Problem Solving, Reasoning and Numeracy Pat Beckley, Ashley Compton, Jane Johnston, Harriet Marland, 2010-11-11 This is a complete guide to supporting problem solving reasoning and numeracy in the Early Years Foundation Stage EYFS promoting a holistic approach and exploring good practice

Teaching Maths to Pupils with Different Learning Styles Tandi Clausen-May, 2005-11-05 Tackles an area of the curriculum many teachers lack confidence in Lots of good starting points Spans a lot of material and is strong on diverse learning styles Clear explanation and good visual layout very innovative in approach Judging Panel for NASEN TES Book Award The book is rich in lively teaching suggestions and in insights into the impact of different forms of explanation Debate C carries us away from narrow views of ability and special needs and into the consideration of difference The author takes us through lively discussions of many aspects of mathematics learning Each section offers learning and teaching ideas involving visual and kinaesthetic approaches The book is a compendium of sound ideas rather than a collection of startlingly new approaches But throughout it has the great strength of being exceptionally clear in its arguments descriptions and drawings The design is generally helpful with plenty of illustrations as befits the book's message There are handy pages of photocopiable resources This is a lively and often passionate account of ways of ensuring that multi sensory approaches infect mathematics learning As the author says pictures in the mind can help all pupils We might add They help all teachers too TES Extra for Special Needs If you have found pupils struggling to understand some aspects of mathematics at any age then this book is for you It is a very readable book that would interest all those who work in classrooms whether as a teacher or support worker with all ages and abilities for those who work with older pupils as it gives possible approaches to use with those for whom basic skills are weak or have difficulty in understanding some of the concepts required of GCSE examinations Alison Parish Second in Mathematics Department Stowmarket High School Suffolk Read the full review as posted on the Association of Teachers of Mathematics website It is a highly practical book One strength is the way that it develops a topic from the very basics through to the harder concepts There are a large number of activities that are ready to run but these really are just a starting point for teachers to begin thinking about teaching topics in a different way and from these teachers will be able to develop their own

approach Although this book is focusing on pupils who are visual and kinaesthetic learners the great majority of learners adopt a mixture of learning styles so this approach will benefit the entire class Worth a read Maths Coordinator s File This excellent and very informative teaching resource is about teaching mathematics to pupils who have learning differences It is very practical and easy to read A really nice feature is the inclusion of photocopiable resource sheets allowing readers to try out easily the ideas suggested in the book This resource is highly recommended and will be very suitable for maths teachers in primary and secondary schools SENCOs and teaching assistants British Journal of Special Education This book is about making mathematics visible and tangible not something that just lies flat on the page Dipping into it will provide instantly usable suggestions across a variety of topics at different levels from early number concepts through to fractions and ratios algebra aspects of geometry including angles and circles and data handling When you get a chance to read it more thoroughly you will find arguments for using these approaches consideration of some of the pitfalls to avoid and inspiration to develop different ways of helping students to achieve deep and connected understandings For any teacher who wants to provide students with opportunities for visual and kinaesthetic learning in mathematics The Australian Association of Mathematics Teachers Inc A very good book offering teachers SENCOs and teaching assistants guidelines strategies and practical activities to access the thought processes of pupils with different learning styles It has an easy to read format giving suggestions rather than dictat on the use of models to think and is a unique document for those who have input into the furthering of the teaching and learning of mathematics Mathematics in School How can you make maths exciting and meaningful for all your pupils Some pupils find even basic concepts in mathematics difficult to grasp and it can be a challenge to make lessons accessible to all This book offers practising teachers a range of approaches to making maths clear for struggling students It looks at the different ways in which maths can be taught so that pupils with different learning styles can be stimulated Maths is visible and tangible not something that just lies flat on the page Included are ideas to be used in lessons suggestions for exciting visual ways to teach basic concepts lots of practical advice and guidance The book shows teachers how to unlock mathematics for all their learners and it encourages the use of a variety of methods to teach the subject It provides a valuable resource for maths teachers in both primary and secondary schools for SENCOs and teaching assistants and for those delivering initial teacher training or inservice courses Tandi Clausen May is an educational researcher responsible for the development of a range of mathematics curriculum and assessment materials She delivers popular workshops on teaching mathematics around the United Kingdom She also writes regular articles on mathematics teaching for educational journals and newspapers

New National Curriculum Mathematics 5 M.J. Tipler,K.M. Vickers,1996-04-26 Sections begin with revision from previous Levels and end with a review chapter Extensive questions in carefully graded exercises maximise consolidation and build confidence Each book contains a variety of activities including skill developing exercises practical work and discussion exercises Large numbers of past paper questions are included for

plenty of examination practice The books are designed to balance tasks which develop knowledge and understanding and those which build the skills to tackle and solve mathematical problems

Supporting Numeracy Ashley Compton, Helen Fielding, Mike Scott, 2007-01-24 Numeracy is a core subject in schools and this book will provide those supporting children in this subject area with tried and tested strategies for working with students as well as the tools to improve their own subject knowledge Advice is given on how to provide an overview of key maths topics introduce students to key issues surrounding the teaching of numeracy support learners who find it difficult to understand concepts and stretch those who have grasped them easily show how numeracy links with other areas of the curriculum and with everyday life Each chapter covers a different aspect of mathematics highlighting key teaching points and common misconceptions Case studies from teaching assistants bring the topics alive and there are tasks for the reader to try out which will then develop their own understanding This book is essential for reading for all teaching assistants and support staff in early years and primary settings It is particularly useful for those studying for a Foundation Degree

Making Connections in Primary Mathematics Sylvia Turner, Judith McCulloch, 2017-02-27 First published in 2004 Routledge is an imprint of Taylor Francis an informa company

Solutions Teacher Planning Pack Extension Book 7 David Baker, 2005 This is a major new series developed to provide complete coverage of the framework for teaching mathematics and Medium Term Plan in a highly accessible and modern format

Enhancing Primary Mathematics Teaching Ian Thompson, 2003-09-16 This book is the third in an important trilogy of edited collections on the teaching and learning of primary mathematics To each book the editor Ian Thompson has attracted a team of expert contributors and himself set the characteristically high standard of writing and clarity When in 10 or 20 years time people want to know about the state of English primary mathematics at the turn of the 21st century they will turn to this volume You would do well to read it now Mathematics in Schools This is the third book in the popular series edited by Ian Thompson that brings together an impressive array of contributing authors Current issues are discussed in an informed but concise way that makes research accessible to the wider community of mathematics educators Julia Anghileri University of Cambridge This book explores the effect that the National Numeracy Strategy and its successor the Primary Strategy have had on the way in which mathematics is taught in primary schools Prominent contributors examine the Strategies recommendations from the perspective of their own research areas or interests and discuss the issues involved including Ideas for extending current practice Suggestions of important aspects of mathematics teaching that are being given little or no emphasis Alternative approaches that could be integrated into current practice Aspects of current practice that need to take account of recent research findings or emerging issues Each chapter discusses implications for teaching and learning primary mathematics The book will be particularly useful for trainees practising teachers mathematics coordinators and numeracy consultants Contributors Mundher Adhami Mike Askew Carol Aubrey Margaret Brown Ann Dowker Rosemary Hafeez Steve Higgins Keith Jones Lesley Jones Valsa Koshy Alison Millett

Claire Mooney Laurie Rousham Malcolm Swan Ian Thompson Helen J Williams *Difference Not Disorder* Dr Catherine Harvey, 2018-03-21 This practical guide provides excellent practical guidance to support children with autism Covering topics from behaviour management to sensory needs this book provides a clear overview which will help practitioners put autism research into practice learn from historic mistakes and create the most supportive environment for children with autism
