While the workshop focused on sharing of data from preplanned interventional studies of human subjects, models and projects involving sharing of other clinical data types were considered to the extent that they provided lessons learned and best practices. The workshop objectives were to examine the benefits of sharing of clinical research data from all sectors and among these sectors, including for example, benefits to the research and development enterprise and benefits to the analysis of safety and efficacy.

Sharing Clinical Research Data Workshop Summary identifies barriers and challenges to sharing clinical research data, explores strategies to address these barriers and challenges, including identifying priority actions and low hanging fruit opportunities, and discusses strategies for using these potentially large datasets to facilitate scientific and public health advances.
