Resource Sharing in Biomedical Research Institute of Medicine, Committee on Resource Sharing in Biomedical Research, 1996-12-29 The United States is entering an era when more than ever the sharing of resources and information might be critical to scientific progress Every dollar saved by avoiding duplication of efforts and by producing economies of scale will become increasingly important as federal funding enters an era of fiscal restraint This book focuses on six diverse case studies that share materials or equipment with the scientific community at large the American Type Culture Collection the multinational coordinated Arabidopsis thaliana Genome Research Project the Jackson Laboratory the Washington Regional Primate Research Center the Macromolecular Crystallography Resource at the Cornell High Energy Synchrotron Source and the Human Genome Center at Lawrence Livermore National Laboratory The book also identifies common strengths and problems faced in the six cases and presents a series of recommendations aimed at facilitating resource sharing in biomedical research

Children As Research Subjects : Science, Ethics, and Law Program in Medical Ethics Michael A. Grodin Director, Leonard H. Glantz Associate Director and Professor of Health Law both at the Boston University Schools of Medicine and Public Health, 1994-02-08 Is using children as research subjects ever justified Are there limits to such use Does the fact that children are medically and psychosocially different from adults have implications for research What can we learn from the history of the use and abuse of children as research subjects Do parents have the authority to volunteer their children for research projects How should children participate in the decision to be involved in research How should research risks be assessed and balanced These perplexing questions and others are addressed by a distinguished group of experts in the field of biomedical and behavioral research with children This book adopts an integrated multidisciplinary approach which uses science ethics and law as guides for exploring these most difficult issues The tension between acquiring important new knowledge and fulfilling the obligation to protect children from exploitation and harm is a recurring theme As the first book to be devoted solely to the science ethics and law of research with children it is an indispensable resource to physicians psychologists educators lawyers ethicists Institutional Review Board members child advocates and others involved in performing or reviewing research with children

Managing Research Data Graham Pryor, 2012-01-20 This title defines what is required to achieve a culture of effective data management offering advice on the skills required legal and contractual obligations strategies and management plans and the data management infrastructure of specialists and services Data management has become an essential requirement for information professionals over the last decade particularly for those supporting the higher education research community as more and more digital information is created and stored As budgets shrink and funders of research demand evidence of value for money and demonstrable benefits for society there is increasing pressure to provide plans for the sustainable

management of data Ensuring that important data remains discoverable accessible and intelligible and is shared as part of a larger web of knowledge will mean that research has a life beyond its initial purpose and can offer real utility to the wider community This edited collection bringing together leading figures in the field from the UK and around the world provides an introduction to all the key data issues facing the HE and information management communities Each chapter covers a critical element of data management Why manage research data The lifecycle of data management Research data policies principles requirements and trends Sustainable research data Data management plans and planning Roles and responsibilities libraries librarians and data Research data management opportunities and challenges for HEIs The national data centres Contrasting national research data strategies Australia and the USA Emerging infrastructure and services for research data management and curation in the UK and Europe Readership This is essential reading for librarians and information professionals working in the higher education sector the research community policy makers and university managers It will also be a useful introduction for students taking courses in information management archivists and national library services **Personal**
