows how economics became established at the University how it produced some of the world s best known economists including Francis Ysidro Edgeworth Roy Harrod and David Hendry and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast this volume provides economists especially those interested in macroeconomics and the history of economic thought with the first in depth analysis of Oxford economics **A History of Irish Economic Thought** Thomas Boylan,Renee Prendergast,John Turner,2013-03 For a country that can boast a distinguished tradition of political economy from Sir William Petty through Swift Berkeley Hutcheson Burke and Cantillon through to that of Longfield Cairnes Bastable Edgeworth Geary and Gorman it is surprising that no systematic study of Irish political economy has been undertaken In this book the contributors redress this glaring omission in the history of political economy for the first time providing an overview of developments in Irish political economy from the seventeenth to the twentieth century Logistically this is achieved through the provision of individual contributions from a group of recognized experts both Irish and international who address the contribution of major historical figures in Irish political economy along the analysis of major thematic issues schools of thought and major policy debates within the Irish context over this extended period *The Index Number Problem* Sydney Afriat,2014-02 This volume addresses the search for a true price index the need to know how to convert an amount at one date into the right amount at another date The longstanding question concerning how such an index should be constructed is known as The Index Number Problem **Handbook of Applied**

Economic Statistics Aman Ullah,1998-02-03 This work examines theoretical issues as well as practical developments in statistical inference related to econometric models and analysis This work offers discussions on such areas as the function of statistics in aggregation income inequality poverty health spatial econometrics panel and survey data bootstrapping and time series

Price and Quantity Index Numbers Bert M. Balk,2012-07-19 This book is the first comprehensive text on index number theory since Irving Fisher's 1922 *The Making of Index Numbers* The book covers intertemporal and interspatial comparisons ratio and difference type measures discrete and continuous time environments and upper and lower level indices Guided by economic insights this book develops the instrumental or axiomatic approach

Quantitative Techniques for Competition and Antitrust Analysis Peter Davis,Eliana Garcés,2009-11-16 This book combines practical guidance and theoretical background for analysts using empirical techniques in competition and antitrust investigations Peter Davis and Eliana Garcés show how to integrate empirical methods economic theory and broad evidence about industry in order to provide high quality robust empirical work that is tailored to the nature and quality of data available and that can withstand expert and judicial scrutiny Davis and Garcés describe the toolbox of empirical techniques currently available explain how to establish the weight of pieces of empirical work and make some new theoretical contributions The book consistently evaluates empirical techniques in light of the challenge faced by competition analysts and academics to provide evidence that can stand up to the review of experts and judges The book's integrated approach will help analysts clarify the assumptions underlying pieces of empirical work evaluate those assumptions in light of industry knowledge and guide future work aimed at understanding whether the assumptions are valid Throughout Davis and Garcés work to expand the common ground between practitioners and academics

Handbook of Econometrics James J. Heckman,Edward Leamer,2007-12-13 As conceived by the founders of the Econometric Society econometrics is a field that uses economic theory and statistical methods to address empirical problems in economics It is a tool for empirical discovery and policy analysis The chapters in this volume embody this vision and either implement it directly or provide the tools for doing so This vision is not shared by those who view econometrics as a branch of statistics rather than as a distinct field of knowledge that designs methods of inference from data based on models of human choice behavior and social interactions All of the essays in this volume and its companion volume 6B offer guidance to the practitioner on how to apply the methods they discuss to interpret economic data The authors of the chapters are all leading scholars in the fields they survey and extend Part of the renowned *Handbooks in Economics* Series Updates and expands the existing *Handbook of Econometrics* volumes An invaluable reference written by some of the world's leading econometricians

Financial Education and Risk Literacy Riccardo Viale,Umberto Filotto,Barbara Alemanni,Shabnam Mousavi,2021-01-29 This innovative book explores how the design of financial education programmes could benefit from the findings of behavioural economics and finance and cognitive sciences It covers the social cultural and technological determinants of financial education the role of the banking system in promoting financial literacy

and how governments and regulatory authorities are dealing with financial education and risk literacy programmes in schools

Models of Decision-Making Paul Weirich, 2015 This book explains and justifies efficient general methods of making decisions and will guide practical efforts to streamline rational choice

Effects of the Assumed Demand System on Simulated Postmerger Equilibria, 1997

Handbook of Utility Theory Salvador Barbera, Peter J. Hammond, Christian Seidl, 1998 The standard rationality hypothesis implies that behaviour can be represented as the maximization of a suitably restricted utility function This hypothesis lies at the heart of a large body of recent work in economics of course but also in political science ethics and other major branches of social sciences Though the utility maximization hypothesis is venerable it remains an area of active research Moreover some fundamental conceptual problems remain unresolved or at best have resolutions that are too recent to have achieved widespread understanding among social scientists The main purpose of the Handbook of Utility Theory is to make recent developments in the area more accessible The editors selected a number of specific topics and invited contributions from researchers whose work had come to their attention Therefore the list of topics and contributions is largely the editors responsibility Each contributor's chapter has been refereed and revised according to the referees remarks This is the first volume of a two volume set with the second volume focusing on extensions of utility theory

The Behavioral and Welfare Analysis of Consumption Federico Perali, 2013-06-29 The motive force of human activity that propels the stream of progress is here caught at its source in its most modest material expressions The mechanism of the passions acting as determinant in these low spheres is less complex and can therefore be observed with greater precision All one need do is leave the picture its clear calm colors and its simple design Gradually as that search for material well being by which man is tormented grows and expand it also tends to rise and pursue an ascendant course thorough the social classes In I Malavoglia it is still only the struggle for material needs Once these needs are satisfied the search turns into greed for riches and will be embedded in a bourgeois type Giovanni Verga from the Introduction to The House by the Medlar Tree I Malavoglia Motivation In the past decade many less developed countries have undertaken structural adjustment programs with the hope of breaking the vicious circle of the depression that enveloped them during the 1980s and of loosening the suffocating grip of the debt crisis Nearly always macroeconomic stabilization implies a reduction of public spending and consequently a reduction of subsidies on wage goods and food production Other macro policies such as tariff elimination and exchange rates alignment alter relative prices and may have significant effects on the level and distribution of income Today poverty and inequality are perceived as economic threats as a result of globalization and unbalanced market expansion

Consumer Optimization Problem Solving Alfred L Norman, 2014-12-15 What algorithms are tractable depends on the speed of the processor Given the speed of digital computers polynomial algorithms are considered tractable But a human can take several seconds to make one binary comparison between two pens Given this slow speed sublinear algorithms are considered tractable for an unaided human and this defines Simon's concept of bounded

rationality Humans make simplifications to solve the intractable consumer optimization problem Consumers search for goods and services item by item which greatly reduces the number of alternatives to consider In addition consumers have operators that can process a set in a single operation Also consumers budget by incremental adjustment In considering consumer performance the question to ask is how close to optimal is consumer performance and not whether consumers optimize as a yes no question Given the ordinal nature of utility theory this creates a basic measurement problem The book presents a review of the literature on consumer performance This is an opportune time to study consumer procedures because the Internet provides a media to make substantial improvements in consumer performance The book includes a case study comparing the performance of a digital camera selection code with the advice of sales people A field experiment demonstrates that the software code provides better advice

Aggregation and the Microfoundations of Dynamic

Macroeconomics Mario Forni, Marco Lippi, 1997 This book argues that modern macroeconomics has completely overlooked the aggregate nature of the data Standard models start with intertemporally maximizing agents and obtain dynamic equations linking economic variables like consumption income investment interest rate and employment Such equations exhibit testable properties like cointegration definite patterns of Granger causality and restrictions on the parameters The usual simplification that agents are identical leads to testing these properties directly on aggregate data Here this simplification is systematically questioned In Part I the homogeneity assumption is tested using disaggregate data and strongly rejected As shown in Part II the consequence of introducing heterogeneity is that apart from flukes cointegration unidirectional Granger causality restrictions on parameters do not survive aggregation thus the claim that modern macroeconomics has solid microfoundations is unwarranted However it is argued in Part III that aggregation is not necessarily bad Some important theory based models that do not fit aggregate data well in their representative agent version can be reconciled with aggregate data by introducing heterogeneity
