The Material Life of Human Beings Michael Brian Schiffer,2002-01-22 In this ground breaking work the distinguished anthropological theorist Michael Brian Schiffer presents a profound challenge to the social sciences Through a broad range of examples he demonstrates how theories of behaviour and communication have too often ignored the fundamental importance of objects in human life In *The Material Life of Human Beings* the author builds upon the premise that the most important feature of human life is not language but the relationships which take place between people and objects The author shows that artifacts are involved in all modes of human communication be they visual auditory or tactile By creatively folding elements of postmodernist thought into a scientific framework he creates new concepts and models for understanding and analysing communication and behavior Challenging established theories within the social sciences Michael Brian Schiffer offers a reassessment of the centrality of materiality to everyday life

Brief Tests of Collection Strength Howard D. White,1995-09-26 For purposes of accreditation resource sharing and

institutional mission librarians need to assess the strengths of their collections in particular subject areas This book

describes and illustrates a brief test for determining a library s collection strength Though such tests are most often

employed in academic libraries the methodology outlined by the author should be useful to all types of libraries in assessing

the strength of their holdings In a time of increasing material and limited resources libraries need to be particularly judicious

in deciding which works to acquire Oftentimes a library seeks to develop strong holdings in one or more subject areas Such

an approach is especially useful for libraries that share their resources with other institutions To plan their acquisitions

carefully and to be of greatest use to other consortia members a library needs to gauge the strength of its holdings

accurately This volume describes and illustrates a relatively brief test to assign libraries a score for existing collection strength in a subject area Drawing upon expert human judgment and holdings data available from OCLC the test can assist librarians in setting and verifying collection levels on the RLG or WLN Conspectus scales Collection strength is often verified in a labor intensive fashion The brief test presented by the author is an economical alternative to the more typical labor intensive approach to collection analysis *Library of Congress Subject Headings* Library of Congress.
