Women Sally Chivers, 2003 Drawing on the perspective of aging bodies in order to approach the study of contemporary Canadian women's fiction the author seeks to understand body criticism in general because elderly physical experiences lay bare crucial assumptions of thinking through the body It also investigates the mechanisms and effects of constructions of aging in order to combat the automatically negative reactions most readers have to the topic of old age **Violence Against Older Women, Volume I** Hannah Bows, 2019-06-03 This book brings together international research from scholars and activists on the forms of violence that older women experience into a unique comprehensive two volume set This first volume consolidates the research on the forms causes and extent of different forms of violence against older women It considers the theoretical limitations of our understandings and charts the gaps in empirical and theoretical research in this area and how this has hindered effective policy and practice responses to violence against older women Taken together this volume offers an important starting point from which future research can draw to address the gaps in knowledge and evidence It also highlights issues that are particular to older women's experiences of violence compared with younger women It highlights gaps in existing research and suggests a future research agenda and implications for practitioners It will be of interest to researchers in social and health care gerontology sociology and social policy feminist research and criminology

Faces of Women and Aging Ellen Cole, Esther D Rothblum, Nancy C Davis, 2014-06-03 Discover the diverse ways aging women attempt to deal with the universal challenges of loss sickness and death along with the problems of being old women in a society that values women mainly as sexual partners or producers of children Old women are often seen as poor powerless and pitiful in our sexist and youth oriented society The truth is that women age much more successfully than do men and they are increasingly in the majority as our population ages These truths and others are presented in Faces of Women and Aging a collection written by women a number of whom are themselves older women who bring their unique life experiences and personalities to the topic This uplifting book emphasizes that middle and old age are merely stages of growth and development not just seasons of loss and decline as the end approaches A wealth of topics are covered in Faces of Women and Aging that broaden the reader's awareness of the problems of women and aging including how to maintain

self esteem in the face of sexism ageism and severe illness the problems of being single or divorced in the later years the problems of maintaining a good body image for older women in a society which values the young and the beautiful the additional difficulties of minority women specifically lesbians and native American women increased dependency brought on by illness and loss of partners *Faces of Women and Aging* combines personal narratives that serve as reminders of the human beings behind statistics and case studies with theoretical observations which help therapists assist older women cope with the daily hardships as well as the more catastrophic problems of aging **Learning to Be Old** Margaret

Cruikshank,2013-02-14 This work examines what it means to grow old in America today The book questions social myths and fears about aging sickness and the other social roles of the elderly the over medicalization of many older people and ageism Here the author proposes alternatives to the ways aging is usually understood in both popular culture and mainstream gerontology She does not propose the ideas of successful aging or productive aging but more the idea of learning how to age Featuring new research and analysis the third edition of this text demonstrates more thoroughly than the previous editions that aging is socially constructed The book focuses on the differences in aging for women and men as well as for people in different socioeconomic groups The author is able to put aging in a broad context that not only focuses on how aging affects women but men as well Key updates in the third edition include changes in the health care system changes in how long older Americans are working especially given the impact of the recession and new material on the brain and mind body interconnections The author challenges conventional ideas about aging and brings forth some new ideas surrounding aging in America today **Communication and Women's Friendships** Janet Doubler Ward,JoAnna Stephens Mink,1993 Eleven

contributed essays discuss a variety of literary texts against a background of the historical and cultural aspects of women s friendships The listings of works cited and primary works discussed do not adequately substitute for an index Paper edition unseen 15 95 Annotation copyright by Book News Inc Portland OR *Age Matters* Toni M. Calasanti,Kathleen F.

Slevin,2013-10-11 This volume of original chapters is designed to bring attention to a neglected area of feminist scholarship aging After several decades of feminist studies we are now well informed of the complex ways that gender shapes the lives of women and men Similarly we know more about how gendered power relations interface with race and ethnicity class and sexual orientation Serious theorizing of old age and age relations to gender represents the next frontier of feminist scholarship In this volume leading national and international feminist scholars of aging take first steps in this direction illuminating how age relations interact with other social inequalities particularly gender In doing so the authors challenge and transform feminist scholarship and many taken for granted concepts in gender studies
