Shawn Fanning Napster And The Music Revolution:

Shawn Fanning Christopher Mitten, 2002-01-01 A biography of the founder and director of the music exchange Internet company Napster focusing on the court cases of 2000 The Economics of Symbolic Exchange Alexander Dolgin, 2008-10-06 Alexander Dolgin's Economics of Symbolic Exchange is in reality not one but three books and although these semantic layers are interlinked the reader will need to choose between the different vectors and modalities One clearly evident dimension is research Certain authors introduce quite new intellectual approaches into scientific debate This requires a special frame of mind and a searching curiosity about social reality Carl Gustav Jung identified a phenomenon which he called systematic blindness when a science reaches a stage of maturity and equilibrium it categorically refuses from a sense of self preservation to note certain facts and phenomena which it finds inconvenient In Alexander Dolgin's book whole complexes of such non canonical material are to be found Here are just a few examples like exchange networks through which digital works of art are spread through the Internet bargain sales of fashionable clothing the paradox of equal pricing of cultural goods of varying quality and a discussion of whether patronage or business has the more productive influence on creativity Obviously not all the issues Dolgin raises are totally new but brought together and examined within an elegant logical framework of informational economics they pose a challenge to scientific thinking Such challenges are by no means immediately or in some cases ever acclaimed by the scientific establishment J K Galbraith for example a great American economist whose works are read throughout the world who introduced a whole range of crucially important concepts the director of John F *Journal of Moral Theology, Volume 4, Number 1* James F.
