Kate Forsyth's Long-Lost Fairy Tales Kate Forsyth, 2025-10-28 Long long ago storytellers all around the world told tales of wonder both to enchant and entertain us and also to teach us that if we are good and kind and courageous enough we can change the world for the better For this is what fairy tales do They give us hope As we travel through the dark and dangerous world of the fairy tale as we fight dragons and outwit ogres and save our sisters and brothers we learn that we are capable of anything And then we return to our own world with all that we have learned along the way stronger and braver than before The stories in this book come from all the corners of the world Some were told in deep time before history was recorded and some were written not so long ago All of them have been unjustly forgotten In this collection of long lost fairy tales author Kate Forsyth and illustrator Lorena Carrington work together to bring tales of wisdom compassion and courage to life for the modern day reader This enchantingly beautiful book will transform the way you think about fairy tales

Artificial Intelligence and Literary Creativity Selmer Bringsjord, David Ferrucci, 1999-09-01 Is human creativity a wall that AI can never scale Many people are happy to admit that experts in many domains can be matched by either knowledge based or sub symbolic systems but even some AI researchers harbor the hope that when it comes to feats of sheer brilliance mind over machine is an unalterable fact In this book the authors push AI toward a time when machines can autonomously write not just humdrum stories of the sort seen for years in AI but first rate fiction thought to be the province of human genius It reports on five years of effort devoted to building a story generator the BRUTUS 1 system This book was written for three general reasons The first theoretical reason for investing time money and talent in the quest for a truly creative machine is to work toward an answer to the question of whether we ourselves are machines The second theoretical reason is to silence those who believe that logic is forever closed off from the emotional world of creativity The practical rationale for this endeavor and the third reason is that machines able to work alongside humans in arenas calling for creativity will have incalculable worth
