Shaping The Learning Curve Essays On Economic Education:

Shaping the Learning Curve Franklin G. Mixon Jr., Franklin Mixon Jr., 2005 This edited volume contains a collection of essays that reflect a broad area of economic education inquiry ranging from teaching assessment to the philosophy of the classroom Written by economics scholars from across the nation this volume presents recent discoveries in presentation assessment and other aspects of economic education at colleges and universities in the U S These articles represent but a sample of the growing commentary among academics on the importance of effective teaching and economic education scholarship

Shaping the Future ,2007-01-01 World wide the production of teachers has become a sharp political issue during the early years of the twenty first century Current systems for ensuring a supply of capable and knowledgeable teachers have come sustained under attack from politicians economists parents organisations and social critics alike There is less agreement now about teacher education than in any time over the pass fifty years Much of the debate in the public and political arenas has been driven by narrow and expedient consideration and too much of it demonstrates a poor grasp of the deep and complex issues which teacher education in a democracy must confront At the same time there has been a serious educational debate which has focused on what a well trained teacher ought to be able to do and what methods of training and education can produce competent teachers The chapters of this book address these issues in a critical way asking what should the objectives of teacher education be The authors demonstrate the international reach of the debate over teacher education and they ground their discussions within the national contexts of their own experience All the authors share the view that teacher education involves much more than acquiring a set of skills and techniques Important as these are the well trained teacher needs for example to have an understanding of the contexts of teaching of the reasons why we teach of the role of schools as institutions within political environments as well as a coherent perspective on curriculum and the relevant bodies of theory which give overall point to what is being done What teacher education entails will probably never be beyond contestation at least not so long as it takes place within capitalist democracies These democracies with their tensions running between liberal ideals and economic imperative push and pull teacher education in contradictory directions At present educational ideals seems too quickly and too dogmatically to be traded for immediate fiscal policy The authors of these chapters articulate the reasons why such short term thinking will be detrimental to any approach to teacher education which commits itself to producing well rounded and comprehensively professional teachers
