Rethinking Serial Murder, Spree Killing, and Atrocities Robert Shanafelt, Nathan W. Pino, 2014-11-20 Multiple killings by serial or spree killers and the mass violence seen in war crimes and other atrocities have typically been understood as discrete category types which can foster the view that there are fundamentally different kinds of human beings including deviants who are born evil and innately given to sadism or a callous lack of empathy In contrast this book considers the violence of these deviants in terms of larger questions about human violence Therefore in addition to describing the life histories of a sample of individual serial and spree murderers the book includes analysis of macro level phenomena such as genocide mass rape and killing and torture occurring under conditions of war state authorization or political upheaval The chief claim of the book is that given the right combination of factors occurring at different levels of analysis virtually anyone can emerge as a killer or perpetrator of atrocities While it is crucial to understand individual killers

in terms of the details of their biographies it is equally crucial to understand political atrocities in terms of the details of their histories and to see that persons and groups are always the product of complexly interacting assemblage processes *The Solitary Vice* Mikita Brottman, 2010-05 *The Solitary Vice* will make you rethink your own relation to reading Brottman is wonderful at reminding us what a very complicated act of fantasy recompense adventurism and sometimes perversity reading a book can be
