**Better By Design?** Paul L. Knox, 2020-10-09 The design professions architecture city planning landscape architecture and urban design share a great deal in terms of intellectual antecedents professional ideals and praxis In particular they share a commitment to creating better cities whether at the scale of buildings neighborhoods or city regions But who decides what constitutes a good city and how should such an ideal be implemented In Better by Design Paul Knox explores the intellectual roots of the design professions showing how architects planners and other designers have traditionally interpreted their roles and implemented their ideas in cities across North America and the UK Drawing on his long record of research and award winning publications on the social production of the built environment Knox offers a critical appraisal of their ultimate effectiveness in achieving the goal of creating and sustaining good cities

The Natural City Stephen B. Scharper, Ingrid Leman-Stefanovic, 2012-01-01 Urban and natural environments are often viewed as entirely separate entities human settlements as the domain of architects and planners and natural areas as untouched wilderness This dichotomy continues to drive decision making in subtle ways but with the mounting pressures of global climate change and declining biodiversity it is no longer viable New technologies are promising

to provide renewable energy sources and greener designs but real change will require a deeper shift in values attitudes and perceptions A timely and important collection The Natural City explores how to integrate the natural environment into healthy urban centres from philosophical religious socio political and planning perspectives Recognizing the need to better link the humanities with public policy The Natural City offers unique insights for the development of an alternative vision of urban life

**Globalization, Urbanization, and Civil Society** Bagoes Wiryomartono,2023-05-15 Globalization Urbanization and Civil Society is an interdisciplinary compilation of chapters concerning civil society in the global geopolitical context The establishment of civil society is essential for urbanism and the global community because it is the sense and essence of development concerning what humankind is as a collective entity on the globe This thought provoking book covers the multidimensional aspects issues challenges and consequences of geopolitics and globalization on civil society including freedom in the public sphere alienation neo fascism social cohesion racial inequality political narcissism political economic exceptionalism Islamic radicalism social justice and resistance The author brings a fresh and essentially non Western critical perspective to bear on the fundamental challenges faced by civil society as a result of the globalization of corporate capitalism in the Digital Age as well as providing a rich perspective on colonialism This book will appeal to scholars and graduate students of geopolitics and globalization global development sociology international relations cultural studies psychology and philosophy as well as practitioners and policymakers who are interested in interdisciplinary approaches in the field of global studies

**Hollywood Action Films and Spatial Theory** Nick Jones,2015-03-02 This book applies the discourse of the so called spatial turn to popular contemporary cinema in particular the action sequences of twenty first century Hollywood productions Tackling a variety of spatial imaginations contemporary iconic architecture globalisation and non places phenomenological knowledge of place consumerist spaces of commodity purchase cyberspace the diverse case studies not only detail the range of ways in which action sequences represent the challenge of surviving and acting in contemporary space but also reveal the consistent qualities of spatial appropriation and spatial manipulation that define the form Jones argues that action sequences dramatise the restrictions and possibilities of space offering examples of radical spatial praxis through their depictions of spatial engagement struggle and eventual transcendence

**A Greene Country Towne** Alan C. Braddock,Laura Turner Igoe,2016-12-12 An unconventional history of Philadelphia that operates at the threshold of cultural and environmental studies A Greene Country Towne expands the meaning of community beyond people to encompass nonhuman beings things and forces By examining a diverse range of cultural acts and material objects created in Philadelphia from Native American artifacts early stoves and literary works to public parks photographs and paintings through the lens of new materialism the essays in A Greene Country Towne ask us to consider an urban environmental history in which humans are not the only protagonists This collection reimagines the city as a system of constantly evolving constituents and agencies that have interacted over time a system powerfully captured by Philadelphia artists writers

architects and planners since the seventeenth century In addition to the editors contributors to this volume are Maria Farland Nate Gabriel Andrea L M Hansen Scott Hicks Michael Dean Mackintosh Amy E Menzer Stephen Nepa John Ott Sue Ann Prince and Mary I Unger      *The City of Grace* David Wadley,2019-11-29 In this sweeping appraisal of the urban condition David Wadley argues that anything less than high level resolution in modelling the well being of inhabitants is wasting precious time Humanity is encountering rising entropy caused by unsustainable economic and demographic expansion Supported by a strong interdisciplinary backdrop featuring systems and crisis theories *The City of Grace* tackles these obstacles by picturing gracious function and graceful form in a human scale settlement In an attempt to salvage things lost in the teleology of urban development over the last 100 years the outlook is both heterodox and contrarian How long can we all go on in the present way In addressing grace a more elevated concept than those focusing previous urban analyses this manifesto aims not to placate or please but instead to get humanity to face the encompassing realities it tries so hard to forget      **The Urbanism Reader** Stefan Al,Tom Verebes,2025-02-06 Positioning design at the center of the debate *The Urbanism Reader* brings together classic and contemporary readings to help designers understand the complexities of cities and urban design in the 21st century The selection of readings presented here is uniquely tailored to a design perspective for architects and urban designers balancing social issues in urbanism with a clear focus on foregrounding design as an instrument for change in cities and examining the outcomes and challenges of recent design theories design methods and technologies in the built urban environment Covering today's most urgent issues 45 texts explore key topics in urbanism from digital design technologies to smart cities from the ongoing ecological crisis to public health and the impact of Covid 19 and from emergence and informality to economic inequity in global cities Chapters cover cultural issues including diversity indigenous knowledge decolonization social justice and inclusion alongside technological developments while a final chapter speculates on the future of urbanism through readings in AI virtual reality and the frontiers of current thinking in architecture and urban design The extracts are grouped by theme each with an introduction to the historical contexts and guiding paradigms helping design students researchers and professionals to make sense of the diverse field of theory and practice in the past present and future of global urbanism      **The Sustainable City VII** M. Pacetti,G. Passerini,C.A. Brebbia,G. Latini,2012-05-07 Containing research on sustainable urban redevelopment presented at the latest in a biennial series organised by the Wessex Institute of Technology this book addresses an area of growing interest The conference series was first held in 2000 These proceedings are split into two volumes Urban areas produce a series of environmental challenges arising from the consumption of natural resources and the consequent generation of waste and pollution contributing to the development of social and economic imbalances All these problems which continue to grow in our society require the development of new solutions Topics include Volume I Urban Strategies Eco town Planning Planning development and management Planning development and management for urban conservation and regeneration Case

 Future of the Urban Geo-Humanities** Benjamin Fraser, 2015-07-30 This book highlights an interdisciplinary terrain where  
 the humanities and social sciences combine with digital methods It argues that while disciplinary frictions still condition the  
 potential of digital projects the nature of the urban phenomenon pushes us toward an interdisciplinary and digital future  
 where the primacy of cities is assured Community Planning Stephanie B. Kelly, 2004-10-08 Community Planning is an  
 introductory interdisciplinary planning textbook This working text uses an integrated text and lab manual approach where  
 theoretical concepts are integrated with practical applications and case studies Making Better Places Patsy  
 Healey, 2017-08-24 A major new introduction to planning by one of the leading figures in the field This text goes beyond  
 description of planning's central ideas and practices to stress the importance of its potential to improve the quality of life in  
 the 21st century *Perspecta 56* Guillermo Acosta Navarrete, Gabriel Gutierrez Huerta, 2024-07-23 Exploring architecture  
 as a form of concealment and obfuscation in engendering new ways of understanding conceptualizing and reshaping the  
 world Architecture is the perfect form of camouflage As buildings recede into the background of everyday life the myriad  
 forces that shape our natural social and political landscapes hide in plain sight Embedded within the spatial and material  
 organizations of the built environment are ideas of value hierarchy and control that tilt the ground and influence perception  
 in the name of endless competing interests Operating across multiple scales and mediums architectural camouflage gives  
 familiar form to obscure objectives Design transforms and encodes our shared environments from domestic domains to  
 digital territories through its material practices aesthetics and discourses Immanent in the periphery architecture's images  
 are internalized as forms for understanding and reshaping the world Camouflage in turn dwells in the architecture of our  
 collective subconscious Latent within architecture's deceptions is a profound capacity to reflect the elusive intentions and  
 surreal ambiguities of our ecological entanglements In masking hierarchies and shifting sensitivities to what escapes  
 perception architecture can engender vital questions around the agency and significance of its world making practices  
 Mediating with and within the background architecture can awaken new modes of attention to material and social layers  
 previously unimagined or hidden and engage directly with the mirrored frameworks that define reality This issue of  
*Perspecta* considers the complexities and potentialities of architectural concealment obfuscation and mimicry of the power  
 inherent in architecture's expanding capacity as media In the veiled extents of our physical and digital worlds what is still not

**Metroburbia, USA** Paul L Knox,2008-06-19 Decades of economic prosperity in the United States have redefined the

American dream Paul Knox explores how extreme versions of this dream have changed the American landscape Increased wealth has led America s metropolitan areas to develop into vast sprawling regions of metroburbia fragmented mixtures of employment and residential settings combining urban and suburban characteristics Upper middle class Americans are moving into larger homes in greater numbers which leads Knox to explore the relationship between built form and material culture in contemporary society He covers changes in home design real estate the work of developers and the changing wishes of consumers Knox shows that contemporary suburban landscapes are a product of consumer demand combined with the logic of real estate development mediated by design and policy professionals and institutions of governance Suburban landscapes not only echo the fortunes of successive generations of inhabitants Knox argues they also reflect the country s changing core values Knox addresses key areas of concern and importance to today s urban planners and suburban residents including McMansions traffic disasters house design homeowner s associations exclusionary politics and big box stores Through the inclusion of examples and photos Metroburbia USA creates an accessible portrait of today s suburbs supported by data anecdotes and social theory It is a broad interpretation of the American metropolitan form that looks carefully at the different influences that contribute to where and how we live today

#### **Feeding Barcelona, 1714-1975**

Montserrat Miller,2015-01-12 The food markets of Barcelona host thousands of customers daily from tourists eager to sample fresh fruits and grilled seafood to neighborhood cooks in search of high quality ingredients While other countries experienced major shifts away from the public market model in the twentieth century Barcelona s food markets remained fundamental to the city s identity economy and culture Montserrat Miller s Feeding Barcelona 1714 1975 examines the causes behind the extraordinary vibrancy and tenacity of the Barcelonan market system Miller argues that recurrent revolutionary uprisings in Barcelona beginning in the mid eighteenth century forced ongoing collaboration between the public and private sectors to ensure adequate and effective food distribution Municipal support permitted small scale food sellers in Barcelona to survive in a period more commonly characterized by increasing capitalization in food retail while the importance of food markets to Barcelona s social networks enhanced vendors ability to recognize and adapt to changing customer demands In addition a high number of stalls owned by women contributed both to the financial well being of vendor families and to the sociability patterns that placed neighborhood food markets at the center of daily life in the city The shared commitment of vendors shoppers and government officials to a market model of food sales created the lasting and unique market system that persists in Barcelona to this day Drawing from extensive archival research and numerous interviews with individuals at all levels of the market system Feeding Barcelona 1714 1975 is the first detailed history of the historical and social influences that create urban food markets

#### **Compositional Intelligence**

Daniel Koehler,2025-09-12 With a foreword by Mario Carpo Given the extensive data sources represented by urban environments this book investigates the potential of architecting for cities using large scale models the technological underpinning of Generative AI Koehler examines Large Language Models LLMs in

relation to architectural questions of typology those critical junctures where architecture engages with the city itself Typology becomes the interface between an AI model and its modeled audiences represented languages and scales of operation The investigation reveals how LLMs represent a fundamental shift from comprehending discrete elements to understanding entire languages introducing a stochastic perspective that transforms how we read and shape urban reality At the heart of this framework lies the concept of inductive types threshold interfaces that superpose multiple value regimes and actively reconfigure themselves in response to changing urban conditions By treating architecture as a form of representational materialism rather than a fixed language designers can engage with complex urban systems while maintaining critical agency This approach envisions architecture as an embedding of languages where buildings become processors of information that compute through their spatial arrangements The synthetic knowledge produced by LLMs enables access to plural values and stakeholder perspectives allowing architects to participate in broader material ecologies through computational superposition rather than traditional dialectical methods Providing a robust theoretical framework as well as practical insights into how architects can adapt their notational tools and design processes to embrace AI this will be an essential read for any practicing or researching architect or urban designer interested in the implications of AI on the built environment
