Shaping Of Urban Britain In The Nineteenth And Twentieth Centuries:

Cities and Plans Gordon Emanuel Cherry, 1988-01-01 An account of urban planning in Britain between 1830 and 1980 with emphasis on the increasing role of government The book describes the steps taken in public sector regulation of the urban environment from by laws to town planning and sets them in the context of societal change *The Cambridge Urban History of Britain* Peter Clark, David Michael Palliser, Martin J. Daunton, 2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century **Urban Politics and Space in the Nineteenth and Twentieth Centuries** Barry M. Doyle, 2009-10-02 This book addresses the increasing regionalisation of urban governance and politics in an era of industrialisation suburbanisation and welfare extension It provides an important reassessment of the role structure and activities of urban elites highlighting their vitality and their interdependence and demonstrating the increasing regionalisation of municipal politics as towns sought to promote themselves extend services and even expand physically onto a regional level Moreover it explores the discourses surrounding space in which gender class morality and community all feature prominently How urban space and its uses were defined and redefined became key political weapons across the regions of England in the nineteenth century and these chapters show how a range of sources maps poems songs paintings illustrated journalism social investigations historical texts were employed by contemporaries to shape the urban and its image often by placing it in a regional context or contributing to the creation of a regional image and identity This collection illustrates the continuing vitality of the study of urban politics and governance and presents a rare attempt to place English urban history in a regional context Barry Doyle has assembled an impressive team of experts on urban politics to examine not just party politics but the wider machinery of government the boards agencies and committees that shaped British towns and cities after 1830 Space and place were contested and negotiated and a distinctive sense of local identity emerged In so doing the collection challenges some of the generalisations about the governance of urban Britain and reminds us that despite a shrinking globe the local and regional are crucial to our everyday lives The book should be read by all interested in and especially those working for local government Professor Richard Rodger University of Edinburgh In *Urban Politics and Urban Space in the Nineteenth and Twentieth Centuries Regional Perspectives* Barry Doyle brings together nine original essays by both established and younger authors to explore three inter related themes in urban history politics space and region from the early to mid nineteenth century to the mid twentieth century The book is conveniently divided into three sections dealing with structures of politics politics institutions and urban management and governance discourses and space Each of the contributions to this volume promises to both enrich our knowledge of specific moments in British politico urban development through the study of discrete developments in time and space and to open up and extend the debate on the British variant of urban modernity Each examines the ways in which local power space and regional relations developed and changed between the early nineteenth and mid twentieth century Localities their politics

and communal identities are never really far from a national context indeed they largely shaped it as these essays make clear Doyle is to be commended for his endeavour not just as the editor but in particular for his introduction to the volume In a richly referenced essay that comes in at just over seven and half thousand words he casts a panoramic view over the field in the last few decades making connections where few contemporary urban historians care to tread Doyle gives us a forceful challenge to what he sees as a particularly English malaise in this period namely that of failing to recognise the potential of regional and local government to shape and manage the major reallocation of space and power a vital sphere of public life that is contemporary to our own times It is a masterly and well informed piece of writing that will set the standard for some years to come Professor Anthony McElligott University of Limerick *The Greening of London, 1920-2000* Matti O.

Hannikainen,2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities *Britain 1740 - 1950* Richard Lawton,Colin Pooley,2021-12-02 Originally published in 1992 this book provides

students with a well illustrated clearly written text which offers a coherent overview of Britain s development from a pre modern to a modern economy and society The key processes that have shaped the geography of modern Britain are rooted in the significant demographic economic technological and social transitions of the early eighteenth century the impact of which was not fully diffused through the nation until the mid 20th Century This country wide survey examines the nature of this transformation The material in the book is accessible because the book is clearly structured into 3 phases 1740 to the 1830s the 1830s to the 1890s and the 1890s to 1950 For each period the principal aspects of change in population industry the countryside and urban life are examined and regional examples given to support the analysis **Towns, Plans and**

Society in Modern Britain Helen Meller,1997-08-07 In this concise survey Helen Meller aims to explore the interaction of the social and physical environment of cities All modern societies have experienced mass urbanisation and have been subject to the economic social and technological forces which have produced this urbanisation Yet all towns and cities are not the same The author points out that historical and cultural factors have played and are still playing an important part in shaping responses to these forces This becomes even more clearly evident when the urban environment becomes subject to planning

Urban regeneration has facilitated not just an improvement in the physical environment of cities but in their economic and social fortunes as well. This study is an accessible analysis of the way in which social, cultural and physical factors have created the quality of life in British cities over the past two centuries.

Planning London for the Post-War Era 1945-1960 Emmanuel V. Marmaras, 2014-09-16. This book deals with the formation of the post-Second World War reconstruction and planning machinery in Great Britain, the re-planning efforts undertaken in post-war London and in particular the redevelopment programme regarding its central area in the form of the comprehensive development projects. Originating from a PhD Thesis, the book recreates the atmosphere following step by step arguments and events at various political, socio-economic and technical levels. It also contributes to the understanding of succeeding developments in terms of planning theory and practice. The book is structured into three parts. The first one explores the administrative and statutory developments in town planning matters during the period 1940-59. The second part deals with the plans proposed for London as a whole from independent and official organisations mainly during the 1940s. Finally, the third part examines the proposed projects for the rebuilding of the City of London and for special areas of Central London that suffered from bombing on both sides of the Thames.

Dialogues in Urban and Regional Planning Thomas L. Harper, Anthony G. O. Yeh, Heloisa Soares de Moura Costa, 2008. *Handbook of Urban Studies* Ronan Paddison, 2001. The Handbook of Urban Studies provides the first comprehensive up-to-date account of the urban condition relevant to a wide readership from academics to researchers and policymakers. It provides a theoretically and empirically informed account embracing all the different disciplines contributing to urban studies. Leading authors identify key issues and questions and future trends for further research and present their findings so that where appropriate they are relevant to the needs of policymakers. Using the city as a unifying structure, the Handbook provides an holistic appreciation of urban structure and change and of the theories by which we understand the structure, development and changing character of cities.

Green Landscapes in the European City, 1750-2010 Peter Clark, Marjaana Niemi, Catharina Nolin, 2016-12-08. Building upon recent research on the history of green landscapes in the city in Europe and North America, this volume mirrors the burgeoning global attention to urban green space developments from city policy makers and planners, architects, climatologists, ecologists, geographers and other social scientists. Taking case studies from Paris, London, Berlin, Helsinki and other leading centres, the volume examines when, why and how green landscapes evolved in major cities and the extent to which they have been shaped by shared external forces as well as by distinctive and specific local needs.

Planning and Urban Change Stephen Ward, 2004-02-18. Fully revised and thoroughly updated, the Second Edition of *Planning and Urban Change* provides an accessible yet richly detailed account of British urban planning. Stephen Ward demonstrates how urban planning can be understood through three categories: ideas, urban planning history as the development of theoretical approaches from radical and utopian beginnings to the new right thinking of the 1980s, and recent interest in green thought and sustainability policies; urban planning history as an intensely political process.

the text explains the complicated relation between planning theory and political practice and impacts urban planning history as the divergence of expectation and outcome each chapter shows how intended impacts have been modified by economic and social forces This Second Edition features an entirely new chapter on the key policy changes that have occurred under the Major and Blair governments together with a critical review of current policy trends *Dialogues in Urban and Regional Planning* Thomas Harper, Anthony Gar-On Yeh, Heloisa Costa, 2008-06-30 This is the third book in the series offering a new selection of the best urban planning scholarship from each of the world's planning school associations The award winning papers presented illustrate the concerns and the discourse of planning scholarship communities and provide a glimpse into planning theory and practice by planning academics around the world All those with an interest in urban and regional planning will find this collection valuable in opening new avenues for research and debate **Town and Country Planning in the UK** Barry Cullingworth, Vincent Nadin, 2006-10-16 This revised fourteenth edition reinforces this title's reputation as the bible of British planning It provides a thorough explanation of planning processes including the institutions involved tools systems policies and changes to land use *Railways, Urban Development and Town Planning in Britain: 1948-2008* Dr Russell Haywood, 2012-11-28 This book provides a critical overview of the relationships between planning and railway management and development during the key period in the 20th Century when the railway was in public ownership 1948-94 It assesses the strength of the relationships when working in collaboration with the private sector The book then focuses on the interplay between planning and railway since privatization in 1994 and points to best practice for the future in institutional structures and policy development to secure improved outcomes **Town and Country Planning in the UK** J. B. Cullingworth, Vincent Nadin, 2002 Town and Country Planning in the UK has become the bible of British planning It provides an explanation of the nature of planning the institutions and organisations involved the plans and other tools used by planners planning policies and more **Green Wedge Urbanism** Fabiano Lemes de Oliveira, 2017-02-23 As towns and cities worldwide deal with fast increasing land pressures while also trying to promote more sustainable connected communities the creation of green spaces within urban areas is receiving greater attention than ever before At the same time the value of the green belt as the most prominent model of green space planning is being widely questioned and an array of alternative models are being proposed This book explores one of those alternative models the green wedge showing how this offers a successful model for integrating urban development and nature in existing and new towns and cities around the world Green wedges considered here as ducts of green space running from the countryside into the centre of a city or town are not only making a comeback in urban planning but they have a deeper history in the twentieth century than many expect a history that provides valuable insight and lessons in the employment of networked green spaces in city design and regional planning today Part history and part contemporary argument this book first examines the emergence and global diffusion of the green wedge in town planning in the late 19th and early 20th centuries placing it in the broader historic context of

debates and ideas for urban planning with nature before going on to explore its use in contemporary urban practice Examining their relation to green infrastructures landscape ecology and landscape urbanism and their potential for sustainable cities it highlights the continued relevance of a historic idea in an era of rapid climate change **Law and Society in England 1750-1950** William Cornish,Stephen Banks,Charles Mitchell,Paul Mitchell,Rebecca Probert,2019-10-31 Law and Society in England 1750 1950 is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state In this new updated edition the authors explore the complex relationship between legal and social change They consider the ways in which those in power themselves imagined and initiated reform and the ways in which they were obliged to respond to demands for change from outside the legal and political classes What emerges is a lively and critical account of the evolution of modern rights and expectations and an engaging study of the formation of contemporary social administrative and legal institutions and ideas and the road that was travelled to create them The book is divided into eight chapters Institutions and Ideas Land Commerce and Industry Labour Relations The Family Poverty and Education Accidents and Crime This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law political science and social history **Introducing Urban Design** Clara Greed,Marion Roberts,2014-10-14 Introducing Urban Design Interventions and Responses is a new departure in the town planning series under the editorship of Clara Greed The dynamic new subject and profession of urban design straddles the fields of town planning architecture landscape architecture and transport planning This book recognises that a key feature of modern urban design practice is the ability to integrate a concern with the visual and aesthetic aspects of urban form with a strong social awareness of the need of user groups plus a sensitivity to wider environmental and sustainability issues In this it continues the themes already introduced in earlier volumes such as the changing nature of the profession social problems and the means of implementing policy Written by a team of eminent urban designers architects and planners under the joint editorship of Clara Greed and Marion Roberts the book introduces the reader to the subject through a discussion of current issues approaches and user responses Introducing Urban Design Interventions and Responses is an ideal resource for undergraduate courses in town planning architecture landscape architecture estate management and housing studies It is also suitable as an introductory text for first year diploma and masters programmes in urban design and suitable for RTPI RICS CIOH CIOB ASI ISVA and RIBA courses and will be of interest to professional practitioners in the urban design field Cities of Tomorrow Peter Hall,2014-04-17 Peter Hall s seminal Cities of Tomorrow remains an unrivalled account of the history of planning in theory and practice as well as of the social and economic problems and opportunities that gave rise to it Now comprehensively revised the fourth edition offers a perceptive critical and global history of urban planning and design throughout the twentieth century and beyond A revised and updated edition of this classic text from one of the most notable figures in the field of urban planning and design Offers an incisive insightful

and unrivalled critical history of planning in theory and practice as well as of the underlying socio economic challenges and opportunities Comprehensively revised to take account of abundant new research published over the last decade Reviews the development of the modern planning movement over the entire span of the twentieth century and beyond Draws on global examples throughout and weaves the author s own fascinating experiences into the text to illustrate this authoritative story of urban growth The Making and Selling of Post-Mao Beijing Anne-Marie Broudehoux,2004-08-02 This book explores the transformation of the Chinese capital both socially and physically during the final decades of the twentieth century
