Stonehenge Mystery Hill was a sacred place For 2500 years they came annually to hold ceremonies with the spirits At first they came on the summer solstice and then later they came for the winter solstice and spring equinox They built ritual structures like stone chambers cairns drains basins enclosures and standing stones as part of their ceremonial areas As the ceremonies were altered and added to new ceremonial structures were built to accommodate them These structures were constructed for specific purposes contained symbolism meaningful to their culture and had distinct architectural styles The result is an amazing archaeological record of the 2500 year cultural history of this sacred place America's Stonehenge Deciphered explores the purpose of these structures the ceremonies held at them and the meaning behind the symbolism built into them It traces how these cultural beliefs were passed from generation to generation and how they were added to and altered to meet the changing needs of their culture What emerges from this is a profound respect for the intelligence sophistication and the depth of their spiritual worldview culture and their expertise with building stone structures

Shaman or Sherlock? Gina Macdonald, Andrew F. Macdonald, 2001-11-30 Fictional depictions of Native American concepts of justice crime and the investigation of crime are explored in this original work Shaman or Sherlock explores depictions created by Native American authors themselves as well as those created by outsiders with mainstream agendas The most successful of these writers fuse authentic Native American culture with standard genre conventions thus providing

an appealing empathetic view of little understood or underappreciated groups as well as insight into issues of cross cultural communication Dealing with such significant concepts as acculturation regional diversity and assimilation this unique study evaluates over 200 detective stories Though the crime novel began in Europe as a manifestation of Enlightenment rationality and scientific methodology the Native American detective story moves into the realm of the spiritual and intuitive often incorporating depictions of non material phenomena Shaman or Sherlock explores how geographical and tribal differences degrees of assimilation and the evolution of age old cultural patterns shape the Native American detective story

New Perspectives on Prehistoric Art Günter Berghaus,2004-04-30 Following the discovery of Franco Caribbean cave art in the nineteenth century standard interpretations of these works usually revolved around hunting magic and fertility cults Orthodox positions such as these have weighed heavily on later generations of art historians archaeologists and anthropologists even those whose views dissented from those of their predecessors In the last few decades however new approaches to cave art often based on discoveries made in Africa Asia Australia North America and the Arctic region have

produced new insights into possible meanings and functions of prehistoric paintings and sculptures This new collection of essays explores these insights gathering the observations of eight experts from a variety of disciplines and examining some of the social and spiritual functions of a variety of artistic genres ranging from 40 000 B C to 5 000 B C These insights which derive from evolutionary biology feminist scholarship ritual studies and new modes of anthropology argue collectively that prehistoric art was a culture specific form of communication that should be interpreted in the social context of early hunter gatherer societies and should not be measured with the criteria and paradigms of modern art Essential reading for anyone interested in prehistoric art or its cultural implications this volume represents a bold step forward in the research and analysis of the very first artists
