Make a Little Wave Kerry O'Malley Cerra, 2024-10-01 Swim with the current or go against the flow Savannah has been feeling out of place ever since her family moved to Sandy Dune Florida She finds it easier to make friends with animals than people Plus everyone in Sandy Dune seems to love spending time in the ocean and Sav never feels comfortable leaving the shore When

her classmate Tanner invites her to the opening of his family's restaurant. Sav is excited until she is served a bowl of shark fin soup. Sav has always been scared of sharks but she is horrified that they are inhumanely killed for this expensive delicacy. Especially as she learns more about these surprisingly gentle creatures and discovers that some shark species are being hunted to the point of endangerment. Tanner's family brushes off her concerns but Sav resolves to stop them from serving the soup. To do that she will have to learn how to use her voice and face her biggest fears.

Using Technology to Transform the Value Chain Fred Kuglin, Ray Hood, 2008-12-22 Since the end of the tech bubble and 9/11 the number of breakthrough technologies supporting value chain management has increased significantly especially those involving sensors and wireless. When these trends are combined with the monumental shift in global economies the result is a new set of disciplines for global business leaders.

Demonstration Encyclopedia of Fish Physiology, 2011-06-01 Fish form an extremely diverse group of vertebrates. At a conservative estimate at least 40% of the world's vertebrates are fish. On the one hand they are united by their adaptations to an aquatic environment and on the other they show a variety of adaptations to differing environmental conditions often to extremes of temperature, salinity, oxygen level and water chemistry. They exhibit an array of behavioural and reproductive systems. Interesting in their own right this suite of adaptive physiologies provides many model systems for both comparative vertebrate and human physiologists. This four volume encyclopedia covers the diversity of fish physiology in over 300 articles and provides entry level information for students and summary overviews for researchers alike. Broadly organised into four themes articles cover Functional, Thematic and Phylogenetic Physiology and Fish Genomics. Functional articles address the traditional aspects of fish physiology that are common to all areas of vertebrate physiology including Reproduction, Respiration, Neural, Sensory, Central Effector, Endocrinology, Renal, Cardiovascular, Acid base Balance, Osmoregulation, Ionoregulation, Digestion, Metabolism, Locomotion and so on. Thematic Physiology articles are carefully selected and fewer in number. They provide a level of integration that goes beyond the coverage in the Functional Physiology topics and include discussions of Toxicology, Air breathing, Migrations, Temperature, Endothermy etc. Phylogenetic Physiology articles bring together information that bridges the physiology of certain groupings of fishes where the knowledge base has a sufficient depth and breadth and include articles on Ancient Fishes, Tunas, Sharks etc. Genomics articles describe the underlying genetic component of fish physiology and highlight their suitability and use as model organisms for the study of disease, stress and physiological adaptations and reactions to external conditions. Winner of a 2011 PROSE Award Honorable Mention for Multivolume Science Reference from the Association of American Publishers. The definitive encyclopedia for the field of fish physiology. Three volumes which comprehensively cover the entire field in over 300 entries written by experts. Detailed coverage of basic functional physiology of fishes, physiological themes in fish biology and comparative physiology amongst taxonomic groups. Describes the genomic bases of fish physiology and biology and the use of fish as model organisms in human physiological research. Includes a glossary of terms.

Shark Research Jeffrey C Carrier, Michael R.

Heithaus, Colin A. Simpfendorfer, 2018-09-03 Over the last decade the study of shark biology has benefited from the development refinement and rapid expansion of novel techniques and advances in technology These have given new insight into the fields of shark genetics feeding foraging bioenergetics imaging age and growth movement migration habitat preference and habitat use This pioneering book written by experts in shark biology examines technologies such as autonomous vehicle tracking underwater video approaches molecular genetics techniques and accelerometry among many others Each detailed chapter offers new insights and promises for future studies of elasmobranch biology provides an overview of appropriate uses of each technique and can be readily extended to other aquatic fish and marine mammals and reptiles Including chapter authors who were pioneers in developing some of the technologies discussed in the book this book serves as the first single source reference with in depth coverage of techniques appropriate for the laboratory and field study of sharks skates and rays It concludes with a unique section on Citizen Science and its application to studies of shark biology This is a must read for any marine biologist or scientist working in the field of shark biology as well as marine biology students and graduates

Expanding Adaptation Networks Kate Newell, 2017-05-22 This book addresses print based modes of adaptation that have not conventionally been theorized as adaptations such as novelization illustration literary maps pop up books and ekphrasis It discusses a broad range of image and word based adaptations of popular literary works among them The Wizard of Oz Alice in Wonderland Daisy Miller The Strange Case of Dr Jekyll and Mr Hyde Moby Dick and Adventures of Huckleberry Finn The study reveals that commercial and franchise works and ephemera play a key role in establishing a work s iconography Newell argues that the cultural knowledge and memory of a work is constructed through reiterative processes and proposes a network based model of adaptation to explain this Whereas most adaptation studies prioritize film and television this book s focus on print invites new entry points for the study of adaptation

Italian Annotated Bibliography of Tuna, Tuna-like and Billfish Species Antonio Di Natale, 2022-12-15 The Italian annotated bibliography on tunas tuna like and billfish species is a sort of unicum because for the very first time it provides annotation in English for all papers published by Italian authors over the centuries in various languages Taking into account that these species are an essential component of the Italian and Mediterranean culture thousands of authors published a very high amount of papers since historical times on various themes and subjects These large fish species are nowadays not only essential elements of the marine trophic chain but also important components of human seafood and the related fishery economy This book makes all these papers internationally available for all scientists helping them in their research activities and the annotations facilitate the searching work by species and keywords
