Stuart Ablon, 2008-09-20 The importance of conducting empirical research for the future of psychodynamics is presented in this excellent new volume In Handbook of Evidence Based Psychodynamic Psychotherapy Bridging the Gap Between Science and Practice the editors provide evidence that supports this type of research for two primary reasons The first reason concerns the current marginalization of psychodynamic work

within the mental health field Sound empirical research has the potential to affirm the important role that psychodynamic theory and treatment have in modern psychiatry and psychology The second reason that research is crucial to the future of psychodynamic work concerns the role that systematic empirical investigations can have in developing and refining effective approaches to a variety of clinical problems Empirical research functions as a check on subjectivity and theoretical alliances in on going attempts to determine the approaches most helpful in working with patients clinically Handbook of Evidence Based Psychodynamic Psychotherapy Bridging the Gap Between Science and Practice brings together a panel of distinguished clinician researchers who have been publishing their findings for decades This important new book provides compelling evidence that psychodynamic psychotherapy is an effective treatment for many common psychological problems

Philosophical Provocations Colin McGinn, 2017-08-18 Pithy direct and bold essays that propose new ways to think about old problems spanning a range of philosophical topics In Philosophical Provocations Colin McGinn offers a series of short sharp essays that take on philosophical problems ranging from the concept of mind to paradox altruism and the relation between God and the Devil Avoiding the usual scholarly apparatus and embracing a blunt pithiness McGinn aims to achieve as much as possible in as short a space as possible while covering as many topics as possible Much academic philosophical writing today is long leaden citation heavy dense with qualifications and painful to read The essays in Philosophical Provocations are short direct and engaging often challenging philosophical orthodoxy as they consider issues in mind language knowledge metaphysics biology ethics and religion McGinn is looking for new ways to think about old problems Thus he writes about consciousness I think we have been all wrong and goes on to suggest that both consciousness and the unconscious are mysteries Summing up his proposal on altruism he remarks My suggestion can now be stated somewhat brutally as follows human altruism is the result of parasitic manipulation He takes a moment to reflect I really don't know why it is good to be alive though I am convinced that the standard suggestions don't work McGinn gets straight to the point and states his position with maximum clarity These essays offer provocative invitations to think again
