communities were prevented from fully realizing their visions due to the confines of capitalism as embedded in banking practices zoning laws and systemic racism

Religious Vitality in Christian Intentional Communities Mark Killian, 2017-09-25 Through ethnographic research Killian examines vitality in Philadelphia and Berea two Christian Intentional Communities whose participants live in close proximity with one another to achieve religious values Pulling from Anthony Giddens theory of structuration Killian argues that the vitality of both communities cannot be reduced to deterministic structural individual or organizational causes Rather vitality in these communities is affected by all of these causes in relationship to one another In other words it s not that each explanation matters e g social structures matter organizational behaviors matter individual religious choices matter but that these explanations matter to each other e g social structures matter to individual choices individual choices matter to organizational behaviors and social structures matter to organizational choices etc To make this argument Killian develops the idea of the vitality nexus the interconnected relationship between the various explanations of religious vitality

Sharing Lives, Dividing Assets Joanna Miles, Rebecca Probert, 2009-08-18 With many couples separating each year the question of how to determine the financial and property consequences of such separation has always been a problem area within family law Should the principles be the same for married and cohabiting couples Should the division of assets reflect the parties own expectations or norms imposed by society These are just two of the questions which the essays in this collection seek to explore Recent cases in the House of Lords have seen willingness on the part of the judges to seek out empirical studies to inform their deliberations but if the law is to engage with empirical data then much

more information is needed both about the arrangements people make during their relationships and about the impact of the law when a relationship breaks down. This interdisciplinary work brings together leading academics in the fields of law, economics, sociology and psychology in an attempt to provide some of the missing empirical information. Part I sets out the legal framework and identifies the importance of empirical studies for this area. Part II examines how couples, whether cohabitants or spouses, manage their money during their relationships. Part III then considers the impact that the law currently has on separating couples, examining how legal principles translate into reality and what their consequences are for the parties. Finally, Part IV considers the issue of legal rationality: it may be rational for the law to be shaped by patterns of behaviour, but how far will individual couples allow their behaviour to be shaped by the law?
