They are holding a large, dark, cylindrical object in their right hand and a smaller, dark, zig-zag shaped object in their left hand. The background is a blurred natural landscape. The title text is overlaid in red on the right side of the image.

Rock, Stanley Krippner, 2011-10-14 Shamanism can be described as a group of techniques by which its practitioners enter the spirit world, purportedly obtaining information that is used to help and to heal members of their social group. Despite a resurgence of interest in shamanism and shamanic states of consciousness, these phenomena are neither well defined nor sufficiently understood. This multi-disciplinary study draws on the fields of psychology, philosophy and anthropology with the aim of demystifying shamanism. The authors analyse conflicting perspectives regarding shamanism, the epistemology of shamanic states of consciousness and the nature of the mental imagery encountered during these states. **The to Z of Shamanism** Graham Harvey, Robert J. Wallis, 2010-04 Explores the common ground of shamanic traditions and evaluates the diversity of both traditional indigenous communities and individual Western seekers. **Belief Beyond Boundaries** Joanne Pearson, 2023-05-09 *Belief Beyond Boundaries* explores religions or forms of spirituality that tend to be marginal to the mainstream of British and North American religious expression. The book examines how alternative spiritualities traditionally classed as New Age or new religious movements have grown exponentially in recent years. It progresses to detailed examination of Paganism, Celtic spirituality, Wicca, witchcraft, North American indigenous religion and New Age, considering the impact of the rise of science on religion and the emergence of new categories of spirituality. The authors explore why these forms of spirituality are so popular in the contemporary UK and USA and how they impact on mainstream traditions.
