Intercultural Learning in Modern Language Education Erin Kearney,2015-11-02 Many educators aim to engage students in deeply meaningful learning in the language classroom often facing challenges to connect the students with the culture of the language they are learning This book aims to demonstrate that substantial intercultural learning can and does occur in the modern language classroom and explores the features of the classroom that support meaningful culture in language learning The author argues that transformative modern language education is intimately tied to a view of language learning as an engagement in meaning making activity or semiotic practice The empirical evidence presented is analyzed and then linked to both the theorizing of culture in language teaching and to practical concerns of teaching *Teaching Modern Languages* Ann Swarbrick,2002-03-11 Modern language classrooms are currently dominated by the communicative method of language teaching This reader draws together recent and newly commissioned papers to show the origins of communicative methodology how it has developed what its research justification is and how it can most effectively be used in the classroom Various chapters examine the particular challenges of differentiation teaching grammar encouraging pupils to use the target language together and teaching a foreign language to children with special educational needs The final section discusses ways of developing creativity in the modern languages classroom through the use of drama creative writing and role play Anyone involved in teaching modern languages will find this reader a rich source for reflection and good practice

Project-Based Second and Foreign Language Education Gulbahar H. Beckett,Paul Chamness Iida,2006-09-01 Dewey

s idea of Project based Learning PBL was introduced into the field of second language education nearly two decades ago as a way to reflect the principles of student centered teaching Hedge 1993 Since then PBL has also become a popular language and literacy activity at various levels and in various contexts see Beckett 1999 Fried Booth 2002 Levis Kobayashi 2003 Luongo Orlando 2001 Mohan Weinstein 2004 For example it has been applied to teach various ESL and EFL skills around the world e g Fried Booth 2002 More recently PBL has been heralded as the most appropriate approach to teaching content based second language education Bunch et al 2001 Stoller 1997 English for specific purposes Fried Booth 2002 community based language socialization Weinstien 2004 and critical and higher order thinking as well as problem solving skills urged by the National Research Council 1999 Despite this emphasis there is a severe shortage of empirical research on PBL and research based frameworks and models based on sound theoretical guidance in general and second and foreign language education in particular Thomas 2000 Also missing from the second and foreign language education literature is systematic discussion of PBL work that brings together representative work identifying obvious gaps and guiding the field toward future directions This first of its kind volume bridges these obvious gaps through the original work of international scholars from Canada Israel Japan Singapore and the US

Integrating Study Abroad Into the Curriculum Elizabeth Brewer, Kiran Cunningham, 2023-07-03 With the increased interest in study abroad from government educators employers and students the question is is study abroad engendering the desired intercultural competencies and intellectual development To achieve this goal this book proposes two strategies structure study abroad to bridge the separation of academic learning from experiential and intercultural learning and integrate study abroad with the undergraduate curriculum In proposing this integration the editors take into account the need for institutional change and recognize faculty members concerns about maintaining the integrity of the curriculum teaching in areas outside their expertise and keeping up with ever evolving institutional missions This book opens with two chapters presenting different theoretical perspectives relevant to the integration of study abroad into the curriculum The following nine chapters provide examples from a variety of disciplines from anthropology and religious studies to literature urban studies biology and public health and within such contexts as distance learning service learning and the senior thesis The concluding chapter considers faculty development activities and institutional structures and policies that support curriculum integration While the examples are drawn from Beloit College and Kalamazoo College liberal arts colleges with substantial study abroad enrollments and nationally recognized for their innovative practices readers will recognize they are easily adaptable to their own institutions The two colleges achieved their curricular innovations with limited financial resources and in the context that most of their students are dependent on financial aid The transformational ideas and practices described here provide material for reflection and campus conversations for anyone concerned with developing global citizens and well educated students and offer a blueprint for implementation
