Sharing the Secrets J. F. Holden-Rhodes,1994 **Sharing the Secrets** J. F. Holden-Rhodes,1997-01-28 This important work identifies the problems of counter drug intelligence and points toward a remedy for the failed anti drug policies in the United States through the effective use of open source intelligence **No More Secrets** Hamilton Bean,2011-05-18 This in depth analysis shows how the high stakes contest surrounding open source information is forcing significant reform within the U S intelligence community the homeland security sector and among citizen activists Since 9 11 U S intelligence organizations have grappled with the use of open source information derived from unclassified material including international newspapers television radio and websites They have struggled as well with the idea of sharing information with international and domestic law enforcement partners The apparent conflict between this openness and the secrecy inherent in intelligence provides an opportunity to reconsider what intelligence is how it is used and how citizens and their government interact in the interests of national security That is the goal of No More Secrets Open Source Information and the Reshaping of U S Intelligence To write this thought provoking book the author drew on his own direct participation in the institutionalization of open source within the U S government from 2001 to 2005 seeking to explain how these developments influence the nature of intelligence and relate to the deliberative principles of a democratic society By analyzing how open source policies and practices are developed maintained and transformed this study enhances public understanding of both intelligence and national security affairs **Strategic Review** ,1998 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States

Sex, Drugs, and Body Counts Peter Andreas, Kelly M.

Greenhill,2011-05-15 At least 200 000 250 000 people died in the war in Bosnia There are three million child soldiers in Africa More than 650 000 civilians have been killed as a result of the U S occupation of Iraq Between 600 000 and 800 000 women are trafficked across borders every year Money laundering represents as much as 10 percent of global GDP Internet child porn is a 20 billion a year industry These are big attention grabbing numbers frequently used in policy debates and media reporting Peter Andreas and Kelly M Greenhill see only one problem these numbers are probably false Their continued use and abuse reflect a much larger and troubling pattern policymakers and the media naively or deliberately accept highly politicized and questionable statistical claims about activities that are extremely difficult to measure As a result we too often become trapped by these mythical numbers with perverse and counterproductive consequences This problem exists in myriad policy realms But it is particularly pronounced in statistics related to the politically charged realms of global crime and conflict numbers of people killed in massacres and during genocides the size of refugee flows the magnitude of the illicit global trade in drugs and human beings and so on In Sex Drugs and Body Counts political scientists anthropologists sociologists and policy analysts critically examine the murky origins of some of these statistics and trace their remarkable proliferation They also assess the standard metrics used to evaluate policy effectiveness in combating problems such as terrorist financing sex trafficking and the drug trade

Countering Terrorism and Insurgency in the 21st Century James J. F. Forest, 2007-06-30 The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States Countering Terrorism and Insurgency in the 21st Century analyzes the most significant dimensions of combating terrorism including considerations of strategic and tactical issues hard power soft power and counterintelligence the need to thwart sources and facilitators weak governments ill conceived foreign policy and trafficking in drugs guns and humans and the incorporation of lessons learned thus far from combating terrorism around the globe Since the dawn of the new millennium combating terrorism has become a primary focus of security professionals throughout the world The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States while many countries from Algeria and Spain to Sri Lanka and Indonesia have redoubled their efforts to combat their own indigenous terrorism threats In the United States the counterterrorism goals identified in the National Strategy for Combating Terrorism 2006 can only be achieved through significant multinational cooperation These goals are to advance effective democracies as the long term antidote to the ideologies of terrorism to prevent attacks by terrorist networks to deny terrorists the support and sanctuary of rogue states to deny terrorists control of any nation they would use as a base and launching pad for terror and to lay the foundations and build the institutions and structures we need to carry the fight forward against terror and help ensure our ultimate success At this point in the development of the global counterterrorism efforts it is particularly important to pause for reflection on a number of critical questions What do we know about effectively countering terrorism What are the characteristics of

successful or unsuccessful counterterrorism campaigns What do we need to learn in order to do this better Countering Terrorism and Insurgency in the 21st Century addresses these and related questions contributing to national security policy as well as to our understanding of the terrorist threat and how it can be defeated Volume 1 Strategic and Tactical Considerations examines issues of hard power soft power and intelligence counterintelligence Volume 2 Sources and Facilitators covers state failure border controls democracy promotion networks and trade and trafficking and societal issues Volume 3 Lessons Learned from Combating Terrorism and Insurgency includes case studies of counterterrorism operations e g the hijacking of the Achille Lauro the 1993 bombing of the World Trade Center and the capture of key terrorist suspects like Ramzi Youssef and Khalid Sheikh Mohamad and case studies of long term efforts to combat terrorism e g the Basques in Spain the Tamil Tigers in Sri Lanka Israel s struggle against Palestinian terror organizations Peru and Sendero Luminoso and Japan and Aum Shinrikyo Border Games Peter Andreas,2000 Yet the unprecedented buildup of border policing has taken place in an era otherwise defined by the opening of the border most notably through NAFTA This contrast creates a borderless economy with a barricaded border *Professional Journal of the United States Army* ,1998
