Simplicius Corollaries On Place And Time:

The Philosophy of the Commentators, 200-600 AD: Logic and metaphysics Richard Sorabji, 2005 The third volume of this invaluable sourcebook covers three main subject areas the metaphysics of Aristotle's logical works logic and the higher metaphysics of Neoplatonism

Simplicius: Corollaries on Place and Time J.O. Urmson, 2014-04-10 Is there such a thing as three dimensional space Is space inert or dynamic Is the division of time into past present and future real Does the whole of time exist all at once Does it progress smoothly or by discontinuous leaps Simplicius surveys ideas about place and time from the preceding thousand years of Greek Philosophy and reveals the extraordinary ingenuity of the late Neoplatonist theories which he regards as marking a substantial advance on all previous ideas

Corollaries on Place and Time Simplicius (de Cilicie.), 1992 Simplicius surveys ideas about place and time from the preceding thousand years of Greek philosophy Translation of text with commentary and notes

Neoplatonism Pauliina Remes, 2014-12-05 Although Neoplatonism has long been studied by classicists until recently most philosophers saw the ideas of Plotinus et al as a lot of religious magical mumbo jumbo Recent work however has provided a new perspective on the philosophical issues in Neoplatonism and Pauliina Remes new introduction to the subject is the first to take account of this fresh research and provides a reassessment of Neoplatonism's philosophical credentials Covering the Neoplatonic movement from its founder Plotinus AD 204-70 to the closure of Plato's Academy in AD 529 Remes explores the ideas of leading Neoplatonists such as Porphyry Iamblichus Proclus Simplicius and Damascius as well as less well known thinkers Situating their ideas alongside classical Platonism Stoicism and the neo Pythagoreans as well as other intellectual movements of the time such as Gnosticism Judaism and Christianity Remes provides a valuable survey for the beginning student and non specialist

The Medieval Concept of Time Pasquale Porro, 2021-08-04 This volume examines the changing perceptions of time in the transition from the medieval debate to early modern philosophy Some of the foremost contemporary experts try to weave the various strands of the topic into a methodological and doctrinal whole The book consists of 21 studies 19 in English 2 in French subdivided into five main sections entitled respectively The Late Antique Legacy The Scholastic Debate Late Scholasticism Time and Medicine Early Modern Philosophy Themes discussed include the reception of Aristotle's doctrine of time the Augustinian and Neoplatonic heritage the concepts of divine eternity and angelic duration and the particular role attributed to time in medieval and early modern medicine This collection of studies aims at offering a comprehensive historico doctrinal analysis of one of the most fascinating topics in

western intellectual history **The Fate of Place** Edward Casey, 2013-05-13 In this imaginative and comprehensive study Edward Casey one of the most incisive interpreters of the Continental philosophical tradition offers a philosophical history of the evolving conceptualizations of place and space in Western thought Not merely a presentation of the ideas of other philosophers *The Fate of Place* is acutely sensitive to silences absences and missed opportunities in the complex history of philosophical approaches to space and place A central theme is the increasing neglect of place in favor of space from the seventh century A D onward amounting to the virtual exclusion of place by the end of the eighteenth century Casey begins with mythological and religious creation stories and the theories of Plato and Aristotle and then explores the heritage of Neoplatonic medieval and Renaissance speculations about space He presents an impressive history of the birth of modern spatial conceptions in the writings of Newton Descartes Leibniz and Kant and delineates the evolution of twentieth century phenomenological approaches in the work of Husserl Merleau Ponty Bachelard and Heidegger In the book's final section Casey explores the postmodern theories of Foucault Derrida Tschumi Deleuze and Guattari and Irigaray **Space, Imagination and the Cosmos from Antiquity to the Early Modern Period** Frederik A. Bakker, Delphine Bellis, Carla Rita Palmerino, 2019-02-05 This volume provides a much needed historically accurate narrative of the development of theories of space up to the beginning of the eighteenth century It studies conceptions of space that were implicitly or explicitly entailed by ancient medieval and early modern representations of the cosmos The authors reassess Alexandre Koyr's groundbreaking work *From the Closed World to the Infinite Universe* 1957 and they trace the permanence of arguments to be found throughout the Middle Ages and beyond By adopting a long timescale this book sheds new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space Readers may explore the work of a variety of authors including Aristotle Epicurus Henry of Ghent John Duns Scotus John Wyclif Peter Auriol Nicholas Bonet Francisco Suarez Francesco Patrizi Giordano Bruno Libert Froidmont Marin Mersenne Pierre Gassendi Gottfried Wilhelm Leibniz and Samuel Clarke We see how reflections on space imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with and enriched by various scientific and theological challenges which induced multiple conceptual adaptations and innovations This volume is a useful resource for historians of philosophy those with an interest in the history of science and particularly those seeking to understand the historical background of the philosophy of space *Interrogating the Tradition* Charles E. Scott, John Sallis, 2000-01-06 *Interrogating the Tradition* interprets figures in the history of Western thought from a broad continental perspective Divided into three major sections hermeneutical thought Heidegger and the Greeks and the question of nature in German Idealism the question of origins is central throughout and takes various shapes all within the context of the history of Western philosophy Addressed are the form inquiries take into manners by which we receive our philosophical tradition the originary force of Plato and Aristotle in the formation of philosophical interpretations of time and human life and inceptual concepts of nature

in the nineteenth century The philosophers treated here are primarily ancient Greek and nineteenth century German but also included are careful discussions of Heidegger and Gadamer Coming from both sides of the Atlantic and representing various approaches to the issues the contributors showcase their work on one of the major cutting edges of philosophy Contributors to this book include Robert Bernasconi Walter Brogan Tina Chanter Fran oise Dastur John Ellis G nter Figal Rodolphe Gasch Jean Grondin David Farrell Krell Michael Naas James Risser John Russon John Sallis Charles E Scott Ben Vedder and Jason M Wirth

Timing and Temporality in Islamic Philosophy and Phenomenology of Life Anna-Teresa Tymieniecka, 2007-09-19

From time immemorial concern with timing of life has been crucial for the regulation of human praxis as well as for the philosophical quest to understand existence by seeking its meaning The two used to inform each other until modernity when they parted In spite of the extensive progress in manipulating change and motion and of the abundance of metaphysical attempts to enlighten human beings about their fate the puzzling nature of temporality and timing of reality remains controversial The present collection of studies seeks a new answer by initiating a novel investigation informed by the ancient wisdom of the Greco Arabic Islamic sources and inheritance on the one side and the contemporary discernment of Occidental phenomenology of life on the other in a common dialogical effort to unravel this great enigma of existence
