the poetic strategies sixteenth and seventeenth century English women used to assert themselves as subjects of property and economic agents in relation to material items ranging from personal property to real estate despite the dominant patriarchal ideology insisting they were ideally temporary passive vehicles for men's wealth The study details how women imagined their multiple complex interactions with the material world the author shows that how a woman poet represents herself in relation to material objects is a flexible fiction she can mobilize for diverse purposes Because this book analyzes men's and women's poems together it isolates important gendered differences in how the poets envision human subjects use control possession and ownership of things and the influences effects and power of things over humans It also adds to the increasing evidence for the pervasiveness of patriarchal anxieties associated with female economic agency in a culture in which women were often treated as objects
