Tweed,2015-10-01 A naturalist and historian for the National Parks Service offers a lively history of the giant sequoias of California and the love of nature they inspired Former park ranger William C Tweed takes readers on a tour of some of the world s largest and oldest trees in a narrative that travels deep into the Sierra Nevada mountains across the American West and all the way to New Zealand Along the way he explores the American public s evolving relationship with sequoias also known simply and affectionately as Big Trees It s no surprise that the sequoia groves of Yosemite and Calaveras were early tourist destinations The species was the embodiment of California s superlative appeal These giant redwoods were so beloved that special protections efforts sprang up to protect

like the Kern Canyon, Rae Lakes and Evolution Basin. Interest in wilderness travel in the High Sierra invigorated trail construction by the U.S. Forest Service and National Park Service and led to the construction of iconic routes like the John Muir Trail and High Sierra Trail. By the end of the New Deal era in the 1930s, thanks to the efforts of the Civilian Conservation Corps and other federal programs, the region contained over a thousand miles of trails. Improved trails led to the creation of Kings Canyon National Park and ultimately to the designation of the John Muir and the Sequoia-Kings Canyon wilderness areas. Granite Pathways explores all these stories, delving into not only the history of the region's trails but also the story of how this scenic wilderness region rose from obscurity to become one of the nation's most prized wilderness destinations.
