Livestock and the Environment M. L. Rowe, Linda Merryman, 1979

Stoichiometry and Research Alessio Innocenti, 2012-03-07 The aim of this book is to provide an overview of the importance of stoichiometry in the biomedical field It proposes a collection of selected research articles and reviews which provide up to date information related to stoichiometry at various levels The first section deals with host guest chemistry focusing on selected calixarenes cyclodextrins and crown ethers derivatives In the second and third sections the book presents some issues concerning stoichiometry of metal complexes and lipids and polymers architecture The fourth section aims to clarify the role of stoichiometry in the determination of protein interactions while in the fifth section some selected experimental techniques applied to specific systems are introduced The last section of the book is an attempt at showing some interesting connections between biomedicine and the environment introducing the concept of biological stoichiometry On this basis the present volume would definitely be an ideal source of scientific information to researchers and scientists involved in biomedicine biochemistry and other areas involving stoichiometry evaluation

Low Carbon Stabilization and

Solidification of Hazardous Wastes Daniel C.W. Tsang, Lei Wang, 2021-09-24 Low Carbon Stabilization and Solidification of Hazardous Wastes details sustainable and low carbon treatments for addressing environmental pollution problems critically reviewing low carbon stabilization solidification technologies This book presents the latest state of the art knowledge of low carbon stabilization solidification technologies to provide cost effective sustainable solutions for real life environmental problems related to hazardous wastes including contaminated sediments As stabilization solidification is one of the most widely used waste remediation methods for its versatility fast implementation and final treatment of hazardous waste treatment it is imperative that those working in this field follow the most recent developments Low Carbon Stabilization and Solidification of Hazardous Wastes is a necessary read for academics postgraduates researchers and engineers in the field of environmental science and engineering waste management and soil science who need to keep up to

date with the most recent advances in low carbon technologies This audience will develop a better understanding of these low carbon mechanisms and advanced characterization technologies fostering the future development of low carbon technologies and the actualization of green and sustainable remediation Focuses on stabilization solidification for environmental remediation as one of the most widely used environmental remediation technologies in field scale applications Details the most advanced and up to date low carbon sustainable technologies necessary to guide future research and sustainable development Provides comprehensive coverage of low carbon solutions for treating a variety of hazardous wastes as well as contaminated soil and sediment

Application, Purification, and Recovery of Ionic Liquids Olga Kuzmina, Jason Hallett, 2016-03-01 Application Purification and Recovery of Ionic Liquids provides a comprehensive overview of the usage of ionic liquids IL The book gives a description of the methods used for recovery and purification of ILs a summary of the economic aspects of using ILs and a review on the toxicity data of ILs It is written for researchers scientists and engineers working with ILs their properties and usages The book not only describes the chemical aspects but the economic and environmental aspects as well making it of particular interest to professionals applying this technology Chapters written by scientists in academia and researchers in industry ensuring coverage of both the scientific fundamentals and industrial applications A single source of information for a broad collection of recovery and purification methods Provides information on using ionic liquids as green solvents Includes economic aspects of recovery and reuse of ionic liquids
