The Shaping of the Arabs Joel Carmichael, 2020-10-07 This book first published in 1969 brings out clearly and concisely the complex moulding of Arab identity The present day Arabic speaking peoples may be traced back to the Arabian tribes that were later to be shaped into a people by Islam With the Muslim conquests the language of the Arabian tribes became the vernacular of a vast cosmopolitan society extending throughout the Middle East and Southern Mediterranean The Shaping of the Arab Joel Carmichael, 1969 **The shaping of the Arabs; a study in ethnic identity** Joel Carmichael,

First published in 1980 this book looks at the factors which influenced the position held by women in the United Arab Emirates in the second half of the 20th century It argues that Islamic Law has granted women rights and privileges in the spheres of family life marriage education and economic pursuits which aim at improving their status in society However due to the interpretations of various religious scholars influenced by local traditions and social trends women have often not been given these rights particularly in family life and marriage In contrast the book also explores how the wealth brought about by the discovery of oil has served to further strengthen the position of UAE women principally in the fields of education social affairs and economic activity This book will be of interest to those studying women in Islamic society and modernisation in the Middle East **The Egyptian Expeditionary Force in World War I** Michael J. Mortlock, 2014-01-10 This military

history follows the 5th Battalion of the Suffolk regiment from England to Syria and the end of World War I Among the previously untapped primary source materials used are the author s father s correspondence and photographs from his 1913 1919 service with the 5th Suffolk in England Gallipoli Egypt Palestine and Syria It follows chronologically the frustrating failures and the final victory of the campaigns in North Africa and the Middle East and refutes the widely held misconception that cavalry played no major role in the conflict *Routledge Library Editions: Women in Islamic Societies* Various

The Muslim Contribution to Mathematics Ali Abdullah Al-Daffa',2020-09-10 This book first published in 1977 discusses the Muslim contribution to mathematics during the golden age of Muslim learning from the seventh to the thirteenth century It was during this period that Muslim culture exerted powerful economic political and religious influence over a large part of the civilised world The work of the Muslim scholars was by no means limited to religion business and government They researched and extended the theoretical and applied science of the Greeks and Romans of an earlier era in ways that preserved and strengthened man s knowledge in these important fields Although the main object of this book is to trace the history of the Muslim contribution to mathematics during the European Dark Ages some effort is made to explain the progress of mathematical thought and its effects upon present day culture Certain Muslim mathematicians are mentioned because of the important nature of their ideas in the evolution of mathematical thinking during this earlier era Muslim mathematicians invented the present arithmetical decimal system and the fundamental operations connected with it addition subtraction multiplication division raising to a power and extracting the square root and the cubic root They also introduced the zero symbol to Western culture which simplified considerably the entire arithmetical system and its fundamental operations it is no exaggeration if it is said that this specific invention marks the turning point in the development of mathematics into a science

Multiculturalism and Minority Rights in the Arab World Will Kymlicka,Eva Pfössl,2014-03-20 Since the Arab Spring Arab states have become the new front line in the struggle for democratization and for open societies As the experience of other regions has shown one of the most significant challenges facing democratization relates to minority rights This book explores how minority claims are framed and debated in the region and in particular how political actors draw upon re interpret or resist both the new global discourses of minority rights and more local traditions and practices of co existence The contributors examine a range of pre colonial colonial and post colonial factors that shape contemporary minority politics in the Arab world and that encumber the reception of international norms of multiculturalism These factors include the contested legacies of Islamic doctrines of the dhimmi and the Ottoman millet system colonial era divide and rule strategies and post colonial Arab nation building While these legacies complicate struggles for minority rights they do not entail an Arab exceptionalism to global trends to multiculturalism This volume explores a number of openings for new more pluralistic conceptions of nationhood and citizenship and suggests that minority politics at its best can serve as a vehicle for a more general transformative politics supporting a broader culture of democracy and human rights and challenging older authoritarian clientalistic or patriarchal political tendencies The chapters include both broad theoretical and historical perspectives as well as more focused case studies including Western Sahara Morocco Algeria Israel Palestine Sudan United Arab Emirates and Iraq

Imagining the Arabs Webb Peter Webb,2016-05-31 Who are the Arabs When did people begin calling themselves Arabs And what was the Arabs role in the rise of Islam Investigating these core questions about Arab identity and history by marshalling the widest array of Arabic sources employed hitherto and by closely interpreting the evidence with theories of identity and ethnicity Imagining the Arabs proposes new answers to the riddle of Arab origins and fundamental reinterpretations of early Islamic history This book reveals that the time honoured stereotypes which depict Arabs as ancient Arabian Bedouin are entirely misleading because the essence of Arab identity was in fact devised by Muslims during the first centuries of Islam Arab identity emerged and evolved as groups imagined new notions of community to suit the radically changing circumstances of life in the early Caliphate The idea of the Arab was a device which Muslims utilised to articulate their communal identity to negotiate post Conquest power relations and to explain the rise of Islam Over Islam s first four centuries political elites genealogists poetry collectors historians and grammarians all participated in a vibrant process of imagining and re imagining Arab identity and history and the sum of their works established a powerful tradition that influences Middle Eastern communities to the present day
