Persuasive Data Visualizations shows how a good visualization can communicate the nature and potential impact of information and ideas more powerfully than any other form of communication. For a long time, data viz was left to specialists: data scientists and professional designers. No longer. A new generation of tools and massive amounts of available data make it easy for anyone to create visualizations that communicate ideas far more effectively than generic spreadsheet charts ever could. What's more, building good charts is quickly becoming a need to have skill for managers. If you're not doing it, other managers are, and they're getting noticed for it and getting credit for contributing to your company's success. In *Good Charts*, data viz maven Scott Berinato provides an essential guide to how visualization works and how to use this new language to impress and persuade. Data viz today is where spreadsheets and word processors were in the early 1980s, on the cusp of changing how we work. Berinato lays out a system for thinking visually and building better charts through a process of talking, sketching, and prototyping. This book is much more than a set of static rules for making visualizations. It taps into both well-established and cutting-edge research in visual perception and neuroscience, as well as the emerging field of visualization science, to explore why good charts and bad ones create feelings behind our eyes. Along the way, Berinato also includes many engaging vignettes of data viz pros illustrating the ideas in practice. *Good Charts* will help you turn plain uninspiring charts that merely present information into smart, effective visualizations that powerfully convey ideas.

But be careful: this powerful resource could make your presentations so good that you might have to give more of them.

Academic Conference Presentations Mark R. Freiermuth, 2023-01-04 This book provides a step-by-step journey to giving a successful academic conference presentation, taking readers through all of the potential steps along the way, from the initial idea and the abstract submission all the way up to the presentation itself. Drawing on the author's own experiences, the book highlights good and bad practices while explaining each introduced feature in a very accessible style. It provides tips on a wide range of issues, such as writing up an abstract, choosing the right conference, negotiating group presentations, giving a poster presentation, what to include in a good presentation, conference proceedings, and presenting at virtual or hybrid events. This book will be of particular interest to graduate students, early career researchers, and non-native speakers of English, as well as students and scholars who are interested in English for Academic Purposes, Applied Linguistics, Communication Studies, and generally speaking, most of the Social Sciences. With that said, because of the book's theme, many of the principles included within will appeal to a broad spectrum of academic disciplines.
